Von Pinienhainen gesäumte Buchten, zerklüftete Felsen und türkisblaues Wasser haben die Costa Brava berühmt gemacht. Bis heute ist sie deshalb vor allem bei Badeurlaubern und Familien mit Kindern beliebt. The Sahara: a dream-like, far away landscape of Lawrence of Arabia and Wilfred Thesiger, The English Patient and Star Wars, and home to nomadic communities whose ways of life stretch back millennia. Today it's a teeth-janglingly dangerous destination, where the threat of jihadists lurks just over the horizon. Following in the footsteps of 16th century traveller Leo Africanus, Nicholas Jubber went on a turbulent adventure to the forgotten places of North Africa and the legendary Timbuktu. Once the seat of African civilization and home to the richest man who ever lived, this mythic city is now scarred by terrorist occupation and is so remote its own inhabitants hail you with the greeting, 'Welcome to the middle of nowhere'. From the cattle markets of the Atlas, across the Western Sahara and up the Niger river, Nicholas joins the camps of the Tuareg, Fulani, Berbers, and other communities, to learn about their craft, their values and their place in the world. The Timbuktu School for Nomads is a unique look at a resilient city and how the nomads pit ancient ways of life against the challenges of the 21st century.

"Paul Theroux has spent fifty years crossing the globe, adventuring in the exotic, seeking the rich history and folklore of the far away. Now, for the first time, in his tenth travel book, Theroux explores

a piece of America--the Deep South. He finds there a paradoxical place, full of incomparable music, unparalleled cuisine, and yet also some of the nation's worst schools, housing, and unemployment rates. It's these parts of the South, so often ignored, that have caught Theroux's keen traveler's eye."--

Auszug: ...coloration of its plumage, and also by a quite different call-note; and I at once recognised it as the eastern *Sylvia fuscata*. Unfortunately, in spite of all attempts, I found it impossible to get a free shot at it, because on the other side of my neighbour's garden is a long thorn-hedge with houses behind it; all I could do was to observe it for about ten minutes at distances of from two to twenty paces; after which, this much-coveted example flew off into the hedge above referred to, and was not to be found again. This, by the way, was the same hedge in which my son Ludwig shot the example of *Sylvia nitida* which now adorns my collection. According to Jerdon, this Warbler winters in India; and examples of it have been sent by Dybowsky and other observers from the Baikal region; its breeding range, therefore, probably extends from the middle Obi and upper Irtisch into eastern Asia. All the Warblers hitherto discussed are distinguished from those which follow by the absence of the banded markings on the wings, which are peculiar to the preponderating number of the Asiatic forms, these bands or bars being formed by the strikingly light-coloured tips of the largest and next largest wing-coverts. These species differ from one another in the tone of their common coloration to a sufficient extent to enable us to recognise them at once with ease; another very good mark of distinction is furnished, however, by the measurements of the great flight-feathers, which substantially are as follows: --*S. sibilatrix*.--The second flight-feather longer than the fifth; the third and fourth constitute the tip of the wing. *S. bonellii*.--Second flight-feather of the same length as the sixth; the third, fourth, .
