Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the "Father of History", and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his "inquiry", being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the "Muse of History", Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

Flavia and her friends are on a quest for

the Emperor Titus - to steal a valuable gemstone known as 'Nero's Eye'. The Delphic Oracle prophesied that whoever owns the gem will rule Rome - so Titus is determined to claim it for himself. Their travels take them across the Roman province of Mauretania, from Sabratha (in modern Libya) to Volubilis (Morocco). As they travel on a caravan across the desert they encounter slave-traders, pantomime actors and a wild animal stampede. The detectives must consider another quest: what has happened to Uncle Gaius? Meanwhile, Flavia faces some tough decisions about her future.

It is AD 79 and Mount Vesuvius has erupted, destroying Pompeii. Among the thousands of people huddled in refugee camps along the bay of Naples are Flavia Gemina and her friends, Jonathan the Jewish boy, Nubia the African slave-girl, and Lupus the mute beggar boy. When the friends discover that children are being kidnapped from the camps, they start to investigate and soon solve the mystery of the pirates of Pompeii. A terrifically exciting and dramatic story packed with superb historical detail.

The Idiot and the Odyssey Macmillan

A ragged stranger and the prospect of losing her family's fortune lead Flavia Gemina and her friends, Jonathan, Lupus, and Nubia to a seaside villa where possible danger and treasure are close at hand.

The Gladiators from Capua John Wiley & Sons

The ancient Greeks worshiped a complex group of deities, weaving their characters into timeless tales of love, heroism, and intrigue. Plays, poems, paintings, and sculptures commemorating these tales have survived for centuries. Even as world religions and scientific knowledge have evolved, bringing with them new beliefs and understanding of the world, the ancient Greek tales continue to provide a basic foundation for Western thought and sharp insight to the human psyche. Athena appeared in many Greek myths, having major roles in Homer's Iliad and Odyssey and in ancient plays dealing with justice and democracy. Born from Zeus' head, she was a contradictory figure in many ways. She was the goddess of war and a protector of civilization. She was capable of being a good friend to humans, yet she could also be fiercely vindictive and hand

out punishment to men and women alike without a second thought. Temples were raised to her throughout Greece-including the famous Parthenon. The city of Athens, a military power and cultural center, embodied the goddess for whom it was named. Book jacket.

Jonathan goes on a secret quest to Rome, and Flavia, Nubia and Lupus set out to find him. Their dangerous mission takes them to the Golden House of Nero where a deadly assassin is rumoured to be at work - and they learn what happened to Jonathan's family during the terrible destruction of Jerusalem nine years earlier.

*Glittering Images* Orion Children's Books  
This book offers insight into Greek conceptions of art, the artist, and artistic originality by examining artists' signatures in ancient Greece.

Greek Art and Archaeology BRILL

In Miletus, about 550 B.C., together with our world-picture cosmology was born. This book tells the story. In Part One the reader is introduced in the archaic world-picture of a flat earth with the cupola of the celestial vault onto which the celestial bodies are attached. One of the subjects treated in that context is the riddle of the tilted celestial axis. This part also contains an extensive chapter on archaic astronomical instruments. Part Two shows how Anaximander (610-547 B.C.) blew up this archaic world-picture and replaced it by a new one that is essentially still ours. He taught that the celestial bodies orbit at different distances and that the earth floats unsupported in space. This makes him the founding father of cosmology. Part Three discusses topics that completed the new picture described by Anaximander. Special attention is paid to the confrontation between Anaxagoras and Aristotle on the question whether the

earth is flat or spherical, and on the battle between Aristotle and Heraclides Ponticus on the question whether the universe is finite or infinite.
