Covering territory from

History of East Central
Europe since 1700
explores the origins and
evolution of modernity in
this turbulent region. This
book applies fresh critical
approaches to major
historical controversies
and debates, expanding
the study of a region that
has experienced
persistent and profound
change and yet has long

been dominated by
narrowly nationalist
interpretations. Written by
an international team of
contributors that reflects
the increasing
globalization and
pluralism of East Central
European studies,
chapters discuss key
themes such as economic
development, the
relationship between

religion and ethnicity, the intersection between culture and imperial, national, wartime, and revolutionary political agendas, migration, women's and gender history, ideologies and political movements, the legacy of communism, and the ways in which various states in East Central Europe deployed and were formed by the politics of memory and commemoration. This book uses new methodologies in order to fundamentally reshape perspectives on the

development of East Central Europe over the past three centuries. Transnational and comparative in approach, this volume presents the latest research on the social, cultural, political and economic history of modern East Central Europe, providing an analytical and comprehensive overview for all students of this region.

The Balkans and the Near

East share millennia of a joint history, which stretches from the settling of man to the 20th century. The task split between the various scholarly disciplines into the fields of Balkan studies and Near (Middle) East studies has resulted in dividing a shared history into various sub-histories. This book reunites these isolated histories, opening up completely new historical perspectives. (Series: Studies on South East Europe - Vol. 12) *Geschichte Südosteuropas*

This book focuses on the end of four centuries of Ottoman rule in Bosnia and Herzegovina in the 1870s. After an introduction to the region and the political zeitgeist of the late 1860s and early 1870s, it examines in detail the dramatic years beginning in the summer of 1875, when the outbreak of violent unrest in the eastern Herzegovinian region bordering Montenegro led to a massive refugee catastrophe. The study

traces the surprising further political and social dynamics to the summer and fall of 1878, when a Habsburg army finally invaded the Bosnian Vilayet and took control of the province - but only after months of fighting against massive local resistance throughout the province. This book cannot be viewed in isolation from larger political dynamics, which are also constantly present in this study as they unfolded. However, as this book attempts to show, it is hardly possible

to understand the often contradictory effects of these larger political dynamics without delving deeper into the complex local rationalities and constraints on the action of the actors involved in them. The End of Ottoman Rule in Bosnia will appeal to students, teachers, and researchers in late Ottoman and Bosnian history.

The long and elaborate past of the Ottoman Empire, encompassing a wide geographical area, presents a mosaic of knowledge and acquisition

of experience. Upon this complicated and plural nature, Ottoman history looks like a puzzle that requires a wealth of skills and approaches to decipher. The foremost step to achieve this sophisticated task is to go beyond the borders of formalistic narratives and gain a multiplicity of perspectives through collaborative studies. This book is one of the outputs of such cooperation toward a more comprehensive Ottoman historiography. The first part, entitled “Religious

Identities, Intercommunal Relations and Social Life”, focuses on the communal structure of the Ottoman society. In this part, the transformation of the multilingual, multi-ethnic, and multi-religious empire and of the world around it is discussed on the basis of changes in social and administrative structures. The second part, “Administration and Business in the Center or Periphery”, consists of the studies on the administrative instruments of the political and economic

reforms in the 19th century Ottoman world and the way these instruments reshaped market mechanisms. The third part, entitled "Personal Documents, Public Prints and Medical Approaches", contains articles on personal narratives, diaries, travel notes, and the Ottoman press. The final part, which discusses the military and geopolitical strategies that the Ottoman Empire followed throughout its journey from a principality to an empire, is entitled

"Warfare and Intelligence". In the book, a panorama of the empire's lifestyle is manifested, and the course of history is outlined from various perspectives. It analyses the story of the Ottomans based on various personal, communal, social, economic, and military affairs.

Three powerful empires - the Habsburg, the Ottoman and the Russian - spent the 18th and the

first third of the 19th centuries fighting each other for power and influence in the Balkans. This is not, however, the only significant aspect of the complicated history of the European Southeast. The intellectual and economic currents that turned the 18th century into a key event in human civilisation were refracted through the prism of Balkan regionalism. The 130 years between Karlowitz and Adrianople were able to steer the Southeast back onto the rails of a "Common

European History". The volume contains the proceedings of an international conference hosted by the Sofia University Faculty of History in October 2009.

Shortly before 5pm on Saturday 1 September 1928 Europe gained a

new kingdom and its only Muslin king: 32-year-old Zog I of Albania. Zog I was a crucial figure in modern Albanian history, creating - or attempting to create - national and cultural identity for a country that had known little stability or sense of identity since the middle ages. He was also the most unusual monarch of the 20th century, described by contemporaries as: "a despotic brigand"; "the modern Naploeon"; "Mussolini's lackey"; "the finest patriot"; "frankly a cad". This biography

shows Zog as the product of a unique time and place. People who live in secure, stable countries are invited to set aside their assumptions about European monarchy and meet a king who fired back at assassins and paid his bills with gold bars.

Living in the Ottoman Lands: Identities Administration and Warfare LIT Verlag

In the late spring of 1718 near the village of Pozarevac (German Passarowitz) in northern

Serbia, freshly conquered by Habsburg forces, three delegations representing the Holy Roman Emperor, Ottoman Sultan, and the Republic of Venice gathered to end the conflict that had begun three and a half years earlier. The fighting had spread throughout southeastern Europe, from Hungary to the southernmost tip of the Peloponnese. The peace redrew the map of the Balkans, extending the reach of Habsburg power, all but expelling Venice from the Greek mainland,

and laying the foundations for Ottoman revitalization during the Tulip period. In this volume, twenty specialists analyze the military background to and political context of the peace congress and treaty. They assess the immediate significance of the Peace of Passarowitz and its longer term influence on the society, demography, culture, and economy of central Europe.

The figure of the renegade - a European Christian or Jew who had converted to Islam and was now serving the Ottoman sultan - is omnipresent in all genres produced by those early modern Christian Europeans who wrote about the Ottoman Empire. As few contemporaries failed to remark, converts were disproportionately represented among those who governed, administered, and fought for the sultan. Unsurprisingly, therefore,

renegades have attracted considerable attention from historians of Europe as well as students of European literature. Until very recently, however, Ottomanists have been surprisingly silent on the presence of Christian-European converts in the Ottoman military-administrative elite. The Sultan's Renegades inserts these 'foreign' converts into the context of Ottoman elite life to reorient the discussion of these individuals away from the present focus on their exceptionality,

towards a qualified appreciation of their place in the Ottoman imperial enterprise and the Empire's relations with its neighbours in Christian Europe. Drawing heavily on Central European sources, this study highlights the deep political, religious, and cultural entanglements between the Ottoman Empire and Christian Europe beyond the Mediterranean Basin as the 'shared world' par excellence. The existence of such trans-imperial subjects is not only

symptomatic of the Empire's ability to attract and integrate people of a great diversity of backgrounds, it also illustrates the extent to which the Ottomans participated in processes of religious polarization usually considered typical of Christian Europe in this period. Nevertheless, Christian Europeans remained ambivalent about those they dismissed as apostates and traitors, frequently relying on them for support in the pursuit of familial and political

interests.

Does Transnational Mobilization Work for Language Minorities?
University of Chicago Press
This study scrutinizes the significance of transnational mobilization for language minorities, both with regard to their ability and their

motivation to undertake such action. It is designed as interpretative case study on Romanian minorities in the post-communist countries of Serbia, Bulgaria, Ukraine, and Hungary. The book concentrates on immobile and marginal groups outside the focus of international politics and research. It contributes to recent research on cosmopolitanism: only an in-depth study of actors' everyday reality can produce qualified claims on the tense relationship between local rootedness

on the one hand and possibilities for international mobility on the other. This, in turn, is vital to assess the vigor of international processes such as globalization and European integration. (Series: Region - Nation - Europa - Vol. 75) [Subject: Sociology, European Studies, Minority Studies]

 Continuing the tradition of historiographic studies, this volume provides an update on research in Reformation and early

modern Europe. Written by expert scholars in the field, these eighteen essays explore the fundamental points of Reformation and early modern history in religious studies, European regional studies, and social and cultural studies. Authors review the present state of research in the field, new trends, key issues scholars are working with, and fundamental works in their subject area, including the wide range of electronic resources now available to

researchers. Reformation and Early Modern Europe: A Guide to Research is a valuable resource for students and scholars of early modern Europe.

The volume investigates flows of knowledge that transcended social, cultural, linguistic and political boundaries. Dealing with different sources such as dictionaries, early printed books, political advice literature, and modern periodicals, the case studies in this anthology

cover a time frame from the 15th to the early 20th century. Being concerned with a wide variety of geographical areas, including the Ottoman capital Istanbul, provincial settings like Ottoman Palestine, and also Egypt, Bosnia, Crimea, the Persian realm and Poland-Lithuania, this volume gives transepochal and transregional insights in the production, transmission, and translation of knowledge. In so doing it contributes to current debates in transcultural studies,

global history, and the history of knowledge. *Die rumänisch-jüdische Frage* Springer Nature
In this sequel to *Political Radicalism in Late Imperial Vienna*, John Boyer picks up the history of the Christian Social movement after founder Karl Lueger's rise to power in Vienna in 1897 and traces its evolution from a group of disparate ward politicians, through its maturation into the largest single party in the Austrian parliament by 1907, to its major role in Imperial politics during

the First World War. Boyer argues that understanding the unprecedented success that this dissident bourgeois political group had in transforming the basic tenets of political life is crucial to understanding the history of the Central European state and the ways in which it was slowly undermined by popular electoral politics. The movement's efforts to save the Austrian Empire by trying to create an economically integrated but ethnically pluralistic state are particularly

enlightening today in the shadow of ethnic violence in Sarajevo, where began the end of the Austrian Empire in 1914. The most comprehensive account of any mass political movement in late-nineteenth century Central Europe, this two-volume work is crucial reading for anyone interested in Hapsburg history, German history or the history of social democracy.

Dass Liberalismus und jüdische Gleichstellung im 19. Jahrhundert Hand in Hand gingen, kann fast schon als Allgemeinposten europäisch-jüdischer Geschichtsschreibung bezeichnet werden.
