"John Green fans will appreciate this tale." —USA Today "[A]

humorous, deeply human coming-of-age story." —The

Washington Post Scott Ferdowsi has a track record of quitting. His best friends know exactly what they want to do with the rest of their lives, but Scott can hardly commit to a breakfast cereal, let alone a passion. With college applications looming and his parents pushing him to settle on a “practical” career, Scott sneaks off to Washington, DC, seeking guidance from a famous psychologist who claims to know the secret to success. He never expects an adventure to unfold. But that’s what Scott gets when he meets Fiora Buchanan, a ballsy college student whose life ambition is to write crossword puzzles. When the bicycle she lends him gets Scott into a high-speed chase, he knows he’s in for the ride of his life. Soon, Scott finds himself sneaking into bars, attempting to pick up girls at the National Zoo, and even giving the crossword thing a try—all while opening his eyes to fundamental truths about who he is and who he wants to be.

**Word Searches & Crossword Puzzles** Chartwell

A coloring book to familiarize the user with the Primary elements in the Periodic Table. The Periodic Table Coloring Book (PTCB) was received worldwide with acclaim. It is based on solid, proven concepts. By creating a foundation that is applicable to all science ("Oh yes, Hydrogen, I remember coloring it, part of water, it is also used as a fuel; I wonder how I could apply this to the vehicle engine I am studying...") and creating enjoyable memories associated with the elements science becomes accepted. These students will be interested in chemistry, engineering and other technical areas and will understand why those are important because they have colored those elements and what those elements do in a non-threatening environment earlier in life.

*Until the End of Time* Penguin

Take students in grades 5 and up on a field trip without leaving

the classroom using World Geography Puzzles! In this 80-page book, students explore the five themes of geography and the world continents with crosswords, word searches, word scrambles, decoding, hidden messages, and last letter/first letter puzzles. The activities reinforce vocabulary and concepts of location, human-environment interaction, movement, and regions. Activities for each continent highlight cities, physical features, cultures, and ideas.

A spectacular musical and scientific journey from the Bronx to the cosmic horizon that reveals the astonishing links between jazz, science, Einstein, and Coltrane More than fifty years ago, John Coltrane drew the twelve musical notes in a circle and connected them by straight lines, forming a five-pointed star. Inspired by Einstein, Coltrane put physics and geometry at the core of his music. Physicist and jazz musician Stephon Alexander follows suit, using jazz to answer physics' most vexing questions about the past and future of the universe. Following the great minds that first drew the links between music and physics—a list including Pythagoras, Kepler, Newton, Einstein, and Rakim — The Jazz of Physics reveals that the ancient poetic idea of the "Music of the Spheres," taken seriously, clarifies confounding issues in physics. The Jazz of Physics will fascinate and inspire anyone interested in the mysteries of our universe, music, and life itself.

*The Science Teacher* Routledge

A journalist and word aficionado salutes the 100-year history and pleasures of crossword puzzles Since its debut in The New York World on December 21, 1913, the crossword puzzle has enjoyed a rich and surprisingly lively existence. Alan Connor, a comic writer known for his exploration of all things crossword in The Guardian, covers every twist and turn: from the 1920s, when crosswords were considered a menace to productive society; to World War II, when they were used to recruit code breakers; to their starring role in a 2008 episode of The Simpsons. He also profiles the colorful characters who make up the interesting and bizarre subculture of crossword constructors and competitive solvers, including Will Shortz, the iconic New York Times puzzle editor who created a crafty crossword that appeared to predict the outcome of a presidential election, and the legions of competitive puzzle solvers who descend on a Connecticut hotel each year in an

attempt to be crowned the American puzzle-solving champion. At a time when the printed word is in decline, Connor marvels at the crossword's seamless transition onto Kindles and iPads, keeping the puzzle one of America's favorite pastimes. He also explores the way the human brain processes crosswords versus computers that are largely stumped by clues that require wordplay or a simple grasp of humor. A fascinating examination of our most beloved linguistic amusement—and filled with tantalizing crosswords and clues embedded in the text—The Crossword Century is sure to attract the attention of the readers who made Word Freak and Just My Type bestsellers.
