The Study of the Miracles Simon and Schuster

This book has number of multiplication facts for daily practice by students. Each page has one set consisting of 50 problems. It is recommended for students to attempt 1 set daily for consistent practice. Book starts with times table charts for easy reference followed by some quick multiplication facts. Once students start gaining confidence in individual facts, they can attempt mixed facts. Book can be used to track practice time for each set. Date and time can be recorded at top of each page. Answer to each problem is given at the end of the book. Knowing multiplication facts is helpful not only in academics; we frequently use multiplication in our daily lives too. Just like learning to walk before you can run, learning multiplication and familiarizing yourself with numbers are building blocks for other math topics taught in school - such as division, long multiplication, fractions and algebra. Mastering the basic math facts develops automaticity in kids. Automaticity is the ability to do things without occupying the mind with the low level details that are

required; this is usually the result of consistent learning, repetition, and practice. For instance, an experienced cyclist does not have to concentrate on turning the pedals, balancing, and holding on to the handlebars. Instead, those processes are automatic and the cyclist can concentrate on watching the road, the traffic, and other surroundings. Until students have developed sufficient sensory-cognitive tools supporting access to symbolic memory, they will not be able to image, store or retrieve all of the basic facts with automaticity. Therefore, students need a comprehensive, developmental, and multi-sensory structured system for developing automaticity with the facts.

Shelly White, a small-town girl from Georgia, has her life forever changed when she is diagnosed with cancer at the age of 8. Her miraculous recovery from a malignant tumor at St. Theresa's Children's Hospital in Atlanta, and watching her roommate die, puts her on a path to wipe out cancer in her lifetime so no one else has to suffer. Her only true love as she grows up is the children she now calls her patients, until a chance meeting with a local advertising executive, Nick Harris, blossoms. With a savvy marketing campaign, together they find out there is one man who may have the formula to eradicate the disease. But time is running out. The elderly man is in hiding as he knows his life is in danger. His secret could put thousands of people out of work and destroy the riches of many pharmaceutical companies. Shelly and Nick will need to go all the way to the top for favors if they are ever to find the elderly man--and the cure for cancer. Author Mark Spinicelli and ghostwriter Kevin Fritz bring real-life experiences and emotions into the body of this novel, as cancer has sadly taken the lives of many of their family members. Mark lost his sister, Kristin, who was much too young, and Kevin has lost his father, aunt, uncle and grandmother to the disease. *Catching A Miracle* was created to offer hope to those who are afflicted with this disease, as well as those who endure watching the pain and suffering, and eventually the life slipping away from their loved ones. The notion of giving hope that a cure is out there is not far-fetched, which could turn this fictional read into reality. A report in 2011 claimed scientists at the University of Alberta, in Edmonton, Canada, discovered the cure, but it has yet to materialize. Israeli scientists have found rat cells secrete a substance that destroys cancer cells in humans. There is hope, and they can see the light.
