Applied Accounting is tailored to meet the needs of students taking a first year course in Financial accounting as part of a Diploma in Accounting or a National Diploma (Accounting) both in terms of the curriculum covered and in terms of the approach toward teaching and learning. The book is suitable even for students who may not have taken Accounting at Grade 12 level as it bridges the gap between school and the first level of tertiary study. The book does this by referencing prior knowledge covered at school level and by scaffolding the level of conceptual engagement. Furthermore, students are exposed to every day financial objects or transactions such as what a cheque is, or how internet banking works and understanding is supported through the use of photographs, source documents and links to video clips and audio clips as well as instructions on practical activities. Language is pitched at a level accessible to first-year students, starting simply and progressively introducing students to the appropriate-level of Accounting discourse. Explanations are given in a step-by-step manner and explain to students why they are doing what they are doing. The text immediately highlights the

key take-home points for the student. The text is extremely practical with plenty of exercises for students to practise, either alone in in pair work and group work encouraging interactive learning. In-text diagrams and tables further clarify concepts while online assessments provide further reinforcement of concepts. Applied Accounting also aims to inculcate a sense work readiness and work ethics by teaching basic Life skills and how to self-manage.

BTEC Level 3 National Health and Social Care: Student Hachette UK

This unique collection of papers, from authors whose experience and nationalities are themselves diverse, captures intellectual and personal reflections on diversity. The authors offer unique perspectives into diversity on an individual level, as well as the experiential challenges of implementing diversity programs at the country, public sector, company and civil society levels. In doing so, the book identifies a variety of elements that define 'a multi-faceted reality' that is at once contradictory, deeply

personal, artistic, emotionally evocative and intellectually stimulating.

Insurance Planning and Risk Management Level 3 BTEC National Public Service

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
