EMQs for the PLAB
Radcliffe Publishing
EMQs are a popular
method of assessing
how broad a
knowledge of medicine
an undergraduate has
acquired. They can,
however, be difficult to
prepare for, and the

best way to build
understanding and
confidence is with
practice. Presenting
100 key EMQs covering
the core areas of
medicine and surgery,
care had been taken
by the authors to
structure the questions
and answers so that
they reflect accurately
the themes
unencountered during
study and, specifically,
in final exams. Each

subject covered is accompanied by a revision section which summarises key points and cross references them to other questions for revision purposes. Questions related to pharmacology, an area which many students find particularly challenging, are threaded throughout the book where relevant, mirroring the integrated teaching methods common to most medical schools. The second edition of EMQs in Clinical Medicine has been thoroughly revised and updated to reflect medical developments, while retaining the clear and comprehensive approach and popular revision boxes of its predecessor. The authors' first-hand

experience of EMQ-based examinations, and awareness of the importance of reliable and accurate revision guides to medical students, ensure EMQs in Clinical Medicine remains an invaluable resource for all medical students undertaking the clinical part of their training, and an ideal companion during finals preparation.

MCQs in Neurology and Neurosurgery for Medical Students

Science Pub

Incorporated

This well-established, thoroughly updated Australian medical title is a collection of patient education sheets on common medical conditions written in simple non-technical language. This new edition contains 40 to 50 new conditions covering

such topical issues as meningococcus and anthrax.

Emergency Medicine

W.B. Saunders
Company

This pocket book should be useful to candidates studying for their PLAB Part 1 examination. It includes one complete practice exam, 200 EMQ items, detailed answers and teaching notes, and a revision index.

Get ahead! Specialties: 100 EMQs for Finals

CRC Press

This pack brings together two essential texts in emergency medicine. The 'Oxford Handbook of Emergency Medicine' provides prescriptive and precise guidelines for emergency medical practice, while 'Oxford Assess and Progress: Emergency Medicine'

contains over 250 questions covering all the core areas of the specialty.

Clinical Surgery CRC
Press

Blackwell's Clinical Surgery has established itself as an excellent indispensable resource for undergraduate medical students and house officers. The first edition was Awarded 1997 BMA Certificate of Commendation.

Written by an outstanding team of editors and expert contributors, the new updated and revised edition has been designed as a complete learning guide. Unlike competing titles, *Clinical Surgery* covers the following all in one book! Symptoms and signs of surgical disease Diagnosis and

investigations
Treatment and
procedures The book is

second edition of
Clinical Surgery is
perfect for
undergraduate and
junior doctors alike as
well as other health
professionals who need
a comprehensive
account of surgery in
all the major medical
specialities. With a
strong emphasis on
clinical practice and
the necessary
knowledge and skills,
this is a must-buy for
anyone going on a
surgical rotation.
Clinical Surgery is
intended to teach you
everything you need to

know about surgery at the start of your career. Pre-publication quotes "I do not think it is an understatement to say that it is a revolutionary book. It is obviously written with integrated courses very much in mind and manages to integrate the basic sciences with clinical information very well.... Maybe above all things, this is a very practically orientated book and really attempts to mould the medical student in to a very good house officer."

MCQs

MRCPC Clinical

Twayne Publishers

This book is an essential purchase for all candidates sitting Part 1 of the PLAB exam administered by the UK General Medical Council. All doctors from non-EC countries who wish to practice in UK must sit the PLAB exam which comprises 200 Extended Matching Questions (EMQs). This book contains 1000 practice EMQs of a similar type to those in the exam.

The questions cover all aspects of the new syllabus, which not only includes a range of clinical topics but also requires knowledge of the GMC's Duties of a Doctor, principles and

practice of evidence-based medicine, and clinical governance. Recommended to all candidates sitting the new PLAB test.
