ECDL 5.0, European Computer Driving Licence Payne Gallway

"" "" Preface This book is intended to help you successfully complete the test for Module 2 of the European Computer Driving Licence (ECDL). However before we start working through the actual content of the guide you may find it useful to know a little bit more about the ECDL in general and where this particular Module fits into the overall framework. What Is The ECDL? The European Computer Driving Licence (ECDL) is a European-wide qualification that enables people to demonstrate their competence in computer skills. It certifies the candidate's knowledge and competence in personal computer usage at a basic level and is based upon a single agreed syllabus. This syllabus covers a range of specific knowledge areas and skill sets, which are broken down into seven modules. Each of the modules must be passed before the ECDL certificate can be awarded, though they may be taken in any order but must be completed within a three year period. Testing of candidates is at audited testing centres, and successful completion of the test will demonstrate the holder's basic knowledge and competence in using a personal computer and common computer applications. The implementation of the ECDL in the UK is being managed by the British Computer Society. It is growing at a tremendous rate and is set to become the most widely recognised qualification in the field of work-related computer use.

Covers all modules of the ECDL qualification and all of the underpinning knowledge your students need to complete their assessment. Screenshots and illustrations using Office 2003 bring the theory to life, making learning easy. Skills practice throughout helps students consolidate what they have learnt. Practice material at the end of each module prepares students for the ECDL assessment. A CD-ROM with the book contains recalled text to save keying-in time, and answers to the exercises in the books.

ECDL® 5.0 Ecdl 5.0 (European Computer Driving Licence). Module 2, It User Fundamentals Using Windows 7

The European Computer Driving Licence (ECDL) is a European-wide qualification that enables you to demonstrate your competence in computer skills. It covers a range of specific knowledge areas and skill

sets, broken down into seven modules. Module 7: Information and Communication is divided into two main sections. The first covers basic Web search tasks using a Web browser and search engine tools. The second addresses the use of electronic mail software to send and receive messages, to attach documents, and to organise and manage message folders and directories. This study guide covers all the knowledge areas and skills required to understand and pass Module 7 of the ECDL syllabus. Throughout we have used clear, jargon free, self-paced exercises to provide you with an understanding of all the key elements to prepare you for the ECDL Test.
