In 1991, Anne
Applebaum,
Pulitzer Prize-
winning

author of
Gulag, Iron
Curtain and
Red Famine,
took a three-
month road
trip through
the
borderlands
between the
fallen Soviet
Union and
Europe—lands
that became

Ukraine,
Belarus,
Lithuania and
Moldova. In
her iconic
reportage,
which has
become
indispensable
history, she
captures the
harrowing
story of a
region that is

once again threatened by Russia. An extraordinary journey into the past and present of the lands east of Poland and west of Russia—an area defined throughout its history by colliding empires. Traveling from the former Soviet naval center of Kaliningrad on the Baltic to the Black Sea port of Odessa, Anne Applebaum encounters a rich range of competing cultures, religions, and national

aspirations. In reasserting their heritage, the inhabitants of the borderlands attempt to build a future grounded in their fractured ancestral legacies. In the process, neighbors unearth old conflicts, devote themselves to recovering lost culture, and piece together competing legends to create a new tradition. Rich in surprising encounters and vivid characters, *Between East*

and *West* brilliantly illuminates the soul of the borderlands and the shaping power of the past. *The Pursuit of Italy* Cambridge University Press The final chapter in the Penguin History of Europe series from the acclaimed scholar and author of *To Hell and Back* After the overwhelming horrors of the first half of the twentieth century, described by Ian Kershaw in his previous

book as being 'to Hell and back,' the years from 1950 to 2017 brought peace and relative prosperity to most of Europe. Enormous economic improvements transformed the continent. The catastrophic era of the world wars receded into an ever more distant past, though its long shadow continued to shape mentalities. Yet Europe was now a divided continent, living under

the nuclear threat in a period intermittently fraught with anxiety. There were, by most definitions, striking successes: the Soviet bloc melted away, dictatorships vanished, and Germany was successfully reunited. But accelerating globalization brought new fragilities. The interlocking crises after 2008 were the clearest warnings to Europeans that there was no guarantee of peace and stability, and, even today,

the continent threatens further fracturing. In this remarkable book, Ian Kershaw has created a grand panorama of the world we live in and where it came from. Drawing on examples from all across Europe, *The Global Age* is an endlessly fascinating portrait of the recent past and present, and a cautious look into our future. [In Pursuit of Liberalism](#)

An unprecedented history of our involvement in the Middle East that traces our current quandaries there-in Iraq, Israel, Iran, Afghanistan, and elsewhere-back to their roots almost a century ago. Geoffrey Wawro approaches America's role in the Middle East in a fundamentally new way-by encompassing the last century of the entire region, rather than focusing

narrowly on a particular country or era. The result is a definitive and revelatory history whose drama, tragedy, and rich irony he relates with unprecedented verve. Wawro combed archives in the United States and Europe and traveled the Middle East to unearth new insights into the hidden motivations, backroom dealing, and outright espionage that shaped some of the most

tumultuous events of the last one hundred years. Wawro offers piercing analysis of iconic events from the birth of Israel to the death of Sadat, from the Suez crisis to the energy crisis, from the Six-Day War to Desert One, from Iran-contra to the wars in Iraq and Afghanistan and the rise of al-Qaeda. Throughout, he draws telling parallels between America's past mistakes and its current

quandaries, proving that we're in today's muddle not just because of our old errors, but because we keep repeating those errors. America has juggled multiple commitments and conflicting priorities in the Middle East for nearly a century. Strands of idealism and ruthless practicality have alternated- and sometimes run together- in our policy. Quicksand

untangles these strands as no history has done before by showing how our strategies unfolded over the entire century and across the entire region. We've persistently misread the intentions and motivations of every major player in the region because we've insisted on viewing them through the lens of our own culture, hopes, and fears. Most administrations since Eisenhower's have adopted

their own "doctrine" for the Middle East, and almost every doctrine has failed precisely because it's a doctrine-a template into which events on the ground refuse to fit. Geoffrey Wawro's peerless and remarkably lively history is key to understanding our errors and the Middle East-at last- on its own terms.

Pursuit of Power Belonging is a not a state that we achieve, but a struggle that we wage. The struggle for belonging is more difficult if one is returning to a homeland after many years abroad. In Pursuit of Belonging is an ethnography of Turkish migrants' struggle for understanding , intimacy and appreciation when they return from Germany to their Turkish homeland. Drawing on an

established tradition of life story writing in anthropology, Rottmann conveys the struggle to forge an ethical life by relating the experiences of a second-generation German-Turkish woman named Leyla. **Power and the Pursuit of Peace: Theory and Practice in the History of Relations Between States** Penguin UK Mark Greengrass's gripping, major, original

account of Europe in an era of tumultuous change This latest addition to the landmark Penguin History of Europe series is a fascinating study of 16th and 17th century Europe and the fundamental changes which led to the collapse of Christendom and established the geographical and political frameworks of Western Europe as we know it. From

peasants to princes, no one was untouched by the spiritual and intellectual upheaval of this era. Martin Luther's challenge to church authority forced Christians to examine their beliefs in ways that shook the foundations of their religion. The subsequent divisions, fed by dynastic rivalries and military changes, fundamentally altered the relations between ruler

and ruled. Geographical and scientific discoveries challenged the unity of Christendom as a belief-community. Europe, with all its divisions, emerged instead as a geographical projection. It was reflected in the mirror of America, and refracted by the eclipse of Crusade in ambiguous relationships with the Ottomans and Orthodox Christianity. Chronicling these dramatic changes,

Thomas More, Shakespeare, Montaigne and Cervantes created works which continue to resonate with us. Christendom Destroyed is a rich tapestry that fosters a deeper understanding of Europe's identity today. *The Coming of the Third Reich* University of Chicago Press Seventy years after its demise, historian Richard J. Evans charts the ways our understanding of the Third Reich has

Power Europe

Oxford University Press, USA
To all thoughtful people World War I has brought to attention the importance of a knowledge of 19th Century European history. For without such knowledge no one can understand, or begin to understand, the significance of the forces that have made it, the vastness of the issues involved, the nature of what is indisputably

one of the gravest crises in the history of mankind. No citizen of a free country who takes his citizenship seriously, who considers himself responsible, to the full extent of his personal influence, for the character and conduct of his government, can, without the crudest self-stultification, admit that he knows nothing and cares nothing about the history of Europe. military, technological, and social history, William H. McNeill explores a whole millennium of human upheaval and traces the path by which we have arrived at the frightening dilemmas that now confront us. McNeill moves with equal mastery from the crossbow—banned by the Church in 1139 as too lethal for Christians to use against one another—to the nuclear

missile, from the sociological consequences of drill in the seventeenth century to the emergence of the military-industrial complex in the twentieth. His central argument is that a commercial transformation of world society in the eleventh century caused military activity to respond increasingly to market forces as well as to the commands of rulers. Only in our own time,

suggests McNeill, are command economies replacing the market control of large-scale human effort. *The Pursuit of Power* does not solve the problems of the present, but its discoveries, hypotheses, and sheer breadth of learning do offer a perspective on our current fears and, as McNeill hopes, "a ground for wiser action." <p>Description</p> <p>Eric Hobsbawm</p> <p>Penguin</p> <p>The idea that with the decline of the Roman Empire Europe entered into some immense 'dark age' has long been viewed as inadequate by many historians. How could a world still so profoundly shaped by Rome and which encompassed such remarkable societies as the Byzantine, Carolingian and Ottonian empires, be</p>	<p>anything other than central to the development of European history? How could a world of so many peoples, whether expanding, moving or stable, of Goths, Franks, Vandals, Byzantines, Arabs, Anglo-Saxons, Vikings, whose genetic and linguistic inheritors we all are, not lie at the heart of how we understand ourselves? The Inheritance of Rome is a work of remarkable</p>	<p>scope and ambition. Drawing on a wealth of new material, it is a book which will transform its many readers' ideas about the crucible in which Europe would in the end be created. From the collapse of the Roman imperial system to the establishment of the new European dynastic states, perhaps this book's most striking achievement is to make sense of an immensely long period of</p>

time, experienced by many generations of Europeans, and which, while it certainly included catastrophic invasions and turbulence, also contained long periods of continuity and achievement. From Ireland to Constantinople, from the Baltic to the Mediterranean, this is a genuinely Europe-wide history of a new kind, with something surprising or arresting on every page.

Providing a continent-wide history, this major survey covers the key political events of this turbulent period. Jonathan Sperber also looks at lives of ordinary people and considers broad social and economic developments. In particular he examines the relationships between the different revolutionary movements, showing how the French Revolution of

1789 set patterns which recurred over the following sixty years.
The Global Age
Routledge
Though the fall of the Soviet Union opened the way for states in central and eastern Europe to join the world of market-oriented Western democracies, the expected transitions have not been as easy, common, or smooth as sometimes perceived. Rachel A. Epstein investigates

how liberal ideas and practices are embedded in transitioning societies and finds that success or failure depends largely on creating a social context in which incentives held out by international institutions are viewed as symbols of an emerging Western identity in the affected country. Epstein first explains how a liberal worldview and institutions like the European

Union, World Bank, the International Monetary Fund, and the North Atlantic Treaty Organization go hand-in-hand and why Western nations assume that a broad and incremental program of incentives to join will encourage formerly authoritarian states to reform their political and economic systems. Using Hungary, Poland, Romania, and the Ukraine as case studies,

she demonstrates the limits of conditionality in the face of national social perceptions and elucidates the three key points around which a consensus within the state must emerge before international institutions can expect liberalization: domestic officials must be uncertain about how changing policies will affect their interests; the status of international and domestic institutions must not be in

jeopardy; and the proposed polices must seem credible. In making her case, Epstein cleverly bridges the gap between the rationalist and constructivist schools of thought. Offering new data on and fresh interpretations of reforming central bank policies, privatizing banks with foreign capital, democratizing civil-military relations, and denationalizing defense policy, In Pursuit of

Liberalism extends well beyond the scope of previous book-length studies. *The Hitler Conspiracies* Berghahn Books How states cooperate in the absence of a sovereign power is a perennial question in international relations. With *Power in Concert*, Jennifer Mitzen argues that global governance is more than just the cooperation of states under anarchy: it is the formation and

maintenance of collective intentions, or joint commitments among states to address problems together. The key mechanism through which these intentions are sustained is face-to-face diplomacy, which keeps states' obligations to one another salient and helps them solve problems on a day-to-day basis. Mitzen argues that the origins of this practice lie in the Concert of

Europe, an informal agreement among five European states in the wake of the Napoleonic wars to reduce the possibility of recurrence, which first institutionalized the practice of jointly managing the balance of power. Through the Concert's many successes, she shows that the words and actions of state leaders in public forums contributed to collective self-restraint and a

commitment to problem solving—and at a time when communication was considerably more difficult than it is today. Despite the Concert's eventual breakdown, the practice it introduced—of face to face diplomacy as a mode of joint problem solving—survived and is the basis of global governance today.

Ever since the Industrial

Revolution energy has been a key driver of world politics. From the oil crises of the 1970s to today's rapid expansion of renewable energy sources, every shift in global energy patterns has important repercussions for international relations. In this new book, Thijs Van de Graaf and Benjamin Sovacool uncover the intricate ways in which our energy systems have shaped global

outcomes in four key areas of world politics: security, the economy, the environment and global justice. Moving beyond the narrow geopolitical focus that has dominated much of the discussion on global energy politics, they also deftly trace the connections between energy, environmental politics, and community activism. The authors argue that we are on the cusp of a global energy

shift that promises to be no less transformative for the pursuit of wealth and power in world politics than the historical shifts from wood to coal and from coal to oil. This ongoing energy transformation will not only upend the global balance of power; it could also fundamentally transfer political authority away from the nation state, empowering citizens, regions and local communities.

Global Energy Politics will be an essential resource for students of the social sciences grappling with the major energy issues of our times.

In Pursuit of Belonging

Macmillan + ORM

A bullet misses its target in Sarajevo, a would-be Austrian painter gets into the Viennese academy, Lord Halifax becomes British prime minister in 1940: seemingly minor twists of

fate on which world-shaking events might have hinged. Alternative history has long been the stuff of parlour games, war-gaming and science fiction, but over the past few decades it has become a popular stomping ground for serious historians. Richard J. Evans now turns a critical, slightly jaundiced eye on the subject. *Altered Pasts* examines the intellectual fallout from

historical counterfactuals. Most importantly, Evans takes counterfactual history seriously, looking at the insights, pitfalls and intellectual implications of changing one thread in the weave of history. *The Pursuit of Glory* Sourcebooks, Inc. With a lucid and clear narrative style William Chester Jordan has turned his considerable talents to composing a standard textbook of

the opening centuries of the second millennium in Europe. He brings this period of dramatic social, political, economic, cultural, religious and military change, alive to the general reader. Jordan presents the early Medieval period as a lost world, far removed from our current age, which had risen from the smoking rubble of the Roman Empire, but from which we are cut off by the great

plagues and famines that ended it. Broad in scope, punctuated with impressive detail, and highly accessible, Jordan's book is set to occupy a central place in university courses of the medieval period. Scientific Cosmology and International Orders Crown In the last years of the nineteenth century peace proposals were first stimulated by fear of the

danger of war rather than in consequence of its outbreak. In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men's efforts to avoid it. In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting. This

enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes. He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau, Kant and Bentham, but also against what we have learned about the nature of international relations and the history of the practice of states. This leads him to

the second part of his study - an analysis of the origins of the modern states' system and of its evolution between the eighteenth century and the First World War.
