Science, War and Imperialism EduGorilla Community Pvt. Ltd. Why could not the Second World War catalyse science in India as it did in the West? This is one of the central questions of this volume on the British policy towards science and technology in India. Its focus is on education, research, innovation and organisation of science in such sectors as industry, agriculture, public health and transport and communications. In the process the author comes across revealing developments where science played a crucial role: an Anglo-American tussle for dominance in the region, the clash between capitalism and socialism, and the entry of neo-colonialism triggering Cold War in Asia. Many faces of humanity and science are on view --- British scientists concerned about India's development, and Indian scientists planning for national reconstruction. Of interest to all those aiming for a better understanding of the impact of science, war and international influences on the socio-economic progress in India - or other erstwhile colonies.

Introduction to Clinical Nutrition, Third Edition CRC Press
In a sensitive and compelling account of the lives of those at the very bottom of Indian society, Oliver Mendelsohn and Marika Vicziany explore the construction of the Untouchables as a social and political category, the historical background which led to such a definition, and their position in India today. The authors argue that, despite efforts to ameliorate their condition on the part of the state, a considerable edifice of discrimination persists on the basis of a tradition of ritual subordination. Even now, therefore, it still makes sense to categorise these people as ‘Untouchables’. The book promises to make a major contribution to the social and economic debates on poverty, while its wide-ranging perspectives will ensure an interdisciplinary readership from historians of South Asia, to students of politics, economics, religion and sociology.

 "This book describes the transition in Indian healthcare system since independence and contributes to the ongoing debate within development and institutional economics on the approaches towards reform in the public health system. The institutional reform perspective focuses on examining the effective utilisation of allotted resources and improvements in delivery through decentralisation in governance by ensuring higher participation of elected governments and local communities in politics, policymaking and delivery of health services. It discusses the economic (resource) reforms to explain the relevance and expansion of state interventionism along with its influence on the health sector, accountability and allocative efficiency. The author also explores the connections between neoliberal thought and

privatisation in health sector, and examines the greater role of insurance-based financing and their implications for health service access and delivery. The book offers ways to address long-standing systemic and structural problems that confront the Indian healthcare system. Based on large-scale surveys and diverse empirical data on the Indian economy, this book will be of great interest to researchers, students and teachers of health economics, governance and institutional economics, political economy, sociology, public policy, regional studies and development studies. This will be useful to policymakers, health economists, social scientists, public health experts and professionals, and government and nongovernment institutions"--

The test of whether the UK should continue to give aid to India is whether that aid makes a distinctive contribution to poverty reduction. The Government of India has primary responsibility for this and has already reduced poverty levels from 60 percent in 1981 to 42 percent in 2005. But whilst the economy is growing there are large pockets of poverty that still remain. The DFID plans to change some of its programme, focusing primarily on three of the poorest states, Bihar, Madhya Pradesh and Orissa, also changing the sectors it prioritises and putting 50 percent of its budget through the private sector by 2015. The Committee supports the focus on the poorest states but provided it is supported by the Government of India. They recommend supporting in particular sanitation, malnutrition, maternal and child health and social exclusion. The Committee supports the Government's aim to forge a new enhanced partnership with India with its mutual benefits from cooperation in trade and investment but the DFID must ensure UK Government policies help protect the poorest and reduce inequalities. The Committee assuming that over the next four years as India continues to grow at current rates it will have increased its capacity to tackle poverty and meet the millennium development goals. DFID should continue to provide technical assistance where requested but the funding mechanism should change by 2015.
