 Heart of Darkness is often considered the world's best short novel. The book serves as a bridge between the 19th century and modernism, an adventure tale revolving around the ambiguity of themes such as truth, morality, and evil. Joseph Conrad witnessed the European exploitation of the Congo with his own eyes. He once sailed up the Congo River himself to locate a countryman at a trading station deep within the country – even though this man wasn't named Kurtz. The goal and enigma of the journey have become synonymous with this name, one of the most unforgettable fictional characters of our time. JOSEPH CONRAD [1857–1924] was born in Ukraine to Polish parents, went to sea at the age of seventeen, and ended his career as a captain in the English merchant navy. His most famous work is the novella Heart of Darkness [1899], adapted into a film by Francis Ford Coppola in 1979 as Apocalypse Now.

 The excitement of learning economics for the first time. The experience of a lifetime of teaching it. The Eighth Edition of Exploring Microeconomics captures the excitement of learning microeconomics for the first time through a lively and encouraging narrative that connects microeconomics to the world in a way that is familiar to readers. Author Robert L. Sexton draws on over 25 years of teaching experience to capture readers' attention, focusing on core concepts and expertly weaving in examples from current events and popular culture to make even classic economic principles modern and relatable. The text sticks to the basics and applies a thoughtful learning design, segmenting its presentation into brief, visually appealing, self-contained sections that are easier for readers to digest and retain compared to sprawling text. Thoughtfully placed section quizzes, interactive summaries, and problem sets help readers check their comprehension at regular intervals and develop the critical thinking skills that will allow them to "think like economists." Exploring Microeconomics will ignite readers' passion for the field and reveal its practical application in the world around them.
