ExploreLearning Flashcards | Quizletpith ball, the pith ball was attracted to the strip. (a) After the pith ball was allowed to touch the strip, the pith ball was repelled by the strip. (b) This happens because when the charged strip touches theElectrostatics 1 Lab - AnswersImmediately, some of the magical property (i.e. some of the electric charge) of the rod is transferred to the pith ball, and we observe that thereafter the ball is strongly repelled from the rod. We conclude that two electric charges repel each other.1.3: Experiments with Pith Balls - Physics LibreTextsTwo charged pith balls are suspended on very light 20 cm strings. Each has a mass of 10 g. In equilibrium, the total angle between the strings is 50° . Draw a free-body diagram of one of the pith balls and clearly label all forces with magnitude and direction.

Two charged pith balls are suspended on very light 20 cm strings. Each has a mass of 10 g. In equilibrium, the total angle between the strings is 50° . Draw a free-body diagram of one of the pith balls and clearly label all forces with magnitude and direction.
