Women, booze, illegitimate children, fraud, bigamy, 19th-century capitalism, and the emergence of an empire These words describe the life of Isaac Merritt Singer. Although widely regarded as the inventor of the sewing machine, Singer actually modified an existing machine and marketed it to an America eager for the new tools of the Machine Age. His genius was in the advertising, service with a smile, installment plans, and marketing gimmicks he used to get the sewing machine in homes and sweatshops all over the world. This fascinating and detailed biography provides an insightful and provocative look at the American entrepreneur, unraveling a complex web of personal ambition, fame, fortune, and the attainment of the American Dream. Illustrated.

"Decommissioning activities for zero-power reactors, radio-diagnostic and radiotherapy hospital departments and laboratories and factories using radioactive material may be erroneously perceived as trivial and of low priority. This publication provides practical information, experience and assistance aimed at a broad spectrum of practitioners who are faced with decommissioning of such small nuclear facilities. Particular consideration is given to the financial and scientific resources, and early planning, which are all factors essential to efficient and effective decommissioning. It is written as a simplified, stepwise approach for guidance to nuclear operators who may have little or no experience in decommissioning. An accompanying CD contains practical information in two Annexes, including descriptions of decommissioning projects problems encountered, solutions and analyses, and lessons learned"-- Provided by publisher.

Coeur d'Alene's love/hate relationship with boat racing is at the center of this comprehensive history of the Diamond Cup race for unlimited hydroplanes. The early origins of competitive boat racing on Coeur d'Alene Lake, the backstory of the how the small lakeside community came to host ten years of the Diamond Cup, the true story of the civil disturbances that would cast a lasting pawl on the event, the real reasons behind the decision to stop hosting the races, and the drama and controversy that led to the races being banned from the city are all covered in depth. The stories of the civic leaders, race volunteers, boat owners, drivers, and other key individuals that came together to put on the exciting spectacle that was the Diamond Cup are lovingly recounted. Of interest to boat racing fans and those curious about one of the premier sporting events in the history of North Idaho. Illustrated with over 100 photographs.

The introduction of chain saws and tractors in the early 1950's marked the beginning of a change in tree harvesting techniques from the old manual methods to mechanized operations. It was followed by a rapid evolution both technically and systematically. Hence, the requirements for improved know ledge of operational efficiency also increased. Changing relations between Man, machines and environment brought about new experiences and awareness of a physiological and ergonomic nature. Improved knowledge of both machine technology and planning of work on a small or large scale has grown increa singly important for an efficient utilization of expensive machines and other equipment. The need for a textbook on tree harvesting techniques including expe riences made in recent years is enhanced. The book presented here is prima rily based on lectures given on the subject of Forest Techniques at the Faculty of Forestry at the Swedish University of Agricultural Sciences and after modifications also at the University of Nairobi (Kenya). Thus, the book is written primarily for students at the faculties and institutes of forestry. However, it is also useful for persons actively occupied in forest operations. The presentation of this book in its original Swedish version in 1972 created a considerable interest in the preparation of a condensed edition in English. Thus interest has been expressed in Finland, Norway, Holland, Canada, U.S.A., Brazil, Japan, Poland, Scotland and Yugoslavia.

Minority Accommodation through Territorial and Non-Territorial Autonomy explores the relationship between minority, territory, and autonomy, and how it informs our understanding of non-territorial autonomy (NTA) as a strategy for accommodating ethno-cultural diversity in modern societies. While territorial autonomy (TA) is defined by a claim to a certain territory, NTA does not assume that it is derived from any particular right to territory, allocated to groups that are dispersed among the majority while belonging to a certain self-identified notion of group identity. In seeking to understand the value of NTA as a public policy tool for social cohesion, this volume critically dissects the autonomy arrangements of both NTA and TA, and

through a conceptual analysis and case-study examination of the two models, rethinks the viability of autonomy arrangements as institutions of diversity management. This is the second volume in a five-part series exploring the protection and representation of minorities through non-territorial means, examining this paradox within law and international relations with specific attention to non-territorial autonomy (NTA).
