Learn how to use a powerful medical advance in head and neck oncology – from the masters of the technique! The name Wolfgang Steiner is synonymous with transoral laser microsurgery for head and neck cancer. He has tirelessly promoted this innovative technique throughout the world and his clinic is considered the pioneering center in Europe. Thousands of students and practitioners have benefited from his teaching and lectures, allowing them to treat selected patients more safely and

effectively than ever thought possible. Now for the first time, you have at your fingertips Dr. Steiner's detailed, step-by-step techniques for transoral laser microsurgery of the head and neck, showing how to excise tumors, preserve the larynx and other key structures, and dramatically decrease mortality. You will learn the insights and technical refinements that allow you to tailor your surgery to the extent of the cancer, even eradicating it in certain localized areas. You will see how to work in a fraction of the time, avoid complex throat and neck reconstructions, preserve voice structures, and greatly enhance the patient's quality of life. Special features of this landmark book include: Written by the developers of this innovative, minimally invasive technique 300 endoscopic color images and explanatory drawings illustrate the diagnostic and surgical procedures on a step-by-step basis Ideal for students as well as for practitioners seeking to broaden their treatment options Offers an introduction to a rapidly growing standard in the field of head and neck oncology For the beginner as well as the experienced surgeon, this book offers masterful guidance on using modern laser technology to perform conservative laryngeal and other head and neck cancer surgeries, resulting in well-documented, lower morbidity rates. It will upgrade and enrich your skills and open a wide range of treatment options that you can offer your patients. Stay up-to-date with new technology; reserve your copy today! "To those who believe, no explanation is necessary, but the Steiner book delivers technical refinements and insights that will expand the surgeon's skill. To those who are skeptical, the book addresses the basic principles of...a great adventure and probably the major positive change in head and neck oncology of the last three or

four decades."—From the Foreword by Lawrence W. Desanto, MD, Professor Emeritus, Mayo Medical School, Rochester, Minnesota

Bestselling Van Life author Foster Huntington shares his experiences - as well as others - living by his own rules in this aspirational book filled with awe-inspiring photographs of unique homes in unexpected places. After spending three years on the road living in a camper van, Foster Huntington continued his unconventional lifestyle by building a two-story treehouse. Foster, like many others, are finding freedom, tranquility, and adventure in living off the grid in unconventional homes. Perfect for fans of Van Life and Cabin Porn and those who yearn for a simpler existence, Off Grid Life showcases unique dwellings from all around the world. Organized into sections like tree houses, tiny houses, shipping containers, yurts, boathouses, barns, vans, and more, the 250 aspirational photographs feature enviable settings like stunning beaches, dramatic mountains and picturesque forests. Also included are images of fully designed interiors with kitchens and sleeping quarters as well as interviews with solo

dwellers, couples, and families who are living lives off the beaten path.

The series Topics in Current Chemistry presents critical reviews of the present and future trends in modern chemical research. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. Review articles for the individual volumes are invited by the volume editors. Readership: research chemists at universities or in industry, graduate students.

Heeding technology's cry to "get connected" can result in overloaded circuits of the mind. Frenetic connections cause frazzled lives. *Unwrapping Wonder: Finding Hope in the Gift of Nature* will restore the reader's soul as they step outside to cultivate a connection with creation and, in the process, deepen their relationship with the Creator. This delightful mix of natural history, human story and God's glory found in everyday nature is based on Job's words: "But ask the animals, and they will teach you, or the birds of the air, and they will tell you ... or let the fish of the sea inform you." Each chapter focuses on one natural object such as the bee, the barnacle, the tiniest seed. By peering within the ordinary, we can learn to see details which reveal extraordinary wonder. As we unwrap the gift, we discover more of nature, God, and ourselves, one wonder at a time. *Unwrapping Wonder* is for active men and women and families who enjoy the outdoors or reading about nature, and for those needing hope in a hectic world. Each chapter offers: --The Wonder Introduced: through anecdote, natural history, or life story.--The Wonder Unwrapped: zooming in to see hidden details, and explained in everyday terms.--The Wonder Applied: Practical, spiritual lessons for daily living.--Promise of Hope: Relevant Scripture to inspire hope.--"Wondercise": A hands-on nature activity designed to awaken heart, mind, and soul to the wonder of creation and give praise to the Creator.

Kaffe Fassett uses the colorful Venetian island of Burano to form the backdrop of another stunning collection of new quilt designs from the Kaffe Fassett Studio. In this 22nd installment of Kaffe Fassett's ever-popular series of patchwork and quilting books, the quilts have been photographed on location in Burano, a tiny island in Italy's Venetian archipelago, famous for its lace making but also for its brilliantly painted houses in a myriad jewel colors. The colorful house walls, sometimes distressed and occasionally decorated with murals, form the backdrop, along with the canals, bridges, and boats of this special Venetian island, to another wonderful selection of Kaffe's new quilt designs. The collection of 19 quilts features both new fabric designs from the Kaffe Collective and some of his Classics. Bali Brocade makes a

fantastic background to Kaffe's sumptuous Shimmer Star quilt with its ripples of pattern in contrasting prints. His two versions of a very simple quilt, comes in two very different colorways. Hot Steps is a riot of color, whereas by contrast its sister quilt, Cool Steps, in dusty blues, greens, and greys has an dreamy quality. Liza Prior Lucy's rich and dark Turkish Coffee quilt, with its hint of Eastern promise, fussy cuts Kaffe's new Turkish Delight fabric to brilliant effect. Kaffe Fassett's Quilts in Burano provides all the instructional text, diagrams, and templates to make the quilts, plus a section on basic patchwork techniques for less experienced quilters.
