Pharmacology for Nursing Care - E-Book W B Saunders Company

With a clear explanation of drug prototypes and how they work, Lehne's Pharmacology for Nursing Care, 10th Edition gives you the background you need to understand drugs currently on the market, and those not yet released. This perennial favorite of students and teachers simplifies complex concepts while distinguishing need-to-know content from the material that's merely nice to know. The 10th edition includes updated drug content to reflect the very latest FDA approvals, withdrawals, and therapeutic uses, as well as corresponding updated nursing content. It also includes an updated prototype drugs section, summarizing their major uses, and an updated table detailing care throughout the lifespan of the patient. Additionally, each chapter ends with a nursing implications summary to help you fully understand the material and apply it to clinical nursing practice. Prototype Drugs features serve as a quick-reference learning aid so you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. UNIQUE! Engaging writing style with clear explanations makes difficult pharmacology concepts easy to grasp and even enjoyable to learn. Nursing implications of drug therapy are integrated throughout the text to reinforce the integral relationship between drug therapy and nursing care. UPDATED Special Interest Topic boxes focus on currently trending issues in pharmacology, eliminating out-of-date content. Large print highlights essential, need-to-know information, and small print indicates nice-to-know information. QSEN focus includes Patient-Centered Care Across the Life Span features highlighting safe and appropriate patient care during different phases of life. Safety Alert features emphasize the QSEN competency relating to patient safety. Student-friendly features make learning easier with concise drug summary tables, chapter outlines, key points, and a visual guide to the prototype drugs in each class. Concise drug summary tables present detailed information for individual drugs, including drug class, generic and trade names, dosages, routes, and indications. Selected Canadian drug names are indicated with a maple-leaf icon throughout the text. Separate Bioterrorism chapter discusses the clinical manifestations and treatment of biological weapon attacks. NEW! Thoroughly updated drug content reflects the very latest FDA drug approvals, withdrawals, and therapeutic uses, as well as corresponding updated nursing content NEW! Additional images included to accompany difficult concepts. NEW! Inclusion of more student practice questions provide additional help for learning the material.

Pharmacology Online for Pharmacology for Nursing Care (User Guide, Access Code and Textbook Package) Elsevier Health Sciences

Lehne's Pharmacotherapeutics for Advanced Practice Nurses and Physician Assistants, 2nd Edition builds on the same foundation of clearly explained, up-to-date, and clinically current content as the trusted Lehne undergraduate text, while focusing on the information that advanced practice nurses and Physician Assistants specifically need for safe and effective prescribing. Three introductory

chapters provide foundational content for new prescribers in the areas of prescriptive authority, rational drug selection, prescription writing, and promoting positive outcomes of drug therapy. Core drug chapters are focused on the drugs that prescribers will most commonly see in clinical practice. A sharp focus is also placed on pharmacotherapeutic decision-making, with Black Box Warnings and new bulleted Key Prescribing Considerations features. The second edition features completely new chapters on Genetic and Genomic Considerations, Muscarinic Antagonists and Immunomodulators, and updated content throughout. It's everything advanced practice nursing and Physician Assistant students need to be safe and effective prescribers! Introductory chapters tailored to the specific needs of prescribers cover topics such as prescriptive authority, rational drug selection and prescription writing, and promoting positive outcomes of drug therapy. Carefully focused pharmacotherapeutic content reflects the drugs most commonly seen and used by prescribers, with emphasis not on the first drug discovered or developed in each class but on the agents most often used today. Primary care drugs are addressed first in each chapter as appropriate, followed by acute care drugs. UNIQUE! Prescriber-focused pedagogical aids further reinforce the most important information for prescribers. Integrated coverage of Canadian trade names appears throughout the text and is highlighted with a familiar maple-leaf icon. Integrated coverage of interprofessional collaboration addresses the growing global interest in interprofessional collaboration and incorporates opportunities for interprofessional collaborative practice throughout.

Pharmacology for Nursing Care - Text and Study Guide Package Elsevier Health Sciences

Master the content from the Lilley textbook with the Study Guide for Pharmacology and the Nursing Process, 6th Edition! Designed to accompany Lilley's Pharmacology and the Nursing Process, 6th Edition, this workbook will assist you in understanding and applying material from each chapter in the text. The review questions prepare you for success in pharmacology and on the NCLEX® Examination. Worksheets for each chapter include multiple-choice questions, critical thinking and application questions, case studies, and other educationally sound learning activities. Worksheets for each chapter include NCLEX® Examination-style review questions, critical thinking and application questions, case studies, and other educationally sound learning activities. A Student Study Tips section provides study techniques, time management skills, and test-taking strategies. An Overview of Dosage Calculations section offers practice problems, sample drug labels, and a quiz. In-depth case studies help you apply information to real-world situations. NCLEX® Examination Preparation sections in each chapter contain numerous NCLEX Examination-style practice questions, many of them application-based, including at least one alternate-format question per chapter. An increased focus on prioritization provides practice in identifying the most important, need-to-know nursing actions. Drug dosage calculation questions, one of which appears in every chapter, facilitate mastery of the mathematics of drug dosing.

Lehne's Pharmacology for Nursing Care Saunders

"The perfect handbook for the clinical supervisor." —Nancy Waite-O'Brien, director, Education and Training, Betty Ford Center "An outstanding contribution to the professional well-being of the

addiction field." —Thomas McGovern, editor, *Addiction Treatment Quarterly* "Forever useful." —S. Beckett, education and training coordinator, National Association of Alcohol and Drug Abuse Counselors

Pharmacotherapeutics for Advanced Practice Saunders

A favorite among nursing students, *Pharmacology for Nursing Care*, 8th Edition, features a uniquely engaging writing style, clear explanations, and unmatched clinical precision and currency to help you gain a solid understanding of key drugs and their implications -- as opposed to just memorization of certain facts. Compelling features such as a drug prototype approach, use of large and small print to distinguish need-to-know versus nice-to-know content, and a focus on major nursing implications save you study time by directing your attention on the most important, need-to-know information. The new edition also features an abundance of content updates to keep you ahead of the curve in school and in professional practice. UNIQUE! Engaging writing style with clear explanations makes content easy to grasp and even enjoyable to learn. A drug prototype approach uses one drug within each drug family to characterize all members of its group to help you learn about related drugs currently on the market and drugs that will be released once you begin practice. UNIQUE! Special Interest Topic boxes address timely issues in pharmacology and connect pharmacology content with current trends. Large print/small print design distinguishes essential "need-to-know" information from "nice-to-know" information. Limited discussion of adverse effects and drug interactions keeps your limited study time focused on only the most clinically important information. Reliance on up-to-date evidence-based clinical guidelines ensures that therapeutic uses are clinically relevant. Integrated and summarized nursing content demonstrates the vital interplay between drug therapy and nursing care. Coverage of dietary supplements and herbal interactions equips you to alert patients and caregivers to the potential dangers of certain dietary supplements, including interactions with prescribed and over-the-counter drugs and herbal therapies. Additional learning features provide a touchstone for study and review as you complete reading assignments and build a foundation of pharmacologic knowledge.

Pharmacology for Nursing Care Elsevier Health Sciences

Known for its clear explanations of drug prototypes and how they work, *Lehne's Pharmacology for Nursing Care*, 9th Edition provides a solid understanding of key drugs and their implications for nursing care. A perennial student favorite, this book simplifies complex concepts, using large and small print to distinguish need-to-know drug content from the material that's merely nice to know. New to this edition are quick-reference summaries of prototype drugs, safety alerts, and a stronger QSEN focus. Written by noted nursing pharmacology instructors Jacqueline Burchum and Laura Rosenthal, this text helps you understand pharmacology as opposed to merely memorizing drug facts. UNIQUE! Engaging writing style with clear explanations makes difficult pharmacology concepts easy to grasp and even enjoyable to learn. Large print highlights essential, need-to-know information, and small print indicates nice-to-know information. A drug prototype approach focuses on one representative drug within each drug family that characterizes all members of its group, so that you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. Nursing implications of drug therapy are integrated throughout the text and summarized at the end of chapters, demonstrating the vital relationship between drug

therapy and nursing care. Reader-friendly features make learning easier with concise drug summary tables, chapter outlines, key points, and a visual guide to the prototype drugs in each class. Learning resources on an Evolve companion website include video clips, animations, case studies, and NCLEX® exam-style review questions. Coverage of dietary supplements and herbal remedies describes potential dangerous interactions between prescribed and over-the-counter drugs and dietary supplements. NEW! QSEN focus includes Patient-Centered Care Across the Life Span features highlighting safe and appropriate patient care during different phases of life. NEW Safety Alert features emphasize the QSEN competency relating to patient safety. NEW! Prototype Drugs features serve as a quick-reference aid to learning. NEW! Chapter outlines include page numbers to help you locate topics quickly. UPDATED Special Interest Topic boxes use engaging vignettes to focus on emerging and currently trending issues in pharmacology. NEW authors continue Dr. Lehne's clear, unique writing style, with the same accuracy and state-of-the-science updates.

Abrams' Clinical Drug Therapy Elsevier

This convenient, money-saving package is a must-have for nursing students! It includes *Lehne's: Pharmacology for Nursing Care*, 6th edition text & *Study Guide for Pharmacology for Nursing Care*, 6th edition.

Study Guide for Pharmacology for Nursing Care - E-Book Saunders

Ensure safe and effective drug therapy with this easy-to-use handbook! *Saunders Nursing Drug Handbook 2023* provides you with current, detailed information on more than 1,000 generic and 4,000 trade name drugs. This handy, user-friendly guide includes updated uses, dosage forms, warnings, side effects and adverse reactions, IV drug administration, nursing considerations, and much more. Organized alphabetically by generic drug name for quick reference, this book stands out from the others in guiding the nurse through the steps essential to quality patient care. New drug monographs cover 25 new FDA-approved medications! More than 1,000 generic name drugs, encompassing over 4,000 trade name drugs, are organized alphabetically with A-to-Z tabs for quick and easy access. UNIQUE! Herbal information is included in the appendix and on the Evolve website, covering the interactions and effects of commonly encountered herbs. Detailed information for each drug includes side effects listed by frequency, and adverse effects and reactions requiring prompt intervention. Drugs by Disorder are listed in the front of the book for easy reference, showing common disorders and the drugs most often used for treatment. Drug Classifications section features an overview of actions and uses for drug families. Black Box Alerts and High Alert drugs are highlighted to promote safe administration of drugs that pose the greatest risk for patient harm, and Do Not Confuse With warnings call out drug names that sound alike or look alike. Top 100 Drugs list identifies the most frequently administered drugs. Cross-references to the 400 top U.S. brand-name drugs are located throughout the book for easy access. List of newly approved medications in the front of the book makes it easy to locate the latest drugs. Nursing considerations are organized in a functional nursing process framework and include baseline assessment, intervention/evaluation, and patient/family teaching. Information on lifespan and disorder-related dosage variations covers special considerations for pediatric, geriatric, hepatic, and immune- or renal-compromised patients. Extensive IV content includes IV compatibilities/IV incompatibilities and breaks down key information on reconstitution, rate of administration, and storage. IV Compatibility Chart foldout includes

comprehensive compatibility information for 65 intravenous drugs. Fixed combinations are included in dosages of each combined drug directly within the individual monographs, to help students understand different drug dose options for specific diseases. Customizable and printable monographs for 100 of the most commonly used drugs are located on Evolve, along with quarterly drug updates.

Study Guide for Pharmacology for Nursing Care - E-Book Jones & Bartlett Learning

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.

Study Guide for Lehne's Pharmacology for Nursing Care Saunders

This bestselling text is known for its clear and consistent format, colorful design, and helpful boxed features and illustrations that highlight need-to-know information and help busy nursing students learn and understand pharmacology. The new edition includes new chapters on medication errors and gene therapy, and all pharmacology content has undergone an extensive revision to ensure that this already-strong content is even more current, consistent, and easy to follow. The Photo Atlas of Drug Administration has been updated to cover even more drug administration routes and to provide numerous new photos and drawings. Content on bioterrorism agents and drugs for HIV/AIDS, diabetes, osteoporosis, Alzheimer's disease, cancer, infection, and psychiatric conditions has been thoroughly updated and expanded. Innovative cartoon-illustrated Study Skills Tips at the beginning of each Part cover study tips, time management, and test taking strategies related specifically to studying pharmacology, designed to engage students in the content by applying proven study skills to the field of pharmacology. Over 250 full-color illustrations explain how drugs work in the body and depict key pharmacologic principles. Consistent chapter format makes information easy to read and improves students' understanding of key concepts. Individual drugs are encapsulated in shaded Drug Profiles that highlight pharmacokinetics and unique variations of individual drugs.

Representative or prototype Key Drugs are highlighted with an icon for quick identification. Learning features in each chapter include Objectives, Drug Profiles boxes, e-Learning Activities, and a Glossary with definitions and page references. Nursing process discussions in separate sections at the end of chapters present Assessment, Nursing Diagnoses, Planning, Outcome Criteria, Implementation, and Evaluation in a consistent nursing process framework with an emphasis on patient education. Points to Remember boxes at the end of chapters summarize content in a bulleted format to help readers review major concepts, and multiple-choice NCLEX Examination Review Questions provide a review for the pharmacology component of the NCLEX exam. Patient

Teaching Tips at the end of each chapter highlight useful patient education information specific to each drug group. Tear-out IV Compatibility Chart provides portable reference on drugs administered intravenously. Pediatric and Geriatric Considerations boxes highlight important lifespan implications of drug therapy. A separate disorders index alphabetically references disorders in the text to aid in integrating it with medical-surgical and other clinical nursing course content. Home Health/Community Points boxes provide a perspective on drug therapy in the home or community. Cultural Implications boxes present differences among cultural or ethnic groups. Legal and Ethical Principles boxes promote awareness of liability issues and proper professional conduct. Research boxes synthesize recent nursing research to promote quality, evidence-based practice. Case studies with critical thinking questions reflect the real world of clinical practice with specific patients from various cultures and age groups. Nursing care plans clarify the nurse's role in drug therapy with nursing diagnoses, subjective and objective data, and outcome criteria. Dosages tables provide instant access to common dosages, routes, and indications for individual drugs. A new Student CD-ROM features 400 NCLEX-style questions, pharmacology animations, medication errors checklists, and IV therapy checklists to help students apply pharmacology content to clinical settings. A new chapter on Medication Errors: Preventing and Responding discusses the scope of the problem, specific nursing measures to prevent medication errors, possible consequences of medication errors, responses to errors, reporting and learning from mistakes, and other related issues. A new chapter on Gene Therapy and Pharmacogenomics provides an overview of major concepts in genetics, including genetic influences on disease and the development of gene-based therapies to promote an understanding of the nurse's role in this emerging branch of health science. The Photo Atlas of Medication Administration has been extensively revised to cover more drug administration routes, featuring over 100 new full-color illustrations with step-by-step instructions and helpful tips for administering medications. Herbal Therapies boxes provide key information on commonly used herbal products. Pharmacology content has been thoroughly revised and updated, including content on bioterrorism agents and drugs for HIV/AIDS, diabetes, osteoporosis, Alzheimer's disease, cancer, and infection. e-Learning Activities boxes included in each chapter remind students of related activities on the Student CD-ROM and the Evolve website to integrate multimedia content and exercises with material presented in the book.

Chemotherapy of Parasitic Diseases Elsevier Health Sciences

Master nursing pharmacology with this practical study guide that incorporates the latest NCLEX® item types! Corresponding to the chapters in Lehne's Pharmacology for Nursing Care, 12th Edition, this comprehensive workbook provides a thorough review of the most important textbook content. Clinical judgment and study questions help you apply your drug knowledge to nursing care, prioritize tasks, and develop clinical decision-making skills; patient teaching scenarios help you learn effective patient education. With a Case Study for the Next-Generation NCLEX® Exam (NGN) in each unit, this study guide provides an excellent review for the NGN and for safe clinical practice. Reinforcement of key textbook content equips you for success on the Next-Generation NCLEX® Exam (NGN) and for patient safety in clinical practice. NCLEX® Examination-style questions in each chapter include multiple-choice, multiple-select, and alternate-item formats, preparing you for success on the NGN and for safe clinical practice. Dosage Calculation questions in every clinical chapter provide

important practice in applying drug information and providing medication safety. Focus on implications of drugs and drug classes on patient care includes activities and questions that are designed for you to answer "How do the drugs work in the body?" and "How do these drug actions impact patient care?" Answer key with rationales is included in the back of the book for immediate feedback and remediation. NEW! Updated content ensures that information is consistent with the Lehne's Pharmacology for Nursing Care, 12th Edition textbook, and reflects the latest FDA drug approvals, withdrawals, and therapeutic uses. NEW! A standalone case study for the Next-Generation NCLEX® (NGN) is included in every unit.

Lehne's Pharmacology for Nursing Care - Text and Elsevier Adaptive Quizzing (Access Card) Package Lippincott Williams & Wilkins

Get hands-on practice applying your knowledge of nursing pharmacology with Pharmacology Online for Lehne's Pharmacology for Nursing Care, 9th Edition. This interactive, visually engaging online course features self-study modules, interactive case studies, videos, animations, NCLEX® Examination-style quizzes, and interactive activities to help you master key principles in nursing pharmacology and perfect your critical thinking and clinical reasoning skills. 110 NCLEX Examination-style practice quizzes prepare users for the pharmacology questions that will be encountered on the NCLEX exam and provide rationales and textbook page references to streamline remediation. 21 self-study modules provide a thorough introduction to the basic principles of pharmacology, drug calculations, and several major drug content areas using an interactive combination of media: text, animations, illustrations, integrated active learning exercises, and dynamic hyperlinks. 28 interactive case studies with quizzes immerse users in true-to-life clinical scenarios and enable hands-on learning in the safety of a virtual setting, accompanied by rationales and remediation tools to help improve understanding of correct and incorrect choices. UNIQUE! Roadside Assistance video clips hosted by renowned pharmacologist and speaker Alan P. Agins, PhD, infuse difficult content with humor and relevance for easier understanding. 275 interactive learning activities test users' knowledge of critical drug content in a fun, game-like format. 20 care planning activities challenge users to apply what they've learned to the planning of patient care. 42 animations accompanied by voiceover narrations are integrated into the self-study modules to clarify concepts. Audio glossary helps users master definitions and pronunciations for more than 1,400 terms and drug names. Discussion questions facilitate virtual classroom conversations on current issues in pharmacology. NEW! Updated self-study modules, interactive case studies, and content coordinates with the 9th Edition of the Lehne text and includes the latest information on major new drugs, drug classes, therapeutic uses, and discontinued drugs. NEW! Section 508 compliance maximizes that accessibility and utility of the course for all potential users by incorporating narration and descriptive text for all visual content, including video, animations, and images. NEW! Updated online drug handbook provides hands-on practice in consulting an up-to-date drug reference for clinical decision-making.

Lehne's Pharmacotherapeutics for Advanced Practice Nurses and Physician Assistants - E-Book Saunders

Highly praised for its clear organization and approachable presentation, Abrams' Clinical Drug Therapy, Twelfth Edition continues a long tradition of guiding students and instructors through the

practice of safe and effective medication administration. Expert pharmacology educators and clinicians explain the "why" behind each nursing action and emphasize individualized nursing care and drug therapy to promote optimal outcomes in every care setting. This updated edition is filled with case studies, concept maps, and other engaging features, and is complemented by robust online resources that reinforce understanding and establish a solid foundation for success from the classroom to the NCLEX® to clinical practice.

Nutrition Essentials for Nursing Practice Springer Science & Business Media

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, students can personalize the text to match their unique needs! Trust Lehne's to make pharmacology more approachable! Known for its clear explanations of drug prototypes and how they work, Lehne's Pharmacology for Nursing Care, 11th Edition provides a solid understanding of key drugs and their implications for nursing care. A perennial student favorite, this book simplifies complex pharmacology concepts, using large and small print to distinguish need-to-know drug content from the material that's merely nice to know. It also includes in-depth coverage of physiology, pathophysiology and drug therapy. Written by noted nursing educators Jacqueline Rosenjack Burchum and Laura Rosenthal, this text helps you understand and apply pharmacology principles as opposed to simply memorizing drug facts. Clear, engaging writing style simplifies complex concepts, making difficult pharmacology content not only understandable but actually enjoyable. Prototype Drugs approach focuses on representative drugs that characterize all members of a given drug group, so that you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. Nursing implications of drug therapy are integrated throughout the text to reinforce the integral relationship between drug therapy and nursing care, and also summarized in Summary of Major Nursing Implications sections at the end of chapters. Special Interest Topic boxes examine the everyday impact of pharmacology with vignettes including Medication Overuse Headache: Too Much of a Good Thing and Antibiotics in Animal Feed: Dying for a Hamburger and Chicken Nuggets. Large print highlights essential, need-to-know information, and small print indicates nice-to-know information. Safety Alerts call out important safety concerns related to contraindications, adverse effects, and more. Patient-Centered Care Across the Life Span tables highlight safe and appropriate care for patients throughout their lives, from infancy to older adulthood. Concise drug summary tables present key information for individual drugs, including drug class, generic and trade names, dosages, routes, and indications. NEW! Thoroughly updated drug content reflects the latest FDA drug approvals, withdrawals, and therapeutic uses, with revisions to the corresponding nursing content. NEW chapters include Genetic and Genomic Considerations, Muscarinic Antagonists, and Complementary and Alternative Therapy.

Saunders Nursing Drug Handbook 2023 - E-Book Elsevier Health Sciences

Learn interactively and practice applying your knowledge of nursing pharmacology with this hands-on, visually engaging online course! Using self-study modules, interactive case studies, videos, animations, case studies, NCLEX® Examination-style quizzes, and interactive activities, this unit-by-unit companion to Lehne's Pharmacology for Nursing Care, 8th Edition helps you master key principles in nursing pharmacology and develop the critical thinking and clinical reasoning skills

necessary for success in nursing practice. 21 self-study modules provide a thorough introduction to the basic principles of pharmacology, drug calculations, and several major drug content areas using an interactive combination of media: text, animations, illustrations, integrated active learning exercises, and dynamic hyperlinks. 27 interactive case studies immerse you in true-to-life clinical scenarios and enable hands-on learning in the safety of a virtual setting, accompanied by rationales and remediation tools to help you improve your understanding of correct and incorrect choices. Self-module quizzes and case study quizzes ensure that you have mastered the content related to each module and case before moving on. 275 interactive learning activities test your knowledge of critical drug content in a fun, game-like format. UNIQUE! Roadside Assistance video clips hosted by renowned pharmacologist and speaker Alan P. Agins, PhD, infuse difficult content with humor and relevance for easier understanding. NCLEX® examination-style quizzes for every chapter (110 total) prepare you for the pharmacology questions you will encounter on the NCLEX exam and provide rationales and textbook page references to streamline remediation. Discussion questions facilitate virtual classroom conversations on current issues in pharmacology. 42 animations accompanied by voiceover narrations are integrated into the self-study modules to clarify concepts. 20 care planning activities challenge you to apply what you've learned to the planning of patient care. An online drug handbook is accessible with the self-study modules and case studies. An audio glossary helps you master definitions and pronunciations for more than 1,400 terms and drug names. NEW! Self-study module on the pharmacotherapy of atherogenic dyslipidemia (with corresponding quiz) focuses on the role of lipid-lowering drugs in the prevention and treatment of atherosclerotic heart disease. NEW! Two new interactive case studies (with corresponding quizzes) cover anticoagulants and drugs for anemia. NEW! Enhanced discussion questions develop your 'clinical imagination' by having you apply content from textbook readings and from directed literature searches to address true-to-life clinical situations like those you will encounter in practice. NEW! Updated Online Drug Handbook provides hands-on practice in consulting an up-to-date drug reference for clinical decision-making. NEW! Updated content coordinates with the 8th Edition of the Lehne text and includes information on the major new drugs, drug classes, and therapeutic uses.

Focus on Nursing Pharmacology Elsevier Health Sciences

Previous edition has subtitle: "a nursing process approach."

Study Guide for Lehne's Pharmacology for Nursing Care - E-Book Elsevier Health Sciences

The Seventh Edition of this nursing-focused nutrition text has been updated to reflect the latest

evidence-based practice and nutrition recommendations. Written in a user-friendly style, the text emphasizes what the nurse really needs to know in practice. Maintaining its nursing process focus and emphasis on patient teaching, this edition includes features to help readers integrate nutrition into nursing care such as sample Nursing Process tables, Case Studies in every chapter, and new Interactive Case Studies online. This is the tablet version which does not include access to the supplemental content mentioned in the text.

Study Guide for Lehne Saunders

This convenient, money-saving package is a must-have for nursing students! It includes Lehne's Pharmacology for Nursing Care 7th edition text and Pharmacology Online for Pharmacology for Nursing Care 7th edition.

Pharmacology for Nursing Care W B Saunders Company

Pharmacotherapeutics for Advanced Nursing Practice, Revised Edition focuses on the critical information necessary for prescribing drugs for common diseases and disorders.

Clinical Supervision in Alcohol and Drug Abuse Counseling Elsevier Health Sciences

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Pharmacology for Nursing Care, critical thinking study questions, case studies, and patient teaching scenarios connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. An emphasis on the key information that nursing students need to know NCLEX Examination-style questions for each chapter in a variety of study/review formats Case Study scenarios provide true-to-life practice in responding to clinical situations that are typical of contemporary medication therapy Implications of drugs and drug classes for patient care Highlighted application-level questions help you integrate other nursing knowledge such as developmental considerations, laboratory values, and symptoms of adverse effects Critical thinking, prioritization, and delegation questions More questions dedicated to prioritization and delegation Increased variety of question types includes matching, true-false, completion, and other formats Decreased emphasis on questions that require lengthy free-text responses Shortened question scenarios more closely resemble NCLEX Examination questions Reorganization of chapters breaks content into four sections: Study Questions (matching, true-false, completion, etc.) Critical Thinking, Prioritization, and Delegation Questions (multiple-choice, multiple-select) Dosage Calculation Questions Case Studies Answer key now included in printed Study Guide
