GREGORY HAYNES

Laws and Societies in the Canadian Prairie West, 1670-1940 Springer

The unique biology of cardiac fibroblasts and related cells, such as cardiac myofibroblasts and valvular interstitial cells, distinguish them from other fibroblastic cells, a concept that is only beginning to be widely appreciated. Further, the natural signals that stimulate and inhibit cardiac fibrosis within these

cells are not well understood. This volume compiles articles that address the molecular mechanisms that control the synthesis and secretion of the cardiac ECM. The book showcases chapters that highlight discussion of role of Transforming Growth Factor β (TGF β), an important fibrogenic cytokine and its downstream effectors SMAD in many cardiac diseases. Further, the contributions highlight information to discuss endogenous inhibitors of cardiac fibrosis, as well as advances in tissue engineering specific to matrix in the heart. Finally, discussions of unifying mechanisms of matrix remodeling in valves and myocardium are presented. The mechanisms involved in the

stimulation of cardiac fibrosis are not fully understood. In most cases the marginal attenuation of cardiac fibrosis as a result of a given therapy is a beneficial side-effect linked to other primary effects on other cells, especially cardiomyocytes. Very few drugs or agents are known to affect the function and dysfunction of cardiac fibroblasts and myofibroblasts alone. The book helps to translate the information gathered within to allow us to alter the course of fibrogenic events that are typical of cardiac fibrosis, and thereby reduce their burden on the patient and on society itself.

The flora of the Rocky Mountains is spectacular, displaying its changing aspects throughout the growing season. As the snow cover melts back up the mountain slopes, the wildflowers spread their carpet through the forests, across the subalpine meadows and into the alpine regions. Kananaskis Country was established primarily for nature conservation and recreation. It contains three provincial parks with facilities for swimming, fishing, camping, hiking, and the general enjoyment of nature. The southernmost park, Peter Lougheed Provincial Park, includes several lakes and a large section of mountain wilderness with snow-covered peaks and glaciers. It is a "multi-use recreation area," offering the visitor a choice of hiking and interpretive trails. Sprawling across

Alberta's prairies and foothills to the heights of the Rockies, Kananaskis Country is home to a particularly rich diversity of plant life. Plants of Kananaskis Country in the Rocky Mountains of Alberta describes in detail 423 of the most significant, identifiable or characteristic species of this region and refers to many other species. Beryl Hallworth and C.C. Chinnappa also provide an authoritative overview of this region, including information on its climate, geology, and vegetation zones and important notes on the history of human use of these plants.

Government Information in Canada University of Alberta
Between 1867 and 2000, the Canadian government sent over 150,000 Aboriginal children to residential schools across the country. Government officials and missionaries agreed that in order to “civilize and Christianize” Aboriginal children, it was necessary to separate them from their parents and their home communities. For children, life in these schools was lonely and alien. Discipline was harsh, and daily life was highly regimented. Aboriginal languages and cultures were denigrated and suppressed. Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self-sustaining. Child neglect was institutionalized, and the lack of supervision created situations where students were prey to sexual and physical abusers. Legal action by the schools’ former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008. The product of over six years of research, the Commission’s final report outlines the history and legacy of the schools, and charts a pathway towards reconciliation. Canada’s Residential Schools: The History, Part 1, Origins to 1939 places Canada’s residential school system in the historical context of European campaigns to colonize and convert Indigenous people throughout the world. In post-Confederation Canada, the government adopted what amounted to a policy of cultural genocide: suppressing spiritual practices, disrupting traditional economies, and imposing new forms of

government. Residential schooling quickly became a central element in this policy. The destructive intent of the schools was compounded by chronic underfunding and ongoing conflict between the federal government and the church missionary societies that had been given responsibility for their day-to-day operation. A failure of leadership and resources meant that the schools failed to control the tuberculosis crisis that gripped the schools for much of this period. Alarmed by high death rates, Aboriginal parents often refused to send their children to the schools, leading the government adopt ever more coercive attendance regulations. While parents became subject to ever more punitive regulations, the government did little to regulate discipline, diet, fire safety, or sanitation at the schools. By the period’s end the government was presiding over a nation-wide series of firetraps that had no clear educational goals and were economically dependent on the unpaid labour of underfed and often sickly children.

Water-powers ... 2002/2003 Alberta Electoral Boundaries Commission

Laws and Societies in the Canadian Prairie West, 1670-1940 examines the legal history of the north-west frontier, from the earliest years of European-Native contact in the seventeenth century to the mid-1900s. Challenging myths about a peaceful west and prairie exceptionalism, the book explores the substance of prairie legal history and the degree to which the region's mentality is rooted in the historical experience of distinctive prairie peoples. The chapters, written by a cross-section of established and emerging scholars working in the allied fields of law, legal history, sociology, and criminology, focus on what is

distinctive in prairie legal culture. By approaching the issue from a variety of perspectives -- those of colonial administrators, fur company employees, Native peoples, women, men, entrepreneurs, judges, magistrates, and the police, among others -- the authors find evidence of a conscious effort to apply broad, non-regional experiences to seemingly familiar, local issues. The ways in which prairie peoples perceived themselves and their relationships to a wider world were directly framed by notions of law and legal remedy shaped by the course and themes of prairie history. Legal history is not just about black letter law. It is also deeply concerned with the ways in which people affect and are affected by the law in their daily lives. By examining how central and important the law has been to individuals, communities, and societies in the Canadian Prairies, this book makes an original contribution. This collection will be of interest to students and scholars of Canadian history, legal history, sociology, and criminology, and anyone interested in the legal culture of the Canadian west from the frontier days to the present.

Forging Alberta's Constitutional Framework University of Alberta

Forging Alberta's Constitutional Framework analyzes the principal events and processes that precipitated the emergence and formation of the law and legal culture of Alberta from the foundation of the Hudson's Bay in 1670 until the eve of the centenary of the Province in 2005. The formation of Alberta's constitution and legal institutions was by no means a simple process by which English and Canadian law was imposed upon a receptive and passive population. Challenges to authority, latent

lawlessness, interaction between indigenous and settler societies, periods (pre- and post-1905) of jurisdictional confusion, and demands for individual, group, and provincial rights and recognitions are as much part of Alberta's legal history as the heroic and mythic images of an emergent and orderly Canadian west patrolled from the outset by red coated mounted police and peopled by peaceful and law-abiding subjects of the Crown. Papers focus on the development of criminal law in the Canadian west in the nineteenth century; the Natural Resources Transfer Agreement of 1930; the National Energy Program of the 1980s; Federal-Provincial relations; and the role and responsibilities of the offices of Justices of the Peace and of the Lieutenant-Governor; and the legacies of the Lougheed and Klein governments.
