**The Lost World of Thomas Jefferson** Taylor & Francis

This book gathers the latest advances, innovations, and applications in the field of computational engineering, as presented by leading international researchers and engineers at the 24th International Conference on Computational & Experimental Engineering and Sciences (ICCES), held in Tokyo, Japan on March 25-28, 2019. ICCES covers all aspects of applied sciences and engineering: theoretical, analytical, computational, and experimental studies and solutions of problems in the physical, chemical, biological, mechanical, electrical, and mathematical sciences. As such, the book discusses highly diverse topics, including composites; bioengineering & biomechanics; geotechnical engineering; offshore & arctic engineering; multi-scale & multi-physics fluid engineering; structural integrity & longevity; materials design & simulation; and computer modeling methods in engineering. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

Overall Winner of the 2019 OCM Bocas Prize for Caribbean Literature High Mas: Carnival and the Poetics of Caribbean Culture explores Caribbean identity through photography, criticism, and personal narrative. Taking a sophisticated and unapologetically subjective Caribbean point of view, the author delves into Mas—a key feature of Trinidad performance—as an emancipatory practice. The photographs and essays here immerse the viewer in carnival experience as never before. Kevin Adonis Browne divulges how performers are or wish to be perceived, along with how, as the photographer, he is implicated in that dynamic. The resulting interplay encourages an informed, nuanced approach to the imaging of contemporary Caribbeanness. The first series, “Seeing Blue,” features Blue Devils from the village of Paramin, whose performances signify an important revision of the post-emancipation tradition of Jab Molassie (Molasses Devil) in Trinidad. The second series, “La Femme des Revenants,” chronicles the debut

performance of Tracey Sankar’s La Diabliesse, which reintroduced the “Caribbean femme fatale” to a new audience. The third series, “Moko Jumbies of the South,” looks at Stephanie Kanhai and Jonadiah Gonzales, a pair of stilt-walkers from the performance group Touch de Sky from San Fernando in southern Trinidad. “Jouvay Reprised,” the fourth series, follows the political activist group Jouvay Ayiti performing a Mas in the streets of Port of Spain on Emancipation Day in 2015. Troubling the borders that persist between performer and audience, embodiment and spirituality, culture and self-consciousness, the book interrogates what audiences understand about the role of the participant-observer in public contexts. Representing the uneasy embrace of tradition in Trinidad and the Caribbean at large, the book probes the multiple dimensions of vernacular experience and their complementary cultural expressions. For Browne, Mas performance is an exquisite refusal to fully submit to the lingering traumas of slavery, the tyrannies of colonialism, and the myths of independence.

Adoptez les 111 tactiques du photographe créatif et investi : des fondamentaux à la postproduction, une mine de conseils et de recommandations pour optimiser vos prises de vue, tout en vous jouant des difficultés usuelles. Parce qu'une photo est réussie lorsque la vision du photographe (ce qu'il veut montrer) est en phase avec le regard du spectateur (comment il perçoit et interprète une image), découvrez notamment comment composer une photo de manière à transmettre efficacement le message qu'elle contient.

*The Underwater Photographer* Pearson Education

This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now begun to take this context into focus for documentation, analysis, interpretation and understanding. Human footprints are prominent among the long-time under-researched features of the context in caves with rock art. In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides. The book gathers first the methodological diversity in the analysis of human tracks. Here major representatives of anthropological, statistical and traditional approaches feature the multi-layered methods available for the analysis of human tracks. Second it compiles case studies from around the globe of prehistoric human tracks. For the first time, the most important sites which have been found worldwide are published in a single publication. The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe, expounding on how archaeological science can benefit from the ancestral knowledge. This book will be of interest to professional archaeologists, graduate students, ecologists, cultural anthropologists and laypeople, especially those focussing on hunting-gathering and pastoralist communities and who appreciate indigenous knowledge.--

Mastering the Nikon D7100 by Darrell Young provides a wealth of experience-based information and insights for owners of the new D7100 camera.

Darrell is determined to help the user navigate past the confusion that often comes with complex and powerful professional camera equipment. This book explores the features and capabilities of the camera in a way that far surpasses the user's manual. It guides readers through the camera features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option. Every button, dial, switch, and menu configuration setting is explored in a user-friendly manner, with suggestions for setup according to various shooting styles. Darrell's friendly and informative writing style allows readers to easily follow directions, while feeling as if a friend dropped in to share his knowledge. The learning experience for new D7100 users goes beyond just the camera itself and covers basic photography technique.

Before you let your frustration get the best of you, take heed in the friendly guidance in Nikon D5600 For Dummies.

**Sketching Light** Univ. Press of Mississippi

With the release of this guide book for the Panasonic Lumix DMC-LX100 camera, White Knight Press has provided users with a complete guide to all operations of this advanced compact camera. Using a tutorial-like approach, the book provides guidance to beginning and intermediate photographers about how to accomplish things with the LX100, with tips about when and why to use the camera's many controls, menu options, and other features. The book provides details about the camera's controls for autofocus, manual focus, aperture, shutter speed, exposure compensation, white balance, and ISO sensitivity, as well as many other settings. The book also provides details about the camera's numerous options for playback, setup, and customizing the operation of the various buttons and other controls. The book contains more than 350 photographs, almost all in full color, illustrating the LX100's controls, display screens, and menus. The images also provide examples of the photographs that can be taken using the many creative settings of the camera, including the Photo Style settings, which let the photographer alter the color processing as well as contrast, sharpness and noise reduction for images; the Intelligent Auto shooting mode, with scene detection optimized for various subjects, including landscapes, portraits, and sunsets; the Filter button picture effects, which provide the ability to customize the appearance of images in dramatic ways; and the camera's strong array of features for continuous shooting and shooting in high-contrast lighting conditions. The book also includes a full discussion of the video recording abilities of the LX100, which offers manual control of exposure and focus during movie recording, and which provides ultra-high definition 4K recording of motion pictures. In three appendices, the book provides information about accessories for the LX100, including cases, external flash units, and other items, and includes a list of web sites and other resources for further information. The book includes an appendix with helpful Quick Tips that explain how to take advantage of the camera's features in the most efficient ways possible.

*Europ production* David Busch Camera Guide

Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light--but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as "in-

between" lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated--not to mention the wit and humor of a clearly warped (if gifted) mind.
