World History, Culture, and Geography Routledge

In recent years, textbooks have been widely criticized for low standards, lack of imaginativeness, and insensitivity to racial and gender issues.

Increasingly, they are cited as another "weak link" in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks--from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

The School Journal University of Toronto Press

A ground-breaking book that examines the uneasy relationship between archaeology and education. Argues that archaeologists have a vital role to

play in education alongside other interpreters of the past. Contributors from different countries and disciplines show how the exclusion of aspects of the past tends to impoverish and distort social and educational experience.

Social Education University of Chicago Press

In 1932 George Counts, in his speech "Dare the School Build a New Social Order?" explicitly challenged teachers to develop a democratic, socialistic society. In *Democratic Social Education: Social Studies for Social Change* Drs. Hursh and Ross take seriously the question of what social studies educators can do to help build a democratic society in the face of current antidemocratic impulses of greed, individualism and intolerance. The essays in this book respond to Counts' question in theoretical analyses of education and society, historical analyses of efforts since Counts' challenge, and practical analyses of classroom pedagogy and school organization. This volume provides researchers and teacher educators with ideas and descriptions of practice that challenge the taken-for-granted meanings of democracy, citizenship, culture, work, indoctrination, evaluation, standards and curriculum within the purposes of social education.

California in a Time of Excellence Instructional Strategies for Middle and High School Social Studies

Follows California's efforts at reforming the public school system from 1983 to the present.

An all-inclusive guide for the parents of the 1.5 million homeschooled children Homeschooling, once an alternative to conventional education, is experiencing a boom all across America and has become a highly valued option for more and more mainstream parents. The McGraw-Hill Homeschooling Companion provides parents with a complete, authoritative, truly balanced guide to every aspect of homeschooling, from the primary years through high school. This all-in-one manual covers the different approaches to homeschooling as well as the specific methods for setting up the home learning environment, including legal requirements, supplies, and lesson plans. Individual chapters examine the stages of homeschooling: what curriculum planning involves, the indispensable tools for the home classroom, computer use, and tips and techniques on teaching all the core curriculum requirements. Special features include comprehensive treatment of standardized testing, state by state; practical counsel on integrating homeschooling and living in the outside world; 10 favorite homeschool suppliers; websites; and homeschooling laws for all 50 states.

A Guide to Curriculum Development in Social Studies R&L Education

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

Instructional Strategies for Middle and High School Social Studies Routledge

Teaching Social Studies in Middle and Secondary Schools Prentice Hall

This important book is the result of a study of school curriculum undertaken by a joint committee of the University of Toronto and the Board of Education for the City of Toronto. Three sub-committees, dealing with English, Social Science, and Physical Science, here present preliminary reports which indicate the need for perpetual study if the school curriculum is to be kept abreast of modern developments in each discipline. Committee members responsible for the reports are themselves elementary, secondary or university teachers of experience. Their recommendations, embracing all grades up to and including Thirteen, are specific, stimulating and controversial. They are unanimous only in their concern that necessary changes be made and that study of the curriculum be continuous and objective. The reports are prefaced by a discerning essay written by Northrop Frye, Principal Frye points out that "the real barriers to break down were those between the three major divisions of education, the primary, secondary and university levels, each of which tends to become a self-enclosed system, congratulating itself on its virtues and blaming whatever deficiencies the educational process as a whole may have on the other systems." This book will be of interest to teachers at all levels, to officials, responsible for policy in our public education, to trustees, to parents, and to the increasing number of general public who care about education. The Chairmen of the three committees were: English, Mary Campbell (Parkdale Collegiate Institute); Social Science, C.B. Macpherson (Department of Political Economy, University of Toronto); Physical Science, Charlotte M. Sullivan (Department of Zoology, University of Toronto). The Editor, Northrop Frye, is Principal of Victoria College, University of Toronto.

Rediscovering Geography Lifepac

Stories about the lengths to which middle- and upper-middle-class parents will go to ensure a spot for their child at a prestigious university. From the Suzuki method to calculus-based physics, from AP tests all the way back to early-learning Kumon courses, students are increasingly pushed to excel with that Harvard or Yale acceptance letter held tantalizingly in front of them. And nowhere is this drive more apparent than in our elite secondary schools. In *Class Warfare*, Lois Weis, Kristin Cipollone, and Heather Jenkins go inside the ivy-yearning halls of three such schools to offer a day-to-day, week-by-week look at this remarkable drive toward college admissions and one of its most salient purposes: to determine class. Drawing on deep and sustained contact with students, parents, teachers, and administrators at three iconic secondary schools in the United States, the authors unveil a formidable process of class positioning at the heart of the college admissions process. They detail the ways students and parents exploit every opportunity and employ every bit of cultural, social, and economic capital they can in order to gain admission into a "Most Competitive" or "Highly Competitive Plus" university. Moreover, they show how admissions into these schools—with their attendant rankings—are used to lock in or improve class standing for the next generation. It's a story of class warfare within a given class, the substrata of which—whether economically, racially, or socially determined—are fiercely negotiated through the college admissions process. In a historic moment marked by deep economic uncertainty, anxieties over socioeconomic standing are at their highest. Class, as this book shows, must be won, and the collateral damage of this aggressive pursuit may just be education itself, flattened into a mere victory banner.

Managing the Social Studies Curriculum SUNY Press

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists,

policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. *Rediscovering Geography* presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers.

Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

[Study and Master Geography Grade 10 CAPS Study Guide](#) Livre de Lyon

This readable, accessible book offers prospective teachers a comprehensive introduction to teaching social studies to middle and secondary school students. With the purpose of social studies being the development of reflective, competent, concerned citizens, the book first examines the origins and evolution of social studies and citizenship education across the United States. Following this, targeted chapters address the art, science, and craft of social studies teaching as a means for engaging learners in knowledge construction. In the final section, the authors look at ways to improve social studies instruction through the incorporation of emerging technology into the social studies curriculum. For middle and secondary school social studies teachers.

Social Studies in Secondary Schools Routledge

Taking a collection of seminal articles from the *Journal of Curriculum Studies*, this book offers readers a vantage point for thinking about the worlds of schools and curricula, focusing in particular on the concept of seeing schools, curricula and teaching in new ways. Each of the chapters sheds fresh light on the ways of thinking the aforementioned. Themes include: classrooms and teaching pedagogy science and history education school and curriculum development students' lives in schools. Written by an international group of distinguished scholars from Britain, North America, Sweden and Germany, the chapters draw on the perspectives offered by curriculum and pedagogical theory, history, ethnography, sociology, psychology and organisational studies and experiences in curriculum-making. Together they invite many questions about why teaching and curricula must be as they are. *Rethinking Schooling* provides new futures for education and alternative ways of seeing them.

The Bulletin of the National Association of Secondary School Principals Routledge

Instructional Strategies for Middle and High School Social Studies: Methods, Assessment, and Classroom Management is an exciting methods-based text that integrates appropriate management and assessment techniques with seven distinct teaching strategies. Writing explicitly for pre-service social studies teachers, veteran teacher educator Bruce E. Larson offers detailed descriptions of a range of instructional strategies, along with guidelines for deciding how and when to use each. Part I offers the foundations for teaching and learning in a social studies classroom, and explores contextual, theoretical, and policy factors that all teachers need to consider before entering the classroom. Part II delivers a range of comprehensive strategies for providing instruction that is appropriate for particular lessons, student abilities, and classroom environments. The practical strategies in Part II build upon the learning theories described in Part I, positioning *Instructional Strategies for Middle and High School Social Studies* to be the go-to, all-inclusive teacher's guide to the social studies classroom. New to this Edition A list of goals before each chapter presents an overview of the chapter's content focus, and provides an outline for the chapter review. Extensively revised Part I (chapters 1–4) provides an updated review of national standards developed for teaching history, geography, civics, and economics. In-depth applications of the Common Core State Standards for the social studies are also explored. New "Reality Check" feature provides directions for integrating field-based experiences into the chapters, and contextualizes the ideas in the book for a classroom setting. Each chapter in Part II (chapters 5–11) has been expanded to include a section labeled "Enhancing Student Learning with Technology," offering websites, links, and other resources for integrating recent technologies into the classroom. Chapters 5–11 include a new "Making Your Lesson More Meaningful for ELLs" feature, which provides ideas—based on current research and theories about learning language—for engaging ELLs, specific for each instructional strategy. Expanded discussion of the "Understanding by Design" model equips teachers to design learning experiences that promote student understanding by intentionally designing what happens in the classroom, and developing authentic formative assessments of student learning.

North Carolina Education McGraw-Hill Companies

Ecotheology - Sustainability and Religions of the World gives a very interesting overview of the frontiers of scientific research in this important multi- and transdisciplinary area. Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet. This book will be very useful for everyone – researchers, teachers, students, or others interested in the field – who would like to gain some insights into this aspect of our culture.
