SANCHEZ MENDEZ

Accounting Precision Group

This unit describes the skills and knowledge required to assist clients to identify their rights, voice their needs and concerns and realise their interests, rights and needs.

Manage Effective Workplace Relationships
 Springer

The tenth edition of Accounting (Hoggett et al.) provides an introductory but comprehensive description of the purpose, practice and process of contemporary international financial and management accounting in an Australian context. With the increased emphasis on the globalisation of business, the material is ideal for the study of introductory accounting in a broad international context. The tenth edition builds on the strengths of previous editions with a strong focus on the decision-making role of accounting, as well as on a student's acquisition of generic skills such as

communication, analytical, problem solving, critical thinking and judgement skills. The technical skills required in the application of accounting concepts still remain a core objective of the new edition.

Accounting

The Business Services Series are a set of 7 workbooks addressing individual management competencies from the Business Services Training Package. Written by experienced TAFE teacher-authors, each workbook provides comprehensive coverage of one management module and is perfect for teachers tailoring courses to the national package. Easily a standalone product, each workbook is content-rich, with ample theory to complement the timed activities, skill-checklists and real-life Australian case-studies.

Use Hygienic Practices for Food Safety

The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the

accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.
