Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from

the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the crucifixion in stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering. Henry, was an American writer who lived in the late 19th century. He gains wide popularity with his short stories which often take place either in New York or some small American towns. The plot twists and the surprise endings are a typical and integral part of O. Henry's short stories. Some of his best known works are "The Gift of the Magi", "The Cop and the Anthem", "A Retrieved Reformation". His stories often deal with ordinary people and the individual aspects of life. As a result of the outstanding literature legacy that O. Henry left behind, there is an American annual award after his name, given to exceptional short stories. The book is divided into three sections. The first section presents the basic ideas for analysis. It begins by insisting that reform start with a clear understanding of the performance deficiencies of the current system. Like all priority setting in the public sector, this 'definition of the problem' involves both ethical choices and political processes. Early chapters explain the foundations of these ideas and apply them to the pharmaceutical sector. The relationship of ultimate outcomes (like health status or risk protection) to classic health systems concepts like efficiency, access and quality is also explored. The last chapter in the first part is devoted to 'diagnosis'—explaining how to move from the definition of a problem to an understanding of how the functioning of the system produces the undesirable outcomes in question. The second part of the book devotes one chapter to each of five 'control knobs': finance, payment, organization, regulation and persuasion. These are sets of potential interventions that governments can use to improve pharmaceutical sector performance. Each chapter presents basic concepts and discusses examples of reform options. Throughout we provide 'conditional

guidance'â€”avoiding the approach of a 'one size fits all' model of 'best practices' in these five arenas for reform. Instead we stress the need for local knowledge of political systems, administrative capacities, community values and market conditions in order to design pharmaceutical sector policies appropriate to a country's particular circumstances. The last part of the book is a set of teaching cases. Each is preceded by questions and is followed by a brief note on the lessons to be learned. The goal is to help readers develop the skills they need to deal effectively with pharmaceutical sector reform problems in their own countries.

Works in the Museum's collection that embody the Renaissance interest in

classical learning, fame, and beautiful objects are illustrated and discussed in this resource and will help educators introduce the richness and diversity of Renaissance art to their students. Primary source texts explore the great cities and powerful personalities of the age. By studying gesture and narrative, students can work as Renaissance artists did when they created paintings and drawings. Learning about perspective, students explore the era's interest in science and mathematics. Through projects based on poetic forms of the time, students write about their responses to art. The activities and lesson plans are designed for a variety of classroom needs and can be adapted to a specific curriculum as well as used for independent study. The resource also includes a bibliography and glossary.

An innovation in learning improves upon the implementation of the standard practice or introduces a new practice, thus achieving greater learning outcomes. The Handbook on Innovations in Learning, developed by the Center on Innovations in Learning, presents commissioned chapters describing current best practices of instruction before embarking on descriptions of selected innovative practices which promise better methods of engaging and teaching students. Written by a diverse and talented field of experts, chapters in the Handbook seek to facilitate the adoption of the innovative practices they describe by suggesting implementation policies and procedures to leaders of state and local education agencies.

*The Prince* by Nicolo Machiavelli Translated by W. K. Marriott A 16th-Century Political Treatise Nicolo Machiavelli was born at Florence on 3rd May 1469. He was the second son of Bernardo di Nicolo Machiavelli, a lawyer of some repute, and of Bartolommea di Stefano Nelli, his wife. Both parents were members of the old Florentine nobility. His life falls naturally into three periods, each of which

singularly enough constitutes a distinct and important era in the history of Florence. His youth was concurrent with the greatness of Florence as an Italian power under the guidance of Lorenzo de' Medici, Il Magnifico. The downfall of the Medici in Florence occurred in 1494, in which year Machiavelli entered the public service. During his official career Florence was free under the government of a Republic, which lasted until 1512, when the Medici returned to power, and Machiavelli lost his office. The Medici again ruled Florence from 1512 until 1527, when they were once more driven out. This was the period of Machiavelli's literary activity and increasing influence; but he died, within a few weeks of the expulsion of the Medici, on 22nd June 1527, in his fifty-eighth year, without having regained office.

**The Prince** Teachers Curriculum Institute Learn from the Engagement Masters Education is a battle for attention.

Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--

Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in Galaxy's Edge, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney Imagineers. Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on Earth!
