Although host

governments and investors may share one common objective - the desire for projects to generate high levels of revenue - their other goals are not entirely aligned. Host governments aim to maximize rent for their country over time, while achieving other socioeconomic objectives. Investors aim to ensure that the return on

investment is consistent with the risk associated with the project, and with their corporations' strategic objectives. To reconcile these often conflicting objectives, more and more countries rely on transparent institutional arrangements and flexible, neutral fiscal regimes. This paper examines the key elements of the legal and fiscal frameworks utilized in the petroleum sector

and aims to outline desirable features that should be considered in the design of fiscal policy with the objective of optimizing the host government's benefits, taking into account the effect this would have on the private sector's investment.

Rate Research John Wiley & Sons

Presenting state-of-the-art research on the economics of producing and marketing aquacultural products, this volume addresses critical issues concerning

profitability, market acceptance, and economic modeling of various aquacultural products. Research approaches range from firm-level bioeconomic modelling to market-level econometric modelling of industry growth and product substitution. The studies highlight the institutional structures and public policy issues that will shape growth and development of aquaculture into the twenty-first century, including trade policies, food safety, and

environmental quality. *Annual Report* Taylor & Francis
Explore different measures of ex-post risk-adjusted performance measurement and learn to choose the correct one
In the newly revised Second Edition of *Practical Risk-Adjusted Performance Measurement*, accomplished risk and investment expert Carl R. Bacon delivers an insightful, accessible, and real-world guide to ex-post risk measurement. The author bridges the

gap between theory and practice, showing you how to apply the former to the latter without introducing unnecessary mathematical complexity. The book describes the fundamentals of risk in the asset management context and the descriptive statistics used to describe it. It builds on that foundation with detailed examinations of concepts like regression, drawdown, and partial moments, before moving on to topics like fixed income risk and Prospect Theory. With helpful

additions that include recently developed measures of risk, supplementary explanatory sections, and six brand-new chapters, this book also offers: A practical classification of all ex-post risk measures and how they connect to one another An explanation of how risk-adjusted performance measures impact performance fees A discussion of risk measure dashboard designs Instructions on how appraisal measures should be used for

manager selection Perfect for portfolio managers, asset owners, risk controllers, and investment performance analysts, Practical Risk-Adjusted Performance Measurement is an indispensable resource for anyone looking for a hands-on exploration of the buy-side, asset management perspective. [Federal Register](#) Pearson UK This unified examination of economic analysis principles from a cash flow viewpoint, provides a systematic, 7-step

approach for performing a comparison of investment alternatives. It offers comprehensive coverage of cost concepts, inflation, ACRS and modern methods of depreciation, income taxes, economic analysis. It features more current economy examples, a new chapter on reality issues, and new material on non-manufacturing examples. Routledge Real estate represents an increasingly significant global asset class and its distinctive characteristics must be understood by

investors and researchers. The Routledge Companion to Real Estate Investment provides an authoritative overview of the real estate asset class. The Companion focuses on the current academic research and its relevance for practical applications. The book is divided into four parts, each containing specially written chapters by international experts in the relevant field. The contributors cover the institutional context for real estate investment, the main players in real

estate investment, real estate appraisal and performance measurement, and real estate portfolios and risk management. This Companion provides a comprehensive reference for students, academics and professionals studying, researching and working in real estate investment, finance and economics. *Cost Engineering* World Bank Publications Providing a balanced and practical approach to capital management and budgeting, this book

covers the full spectrum of capital investments, from the basics through the latest innovations. It is aimed at managers who are involved in capital investment decisions: setting company capital investment policy; performing project analyses; and drafting recommendations. Those in top management will benefit from discussions of strong and weak points of various methods and concepts. Included in the arsenal of capital investment tools in this book are concepts of

proven usefulness, such as the MAPI method, no longer available in other works on the topic of capital budgeting, and other topics not covered elsewhere, such as abandonment analysis. The Handbook of Capital Investing John Wiley & Sons Performance measurement and attribution are key tools in informing investment decisions and strategies. Performance measurement is the quality control of the investment decision

process, enabling money managers to calculate return, understand the behaviour of a portfolio of assets, communicate with clients and determine how performance can be improved. Focusing on the practical use and calculation of performance returns rather than the academic background, Practical Portfolio Performance Measurement and Attribution provides a clear guide to the role and implications of these methods in today's financial environment,

enabling readers to apply their knowledge with immediate effect. Fully updated from the first edition, this book covers key new developments such as fixed income attribution, attribution of derivative instruments and alternative investment strategies, leverage and short positions, risk-adjusted performance measures for hedge funds plus updates on presentation standards. The book covers the mathematical aspects of the topic in an accessible and practical

way, making this book an essential reference for anyone involved in asset management.

Ludwig's Applied Process Design for Chemical and Petrochemical Plants
 Oxford University Press, USA
 Cape Town, South Africa,
 9 Sept. 2015 - 10 Sept. 2015. Theme: 'Creating

futures: Sustainable economies?', Purpose: To share continuous and collaborative research outputs that review existing strategies and to propose mechanisms for the likely achievement of a sustainable economy that is unique but inclusive to different entities in the world. Target audience: This year's 7th International Conference on Business and Finance (ICBF) continues its tradition of being the premier forum for presentation of research results and

experience reports on contemporary issues of finance, accounting, entrepreneurship, business innovation, big data, e-Government, public management, development economics and information systems, including models, systems, applications, and theory. Editorial Policy: All papers were refereed by a double blind reviewing process in line with the South African, Department of Higher Education Training (DHET) refereeing standards. Papers were reviewed

according to the following criteria: relevance to conference themes, relevance to audience, contribution to scholarship, standard of writing, originality and critical analysis. *Asset Management and Institutional Investors* Elsevier
The speed with which the various economies recover from the Covid-19 pandemic will significantly determine the economic pressure placed on the environment in the medium-to-long-term. Furthermore, the

pandemic has highlighted the strong interrelations between natural and societal systems, with societal resilience depending on a resilient environmental support system. In this context, the book argues that the pandemic represents a wake-up call for financial systems to be better prepared for the climate crisis and social risk, and has provided a stimulus to scale down the reliance of the global economy on fossil fuels. The first part of the book provides a deep and creative

discussion between leading international researchers and experts on the policy options and financial instruments which can help to catalyze the green finance transition in the post-Covid-19 era. The contributions show that sustainable finance is emerging as a powerful tool to advance the transition towards a more environmentally and socially sustainable economic model. Instruments such as sovereign green bonds, green securities, and

other sustainability-related securities can play a significant role in the post-Covid-19 world to fund economic stimulus and to lead the way to new and more sustainable future. The second part of the book supports the debate by highlighting a number of selected case studies on financing transitions in different regional contexts including Africa, Asia, Europe, and Latin America. The book marks a significant contribution to the literature on environmental economics

and finance, climate change, and sustainability transitions. Chapter 12 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license. *Professional Investor* CRC Press
Agroecology is at the forefront of transforming our food systems. This bestselling textbook provides the essential

foundation for understanding this transformation in all its components: agricultural, ecological, economic, social, cultural, and political. It presents a case for food system change, explains the principles and practices underlying the ecological approach to food production, and lays out a vision for a food system based on equity and greater compatibility with the planet's life support systems. New to the fourth edition: A chapter on Alternatives to

Industrial Agriculture, covering the similarities and distinctions among different approaches to sustainable agriculture A chapter on Ecological Pest, Weed, and Disease Management A chapter on Urban and Peri-urban Agriculture A chapter on Agriculture and the Climate Crisis A revised analysis and critique of the food system's embeddedness in the extractive capitalist world economy that reflects ideas in the emerging field of political agroecology. Streamlined

treatment of agroecology's foundations in ecological science, making the text more compatible with typical course curricula. A Companion Website at <https://routledgetextbooks.com/textbooks/9781032187105/> incorporates the entire contents of the updated practical manual Field and Laboratory Investigations in Agroecology, split into student and lecturer resources. These 24 sample investigations facilitate hands-on learning that involves

close observation, creative interpretation, and constant questioning of findings.

Groundbreaking in its first edition and established as the definitive text in its second and third, the fourth edition of Agroecology captures recent developments in the field and forcefully applies the idea that agroecology is a science, a movement, and a practice. Written by a team of experts, this book will encourage students and practitioners to consider the critical

importance of transitioning to a new paradigm for food and agriculture.

Performance Attribution: History and Progress Springer

This complete revision of Applied Process Design for Chemical and Petrochemical Plants, Volume 1 builds upon Ernest E. Ludwig's classic text to further enhance its use as a chemical engineering process design manual of methods and proven fundamentals. This new edition includes important supplemental

mechanical and related data, nomographs and charts. Also included within are improved techniques and fundamental methodologies, to guide the engineer in designing process equipment and applying chemical processes to properly detailed equipment. All three volumes of Applied Process Design for Chemical and Petrochemical Plants serve the practicing engineer by providing organized design procedures, details on the

equipment suitable for application selection, and charts in readily usable form. Process engineers, designers, and operators will find more chemical petrochemical plant design data in: Volume 2, Third Edition, which covers distillation and packed towers as well as material on azeotropes and ideal/non-ideal systems. Volume 3, Third Edition, which covers heat transfer, refrigeration systems, compression surge drums, and mechanical drivers. A. Kayode Coker, is

Chairman of Chemical & Process Engineering Technology department at Jubail Industrial College in Saudi Arabia. He's both a chartered scientist and a chartered chemical engineer for more than 15 years. and an author of Fortran Programs for Chemical Process Design, Analysis and Simulation, Gulf Publishing Co., and Modeling of Chemical Kinetics and Reactor Design, Butterworth-Heinemann. - Provides improved design manuals for methods and proven fundamentals of process

design with related data and charts - Covers a complete range of basic day-to-day petrochemical operation topics with new material on significant industry changes since 1995.

Principles of Engineering Economic Analysis John Wiley & Sons

The objective of performance attribution is to explain portfolio performance relative to a benchmark, identify the sources of excess return, and relate those sources to active decisions by the

portfolio manager. This review charts the development of attribution from its beginning with Fama decomposition in the 1970s, through its foundations in the 1980s, into its issues of multiperiod and multicurrency attribution in the 1990s, and ending on its more detailed models for fixed-income and risk-adjusted attribution in recent years. Types of attribution (including returns based, holdings based, and transaction based) are

also discussed as is money-weighted attribution and developments associated with notional funds. *Agroecology* AKVY PRESS The landscape of commodity markets has drastically changed in recent years. Once a market of refineries and mines, it has become the market of investment funds and commodity trading advisors. Given this transformation, are commodity investments still as beneficial as 20 or 30 years ago? This book is an attempt to answer

these questions.

Annual Report to the Congress and the President

Wiley-Liss Stephen Gliessman's complementary volumes, *Agroecology: The Ecology of Sustainable Food Systems*, Third Edition and *Field and Laboratory Investigations in Agroecology*, Third Edition are now available together for one low price. Completely revised, updated, and reworked, the third edition of *Agroecology* presents new data, material, case studies, and options, as

well as more emphasis on topics such as the values, beliefs, and ethics of sustainable food systems. The new edition of *Field and Laboratory Investigations in Agroecology* facilitates hands-on, experimental learning that involves close observation, creative interpretation, and constant questioning of findings.

This book analyses investment management policies for institutional investors. It is composed

of four parts. The first one analyses the various types of institutional investors, institutions which, with different objectives, professionally manage portfolios of financial and real assets on behalf of a wide variety of individuals. This part goes on with an in-depth analysis of the economic, technical and regulatory characteristics of the different types of investment funds and of other types of asset management products, which have a high rate of substitutability with

investment funds and represent their natural competitors. The second part of the book identifies and investigates the stages of the investment portfolio management. Given the importance of strategic asset allocation in explaining the ex post performance of any type of investment portfolio, this part provides an in-depth analysis of asset allocation methods, illustrating the different theoretical and operational solutions available to institutional investors. The third part

describes performance assessment, its breakdown and risk control, with an in-depth examination of performance evaluation techniques, returns-based style analysis approaches, and performance attribution models. Finally, the fourth part

deals with the subject of diversification into alternative asset classes, identifying the common characteristics and their possible role within the framework of investment management policies. This part analyses hedge funds, private equity, real estate, commodities, and

currency overlay techniques.
