NICHOLSON ERICKSON

Weekly Forklift Inspection Checklist

According to OSHA regulations, forklift inspections should be conducted on a daily basis at the start of the operator's shift. It is the operator's responsibility to fully inspect the forklift before it is placed into service and report any abnormalities to their supervisor. Operations that run multiple shifts are required to perform a pre-use inspection at the beginning of every shift. This book is a year's worth of daily inspections, for simple record retention. These are carbonless forms, for easy fill-in. This form is highly simplified, just a few simple initials for the employees. Help your business stay in compliance and keep your employee's safe with these books.
