JAXON BRYSON

Nicotinoid Insecticides and the Nicotinic Acetylcholine Receptor CRC Press
 Leading scholars in the field of social networks from diverse disciplines present the first systematic and comprehensive collection of current theories and empirical research on the informal connections that individuals have for support, help, and information from other people. Expanding on concepts originally formulated by Pierre Bourdieu and James Coleman, this seminal work will find an essential place with educators and students in the fields of social networks, rational choice theory, institutions, and the socioeconomics of poverty, labor markets, social psychology, and race. The volume is divided into three parts. The first segment clarifies social capital as a concept and explores its theoretical and operational bases. Additional segments provide brief accounts that place the development of social capital in the context of the family of capital theorists, and identify some critical but controversial perspectives and statements regarding social capital in the literature. The editors then make the argument for the network perspective, why and how such a perspective can clarify controversies and advance our understanding of a whole range of instrumental and expressive outcomes. Social Capital further provides a forum for ongoing research programs initiated by social scientists working at the crossroads of formal theory and new

methods. These scholars and programs share certain understandings and approaches in their analyses of social capital. They argue that social networks are the foundation of social capital. Social networks simultaneously capture individuals and social structure, thus serving as a vital conceptual link between actions and structural constraints, between micro- and macro-level analyses, and between relational and collective dynamic processes. They are further cognizant of the dual significance of the "structural" features of the social networks and the "resources" embedded in the networks as defining elements of social c

 Arthur Efland puts current debate and concerns in a well-researched historical perspective. He examines the institutional settings of art education throughout Western history, the social forces that have shaped it, and the evolution and impact of alternate streams of influence on present practice. A History of Art Education is the first book to treat the visual arts in relation to developments in general education. Particular emphasis is placed on the 19th and 20th centuries and on the social context that has affected our concept of art today. This book will be useful as a main text in history of art education courses, as a supplemental text in courses in art education methods and history of education, and as a valuable resource for students, professors, and researchers. "The book should become a standard reference tool for art educators at all levels of the field." —The Journal of Aesthetics and Art Criticism "Efland has filled a gap in historical

research on art education and made an important contribution to scholarship in the field."

—Studies in Art Education

Evolutionary Economic Geography Taylor & Francis

The tiny Tindims are like the Borrowers-on-Sea, who turn our everyday rubbish into treasure. Mother-and-daughter duo, prizewinning Sally Gardner and Lydia Corry, create a fun new world of characters and adventures in their empowering new series for 5-8 year olds inspiring conservation and inventive ways to recycle. 'What is rubbish today is treasure tomorrow.' Discover Rubbish Island which the Tindims have built entirely from things we have thrown away. Captain Spoons, Mug, Jug, Brew, Skittle and friends are busy recycling when Ethel B Dina is blown out to sea and the Tindims must launch a rescue operation with the help of some friendly fish and surprises along the way. Printed in dyslexia-friendly font with pictures on every page and perfect for the reluctant reader, the Tindims show keen young ecologists how to help protect our planet for the future. 'An idiosyncratic genius' THE TIMES 'Sally Gardner's tale unfolds with all the beautiful illogicality of a dream' FINANCIAL TIMES

The Tindims of Rubbish Island McGraw-Hill Education (UK)

This practical guide provides artists, conservators, curators, and other heritage professionals with tools for understanding, evaluating, and approaching the care and treatment of modern metals. The proliferation of new metals—such as stainless steels, aluminum alloys, and metallic

coatings—in modern and contemporary art and architecture has made the need for professionals who can address their conservation more critical than ever. This volume seeks to bridge the gap between the vast technical literature on metals and the pressing needs of conservators, curators, and other heritage professionals without a metallurgy background. It offers practical information in a simple and direct way, enabling curators, conservators, and artists alike to understand and evaluate the objects under their care. This invaluable reference reframes information formerly found only in specialized technical and industrial publications for the context of cultural heritage conservation. As the first book to address the properties, testing, and maintenance issues of the hundreds of metals and alloys available since the beginning of the twentieth century, it is destined to become an essential resource for conservators, artists, fabricators, curators, collectors, and anyone working with modern metals.

Professor Max Krott, Director of the Institute of Forest Policy and Nature Conservation at the University of Göttingen, Germany, introduces the most important political players and stakeholders, including the forest owners, the general population, forest workers and employees, forest associations and administration, as well as the media. He illustrates the political and regulatory instruments using examples in current forest policy. Forest Policy Analysis places a special emphasis on the informal processes that are indispensable in understanding practical politics. References made to current English and German-language publications on forest policy studies enable further information to be found with concern to special issues.

Forest Policy Analysis Bloomsbury Publishing

Constructive and resulting trusts have a long history in English law, and the law which governs them continues to develop as they are pressed into service to perform a wide variety of different functions, for example, to support the working of express trusts and other fiduciary relationships, to allocate family property rights, and to undo the consequences of commercial fraud. However, while their conceptual flexibility makes them enormously useful, it also makes them hard to understand. In the twelve essays collected in this volume, the authors shed new light on various aspects of the law governing constructive and resulting trusts, revisiting current controversies, bringing new historical material to the fore, and offering new theoretical perspectives.

Modern Metals in Cultural Heritage Springer Science & Business Media

This book examines social inclusion in the education sector in India for scheduled tribes (ST), denotified tribes and nomadic tribes. It investigates the gaps between what was promised to the marginalized sections in the constitution, and what has since been delivered. The volume: • Examines data from across the Indian states on ST and non-ST students in higher, primary and secondary education; • Analyses the success and failures of education policy at the central and state level; • Brings to the fore colonial roots of social exclusion in education. A major study, the volume will be of great interest to scholars and researchers of education, sociology and social anthropology, development studies and South Asian studies.

Cognitive Processes and Emotional Disorders Signal

First published in 1986. Routledge is an imprint of Taylor & Francis, an informa company.

EBOOK: Diagnosis-Related Groups in Europe: Moving towards transparency, efficiency and quality in hospitals Springer

'An important and timely book' from the Foreword by Stanley Johnson 'A complete and absorbing history of a decade of intense international politics offers many insights for future negotiators of sustainable solutions' Stephen Bass, International Institute for Environment and Development 'Skillfully navigates the jungle of forest politics, leaving us in no doubt that the verbal commitment to save the world's forests has yet to be translated into action on the ground. The way forward must clearly lie in political commitments and international cooperation if forests are to continue to preserve life on Earth' Francis Sullivan, World Wide Fund for Nature Global deforestation and its attendant processes - including soil degradation, climate change and the loss of biological diversity - emerged as international political issues during the 1980s, prompting politicians to seek consensus on programmes and policies for the conservation and sustainable management of forests. Yet global initiatives have been bedevilled by tensions between the North and South and between governments, industry, local communities and indigenous peoples. Meanwhile, rates of deforestation in the tropics are increasing, and international political efforts are demonstrably

failing. Forest Politics carefully traces the evolution of international cooperation on forests, from the inception of the controversial International Tropical Timber Organization and the failed Tropical Forestry Action Programme in the mid-1980s, to the creation of the Intergovernmental Panel on Forests in the mid-1990s. The book also provides a detailed analysis of the negotiating stances of the parties involved in the divisive negotiations that took place prior to the 1992 'Earth Summit' in Rio de Janeiro and the equally factious negotiations for the International Tropical Timber Agreement of 1994. It provides a fascinating insight into the nature of such processes, illustrating the difficulties that arise when concepts such as 'global commons' come into conflict with national sovereignty. Complete with annexes of important political documents, and making extensive use of primary source material and interviews with participants. Forest Politics presents case studies of all the major forest negotiations over the last 13 years. It is an essential reference point for policy makers, environmental campaigners and students, and required reading for all those who care about the future of the world's forests. David Humphreys is Research Fellow in Global Environmental Change at the Open University. Originally published in 1996

A History of Art Education Routledge

Aims to present state-of-the-art studies in the application of forecasting methodologies to such areas as sales, marketing, and strategic decision making. The topics in this title include: sales and marketing, forecasting, new product forecasting, judgmentally based forecasting, the application of surveys to forecasting, and more.

Ap4a and Other Dinucleoside Polyphosphates Taylor & Francis

Ap4A and Other Dinucleoside Polyphosphates is the first compilation of contributions from major investigators involved in studying the chemistry and biology of dinucleoside polyphosphates. The book features reviews and original research (including unpublished and anecdotal material) covering the whole area of dinucleoside polyphosphate research from its inception to the present day. Ap4A and Other Dinucleoside Polyphosphates will be a useful reference for biological scientists studying nucleotide metabolism, cell signalling, DNA replication and repair, and cellular response to stress.

Radiosonde Observations Springer

Lena and Amanda are best friends and star soccer players—but what happens when the thing they love most threatens to tear them apart? Soccer has always been a part of Lena and Amanda's friendship. For six years, they have been an unstoppable team on and off the field: best friends and great teammates. Amanda is sure they'll both make the varsity team in ninth grade and go on to win the state championship. But when Lena makes the cut and Amanda doesn't, everything seems uncertain, and Amanda worries that her best friend is leaving her behind. With Shutout, Brendan Halpin has created a powerful story of friendship, sportsmanship, and growing up.

The nature and purposes of land evaluation for forestry. Principles and basic concepts. Outline of procedures. Planning the evaluation. Forest land utilization types. Land use requirements. Surveys and specialized studies of land . Matching land use with land. Environmental impact. Economic and social analysis. Land suitability classification. Resentation of results.

Social Capital Springer Science & Business Media

Economic geographers increasingly consider the significance of history in shaping the contemporary socio-economic landscape, and increasingly believe that experiences and competencies, acquired over time by individuals and entities in particular localities, to a large degree determine present configurations as well as future regional trajectories. Attempts to trace, understand, and investigate the pathways from past to present have given rise to the thriving and exciting sub-field of Evolutionary Economic Geography (EEG). EEG highlights the important factors that initiate, inhibit, or consolidate the contextual settings and relationships in which regions and their respective agents, which comprise and shape economic activity and social reproduction, change over time. It has at its core the production and destruction of novelty in space, and the links between innovation and regional economic fortunes. The creation of knowledge, its movement and recombination within different regional ensembles of economic agents and institutions plays a critical role in the evolution of the space-economy. EEG provides a framework to disentangle the complexity of technological change and regional economic development based on a variety of theoretical and methodological approaches. In only a short time, EEG has established itself as a promising and rapidly evolving research framework with its focus on the

driving forces of regional development across various scales and its attempt to translate findings into public policy. This book advances the theoretical foundations of EEG, and demonstrates how EEG utilises and operationalises conceptual frameworks, both established and new. Contributions also point to future research avenues and extensions of EEG, attempting to build stronger ties between theory, empirical evidence, and relevance to policy. This book was originally published as a special issue of Regional Studies.

Forest Resource Information System JAI Press Incorporated

At the forefront of the cognitive revolution, renowned psychiatrist Aaron T. Beck turned to information processing in order to understand the sources, consequences, and cures of anxiety disorders and phobias. In the first half of this classic text, Beck elaborates on the clinical picture of anxiety disorders and phobias and presents an explanatory model to account for the rich complexity of these phenomena. Cognitive psychologist Gary Emery then details the therapeutic principles, strategies, and tactics developed on the basis of the cognitive model of anxiety disorders and phobias. This fifteenth anniversary edition of the foundational work on cognitive therapy features a new introduction by Beck, in which he offers an up-to-date appraisal of the current state of cognitive therapy and its application to the treatment of phobias and anxiety.

Schema Therapy Getty Publications

In light of the events of 2011, Real-Time Diplomacy examines how diplomacy has evolved as media have gradually reduced the time available to policy makers. It analyzes the workings of real-time diplomacy and the opportunities for media-centered diplomacy programs that bypass governments and directly engage foreign citizens.

Advances in Business and Management Forecasting Jossey-Bass

This book summarizes the current progress of bee researchers investigating the status of honey bees and possible reasons for their decline, providing a basis for establishing management methods that maintain colony health. Integrating discussion of Colony Collapse Disorder, the chapters provide information on the new microsporidian *Nosema ceranae* pathogens, the current status of the parasitic bee mites, updates on bee viruses, and the effects these problems are having on our important bee pollinators. The text also presents methods for diagnosing diseases and includes color illustrations and tables.

World Weather Program Routledge

Edited by Canada's premiere commentator on global affairs, this must-read for political junkies will show the quality of M&S's new Signal imprint: for everyone who wants to be well informed about international relations and the nature of the diplomacy in the age of Wikileaks. Inspired by Allan Gotlieb's capacity to reshape diplomacy for the times, the contributors to this volume grapple with the challenges of a digital age where information is everywhere and confidentiality is almost nowhere. With an introductory essay by renowned political scholar, writer, and commentator, Janice Gross Stein, the work is divided into 4 sections: Diplomacy with the United States in the Era of Wikileaks; The Professional Diplomat on Facebook; Personal Diplomacy in the Age of Twitter; and Where is Headquarters? Contributors include professional diplomats, award-winning journalist Andrew Cohen, former Globe and Mail editor and author Ed Greenspon, and Allan Gotlieb's wife and partner in 'social diplomacy', Sondra Gotlieb.

Constructive and Resulting Trusts MIT Press (MA)

This book looks at how an innovation in health care financing and administration, which originated in the United States, was greeted by numerous western European countries. In eleven original chapters, European experts offer in-depth examination of the rate, degree, and manner in which their countries adapted to Diagnosis-Related Groups (DRGs), an innovation adopted by the U.S. government to create incentives for increased hospital efficiency. Comparing and contrasting the varying levels of resources and activity committed to this innovation, this book provides a range of insights for those involved in managing and promoting innovation. In The Migration of Managerial Innovation, health care experts from Belgium, Denmark, England, France, Germany, Norway, Portugal, Switzerland, and Sweden offer brief descriptions of the way health care is organized and financed--and a detailed examination of the fate of DRGs--within each of their countries.
