 Argonauts--

foreign-born, technically skilled entrepreneurs who travel back and forth between Silicon Valley and their home countries-- seek their fortune in distant lands by launching companies far from established centers of skill and technology. Their story illuminates profound transformations in the global economy. Economic geographer AnnaLee Saxenian has followed this transformation , exploring one of its great paradoxes: how the "brain drain" has become "brain circulation," a powerful economic force for development of formerly peripheral regions. The new Argonauts-- armed with Silicon Valley experience and relationships and the ability to operate in two countries simultaneously-- quickly identify market opportunities, locate foreign partners, and manage cross-border business operations. The New Argonauts extends Saxenian's pioneering research into the dynamics of competition in Silicon Valley. The book brings a fresh perspective to the way that technology entrepreneurs build regional advantage in order to compete in global markets. Scholars, policymakers, and business leaders will benefit from

Saxenian's firsthand research into the investors and entrepreneurs who return home to start new companies while remaining tied to powerful economic and professional communities in the United States. For Americans accustomed to unchallenged economic domination, the fast-growing capabilities of China and India may seem threatening. But as Saxenian convincingly displays in this pathbreaking book, the Argonauts have made America richer, not poorer.

Originally published in 1895, this early work of psychology is both expensive and hard to find in its first edition. It contains Freud and Breuer's case studies of hysteria and their methods of psychoanalytic treatment. This is a fascinating work and is thoroughly recommended for anyone with an interest in the history of psychology. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

 An Egyptian priest that flourished in the third century BC, Manetho wrote 'Aegyptiaca' (History of Egypt), which provided a detailed history of his homeland to the Hellenic world.

Although his original texts are now largely lost, important remains have survived, transmitted to us as fragments from several ancient authors. For many centuries, before hieroglyphics could be read, Manetho's writings were one of the chief sources of information on Egyptian history. Delphi's Ancient Classics series provides eReaders with the wisdom of the Classical world, with both English translations and the original Latin and Greek texts. This comprehensive eBook presents Manetho's complete extant works, with illustrations, informative introductions and the usual Delphi bonus material. (Version 1) \* Beautifully illustrated with images relating to Manetho's life and works \* Features the complete extant works of Manetho, in both English translation and the original Greek and Latin fragments \* Concise introduction to 'Aegyptiaca' \* Includes W. G. Waddell's translations, previously appearing in the Loeb Classical Library edition of Manetho \* Excellent formatting of the texts \* Easily locate the works you want to read with individual contents tables \* Includes rare fragments of Manetho's other works, first time in digital print \*

Cette double identité spirituelle fait que le diable, les personnages curieux et étranges côtoient tout au long des siècles, dans le monde alpin et rhodanien, des hommes et des femmes de Dieu. Il n'est donc pas étonnant que l'histoire s'intéresse à ces phénomènes culturels qui sont porteurs d'éclairages sur les

sociétés d'hier à aujourd'hui. Ce livre vous offre ainsi un panorama bimillénaire sur l'affrontement entre le bien et le mal, entra la lumière et les ténèbres, en sachant qu'il n'est pas toujours facile de dire qui du sorcier ou de l'inquisiteur détient la vérité.

### **Etudes celtiques**

(With an Introduction by Aldous Huxley) In its Eastern aspects—Chinese, Hindu, and Japanese—Ze

n Buddhism has proved a puzzle, although a stimulating one, to the Western mind. Himself a Westerner, Dr. Benoit has approached it through an occidental manner of thinking. "For the first time, Dr. Benoit presents the traditional doctrine of Zen Buddhism in a language that is understandable to the Western world," says one of his Indian admirers, Swami Siddheswaran

anda. The author does not advocate a "conversion" to Eastern religion and philosophy. Rather, he would have Western psychological thinking and reasoning meet with oriental wisdom on an intellectual plane, in order to make it participate in the oriental understanding of the state of man in general. "I do not need to burn the Gospels in order to read Hui-neng," says Dr. Benoit. Zen, to

be quite exact, is not so much a doctrine as a hygiene of intelligent living. As such it is presented by the author, a practicing psychoanalyst . It is a way of breaking the deadlock into which the faulty functioning of our civilization has led us, of liberating us from the prevalent contemporary sickness, anxiety. This book provides the elements for reaching "satori," that modification of the internal functioning of

man which can be described as a state of unassailable serenity. This state, Dr. Benoit makes clear, is he truly "normal" one. How to develop intelligence and will so that this transformation of life can be achieved is the subject of this book. When the grass was taller : autobiography and the experience of childhood Paul John Eakin's earlier work Fictions in Autobiography

is a key text in autobiography studies. In it he proposed that the self that finds expression in autobiography is in fundamental ways a kind of fictive construct, a fiction articulated in a fiction. In this new book Eakin turns his attention to what he sees as the defining assumption of autobiography : that the story of the self does refer to a world of biographical and historical fact. Here he shows that

people write autobiography not in some private realm of the autonomous self but rather in strenuous engagement with the pressures that life in culture entails. In so demonstrating , he offers fresh readings of autobiographies by Roland Barthes, Nathalie Sarraute, William Maxwell, Henry James, Ronald Fraser, Richard Rodriguez, Henry Adams, Patricia Hampl, John Updike, James McConkey, and Lillian Hellman. In the introduction Eakin makes a case for reopening the file on reference in autobiography , and in the first chapter he establishes the complexity of the referential aesthetic of the genre, the intricate interplay of fact and fiction in such texts. In subsequent chapters he explores some of the major contexts of reference in autobiography : the biographical, the social and cultural, the historical, and finally, underlying all the rest, the somatic and temporal dimensions of the lived experience of identity. In his discussion of contemporary theories of the self, Eakin draws especially on cultural anthropology and developmental psychology.
