Geromaniseerde Spelling Van Het Sarnami Hindustin (Surinaams-Hindostaans) Walter de Gruyter

DHARMA and RELIGION are altogether different conceptions. Even as per the Oxford dictionary, 'DHARMA' means "eternal law of Universe" whereas 'RELIGION' means "a particular way of worship and faith." All of these rules, laws etc. [pertaining to Dharma] have been observed, understood and realised by the people known as Hindu and hence Dharma is known as Hindu Dharma. However, these rules-laws etc. are applicable to every human being (Manav) all over the world (Vishwa), not confined only to Hindus. Hence, Hindu Dharma is Manav Dharma or Vishwa Dharma - the global ethics applicable to the entire humankind. If we look at the things which are considered as very sacred/pious in Hindu Dharma, it can be seen that each one of them possesses special qualities which are quite unique and useful for humankind. The Hindu Sanskriti has a special feature of wishing the well-being of ALL human beings (not just Hindus).

Phylloxera Prabhat Prakashan

Focusing on the Hindustan Socialist Republican Army (HSRA), *A Revolutionary History* . . . delivers a fresh perspective on the ambitions, ideologies and practices of this influential organization formed by Chandrashekar Azad and Bhagat Singh, and inspired by transnational anti-imperial dissent. It is a new interpretation of the activities and political impact of the north Indian revolutionaries who advocated the use of political violence against the British. Kama Maclean contends that the actions of these revolutionaries had a direct impact on Congress politics and tested its policy of non-violence. In doing so she draws on visual culture studies, demonstrating the efficacy of imagery in constructing—as opposed to merely illustrating—historical narratives. Maclean analyses visual evidence alongside recently declassified government files, memoirs and interviews to elaborate on the complex relationships between the Congress and the HSRA, which were far less antagonistic than is frequently imagined.

Folklore in the Changing Times Alina Books

A historical investigation into the mysterious bug that wiped out the vineyards of, first, France and then Europe in the 1860s -- and how one young botanist, who had served an apprenticeship at Kew Gardens, eventually 'saved wine for the world'. Bordeaux, inexplicably began to wither and die. Panic seized France, and Jules-Emile Planchon, a botanist from Montpellier, was sent to investigate. Magnifying glass in hand, he discovered the roots of a dying vine covered in microscopic yellow insects. The tiny aphid would be named *Phylloxera vastatrix* -- 'the dry leaf devastator'. Where it had come from was utterly mysterious, but it advanced with the speed of an invading army. As the noblest vineyards of France came under biological siege, the world's greatest wine industry tottered on the brink of ruin. The grand owners fought the aphid with expensive insecticide, while peasant vignerons simply abandoned their ruined plots in despair. Within a few years the plague had spread across Europe, from Portugal to the Crimea. the parasite had accidentally been imported from America. He believed that only the introduction of American vines, which appeared to have developed a resistance to the aphid, could save France's vineyards. His opponents maintained that

this would merely assist the spread of the disease. Meanwhile, encouraged by the French government's offer of a prize of 300,000 gold francs for a remedy, increasingly bizarre suggestions flooded in, and many wine-growing regions came close to revolution as whole local economies were obliterated. Eventually Planchon and his supporters won the day, and phylloxera-resistant American vines were grafted onto European root-stock. Despite some setbacks -- the first fruits of transplanted American vines were universally pronounced undrinkable -- by 1914 all vines cultivated in France were hybrid Americans. of one of the earliest and most successful applications of science to an ecological disaster.

Kinship in Bangladesh HarperCollins Publishers

In Lucknow, the capital of India's most populous state, the stigmas and colonial legacies surrounding sexual propriety and population growth affect how Muslim women, often in poverty, cope with infertility. In *Infertility in a Crowded Country*, Holly Donahue Singh draws on interviews, observation, and autoethnographic perspectives in local communities and Lucknow's infertility clinics to examine access to technology and treatments and to explore how pop culture shapes the reproductive paths of women and their supporters through clinical spaces, health camps, religious sites, and adoption agencies. Donahue Singh finds that women are willing to transgress social and religious boundaries to seek healing. By focusing on interpersonal connections, *Infertility in a Crowded Country* provides a fascinating starting point for discussions of family, kinship, and gender; the global politics of reproduction and reproductive technologies; and ideologies and social practices around creating families.

"Provocative. Adams strips away Gandhi's saintly aura and explores the duality of India's most famous leader." —Financial Times
Jad Adams traces the course of Gandhi's multi-faceted life and the development of his religious, political, and social thinking over seven tumultuous decades: from his comfortable upbringing in a princely state in Gujarat; his early civil rights campaigns; his leadership through civil disobedience in the 1920s and 1930s that made him a world icon; and finally to his assassination by a Hindu extremist in 1948, only months after the birth of an independent India. An elegant and masterly account of one of the seminal figures of twentieth-century history, Adams presents for the first time the true story behind the man whose life may truly be said to have changed the world.

In this lyrical, exuberant tale, acclaimed Turkish author Elif Shafak, author of *The Island of Missing Trees* (a Reese's Book Club Pick), incarnates Rumi's timeless message of love. *The Forty Rules of Love* unfolds two tantalizing parallel narratives—one contemporary and the other set in the thirteenth century, when Rumi encountered his spiritual mentor, the whirling dervish known as Shams of Tabriz—that together explore the enduring power of Rumi's work. Ella Rubenstein is forty years old and unhappily married when she takes a job as a reader for a literary agent. Her first assignment is to read and report on *Sweet Blasphemy*, a novel written by a man named Aziz Zahara. Ella is mesmerized by his tale of Shams's search for Rumi and the dervish's role in transforming the successful but unhappy cleric into a committed mystic, passionate poet, and advocate of love. She is also taken with Shams's lessons, or rules, that offer insight into an ancient philosophy based on the

unity of all people and religions, and the presence of love in each and every one of us. As she reads on, she realizes that Rumi's story mirrors her own and that Zahara—like Shams—has come to set her free.

An extraordinary masterpiece written from personal experience, Middlemarch is a deep psychological observation of human nature that revolves around the issues of love, jealousy, and obligation. Eliot's feminist views are apparent through the novel: she stresses the fact that women should control their own lives.
