ZANDER HASSAN

Planet Mars Simon and Schuster

This volume collects papers from more than 70 U.S. and foreign experts, including astronauts, scientists, engineers, technologists, medical doctors, psychologists, and economists to share their views and thoughts on a human mission to Mars.

Life on Mars Penguin

In *Track Faults and Other Glitches*, journalist and author Nicholas Yong takes us on a journey into an alternate Singapore, where the impossible becomes real. Deep in the heart of the Zombie Civil Service, a secret meeting is held to pre-empt an impending disaster. In the heartlands, a devoted Shiba Inu — a dog breed from Japan — seeks the divine in her quest for answers. And what happens when an MRT train goes underground, and never comes back out? Haunting and dreamlike, this collection of 10 short stories transports you from the deeply familiar to the supernatural, exploring things that cannot and should not be.

The Martian Chronicles Praxis

A scientist with the Jet Propulsion Laboratory offers an inside look at the future of manned missions to Mars, tracing the history of Mars exploration and shedding new light on the future directions of expeditions to the Red Planet.

Go on a Mission to Mars Simon and Schuster

Discusses activities astronauts do while they're in space.

Once Upon a Time I Lived on Mars Simon and Schuster

This book gives a new insight of Mars by adopting an original outline based on history rather than on subtopic (atmosphere, surface, interior). It focuses on the past and present evolution of Mars and also incorporates all the recent results from the space missions of Mars Express, Spirit and Opportunity. This book goes to the heart of current planetological research, and illustrates it with many beautiful images. The authors describe the magnificent scenery on Mars. The authors introduce a new world and reveal the workings of the planet Mars, and they describe current research to prepare for future missions to Mars.

Life on Mars Soundscape Software Pty Ltd

The Apollo 11 astronaut invites young people to evaluate Mars as a potential planet for human colonization, and describes what Mars residents might experience while traveling to and living on the Red Planet.

Mission to Mars Scholastic Inc.

A fascinating account of space exploration with lavish cross-section illustrations by Stephen Biesty, covering early astronomy, rockets, the Space Race and the future of space-travel. Revisit the story of the Apollo 11 moon landing in time for the 50th anniversary! The extraordinary story of space exploration, from Galileo's telescope to the launch of the International Space Station - and beyond!

Martin Jenkins' accessible and wide-ranging narrative covers early astronomy, the history of flight, the Space Race, the day-to-day of astronauts in the International Space Station and the possibility of extraterrestrial life, and considers where future missions might take us. Stephen Biesty's magnificent cross-section illustrations lay bare the intricate workings of space probes and shuttles, the Mars Curiosity Rover, spacesuits and Soyuz rockets. Back matter includes a comprehensive timeline and glossary of terms. With hours' worth of detail to pore over, this is the perfect gift for all space enthusiasts, young or old.

Human Mission to Mars. Colonizing the Red Planet Science Adventures with Max th

"Last Day on Mars is thrillingly ambitious and imaginative. Like a lovechild of Gravity and The Martian, it's a rousing space opera for any age, meticulously researched and relentlessly paced, that balances action, science, humor, and most importantly, two compelling main characters in Liam and Phoebe. A fantastic start to an epic new series." —Soman Chainani, New York Times bestselling author of the School for Good and Evil series "Emerson's writing explodes off the page in this irresistible space adventure, filled with startling plot twists, diabolical aliens, and (my favorite!) courageous young heroes faced with an impossible task." —Lisa McMann, New York Times bestselling author of the Unwanteds series It is Earth year 2213—but, of course, there is no Earth anymore. Not since it was burned to a cinder by the sun, which has mysteriously begun the process of going supernova. The human race has fled to Mars, but this was only a temporary solution while we have prepared for a second trip: a one-hundred-fifty-year journey to a distant star, our best guess at where we might find a new home. Liam Saunders-Chang is one of the last humans left on Mars. The son of two scientists who have been racing against time to create technology vital to humanity's survival, Liam, along with his friend Phoebe, will be on the last starliner to depart before Mars, like Earth before it, is destroyed. Or so he thinks. Because before this day is over, Liam and Phoebe will make a series of profound discoveries about the nature of time and space and find out that the human race is just one of many in our universe locked in a dangerous struggle for survival.

Exploring Space Simon and Schuster

The Dangerous Snake and Reptile Club, with the help of a boy visiting the neighborhood, sets up equipment in the clubhouse in hopes of tracking flying saucers and making contact with aliens.

The Complete Short Stories and Famous Essays of Mark Twain Charlesbridge Publishing

The heart-warming story of a little boy who misses his mum from award-winning author-illustrator Simon James. The day that Stanley's mum had to go away, he decided to go to Mars. In his place, a not-very-well-behaved Martian arrived. He looked just like Stanley, but he wouldn't eat his vegetables, he wouldn't clean his teeth and he certainly didn't play nicely in the playground. Dad's not sure what Mum will think when she gets back. Will the martian still be there, or will the real Stanley get back in time? Simon James's gentle watercolour illustrations add depth and warmth to this charming story of Stanley who misses his mum. From award-winning author-illustrator Simon James, whose books for Walker include Dear Greenpeace and Rex. A charming and funny story that also subtly explores family relationships

The Mercury 13 Collins Big Cat

The search for life on Mars—and the moral issues confronting us as we prepare to send humans there Does life exist on Mars? The question has captivated humans for centuries, but today it has taken on new urgency. As space agencies gear up to send the first manned missions to the Red Planet, we have a responsibility to think deeply about what kinds of life may already dwell there—and whether we have the right to invite ourselves in. Telling the complete story of our ongoing quest to answer one of the most tantalizing questions in astronomy, David Weintraub grapples with the profound moral and ethical questions confronting us as we prepare to introduce an unpredictable new life form—ourselves—into the Martian biosphere. Now with an afterword that discusses the most recent discoveries, *Life on Mars* explains what we need to know before we go.

Curiosity: The Story of a Mars Rover Scholastic Paperbacks

Recognized as an exemplar text by the Common Core State Standards, this updated version of DISCOVERING MARS features a new cover and the latest information and discoveries about the red planet. Featuring incredible photos and new information about the latest research into Mars, this updated edition of DISCOVERING MARS covers everything about the great red planet, from past to present. Topics covered include myths and facts about life on Mars, a history of NASA's Mars research, including the Rover missions, and ideas about our potential future relationship with the planet. With its lively text narrative and beautiful color photos, students and teachers alike will enjoy learning everything there is to know about Mars.

Max Goes to the Moon Candlewick Press

Perfect for STEM and space storytimes, this musical mission to Mars will have young astronauts singing along as they learn the science of space travel. Explore the science behind a trip to Mars, from launch to landing on the Red Planet. Set to the tune of "The Farmer in the Dell," this jaunty journey follows five adorable, bobble-headed astronauts as they learn how to bathe in zero gravity, grow veggies in space, and entertain themselves on the six-month trip. Even the design of the book defies gravity, as text and art float free on the page, encouraging readers to turn the book sideways and upside-down.

Lets Go to Mars National Geographic Books

"This second edition of Max goes to Mars contains a set of fully updated Big Kid Boxes designed to incorporate the latest scientific discoveries about Mars."--title page verso.

Last Day on Mars Simon and Schuster

"This little mouse may well inspire some big dreams." —Kirkus Reviews on Mousetronaut Meteor the mousetronaut returns to outer space in this exciting story from #1 New York Times bestselling author, US Senator, and retired NASA astronaut commander Mark Kelly and renowned illustrator C.F. Payne. 3-2-1...blast off! The smallest member of the team, a mouse named Meteor, is back on board and ready to come to the rescue on an interplanetary adventure! With lively illustrations by award-winning artist C.F. Payne, this charming new mousetronaut adventure will inspire imaginations of all sizes! Includes detailed scientific back matter.

The Boy from Mars Capstone

This unique persuasive text takes the form of a fictional holiday to Mars, presenting factual information about the red planet. The text draws comparisons between Earth and Mars, and

considers aspects of space travel such as weightlessness and the lack of oxygen.

Mars Macmillan + ORM

The tranquility of Mars is disrupted by humans who want to conquer space, colonize the planet, and escape a doomed Earth.

Discovering Mars: The Amazing Story of the Red Planet Science Adventures with Max th Co-ordinates for a mission to Mars have been locked into your navigation computer. But there are a few things you need to know before getting there. Are you ready for the seven-month journey and the astronaut training program? The space food served on the rocket is hardly award-winning. Even when you arrive at your destination, the planet itself will not seem welcoming with its epic dust storms and its freezing winter temperatures. But the sunsets will be spectacular and Earth is just a green and blue speck away. Written as an explorer's guide and packed with scientific facts about our inspirational nearest neighbour, this book is guaranteed to inspire any young scientist. CONTENTS Learn about Mars: The adventure starts here - get your Mars vital stats, read about the history of Mars and its moons, and discover the differences between Earth and Mars. Find out which probes have landed on Mars before you. Be alert to all the potential dangers you will have to face. Make the journey: Read about the intensive training you will have to go through, find out what life will be like on-board your Spaceship, and how to stay fit and healthy. Here's what to expect when you arrive. Exploring Mars: How will you survive on Mars? What food can you grow? Discover the view from Mars and the incredible new landscape sights from your new home. Start the search for liquid water, and try to find clues of life on Mars - the answers may be hidden within the very rocks. Learn about terraforming Mars and the current potential theories for making the Red Planet more habitable in the future. Mission accomplished: Now read about some of the astronomers, scientists and inventors who have furthered our knowledge of Mars.

Max Goes to Jupiter Princeton University Press

This new edition is designed to accompany the multimedia planetarium show. Includes a new preface and a revised set of Big Kid Boxes.

Track Faults and Other Glitches: Stories of the impossible in Singapore Cosmology.com

For readers of *The Astronaut Wives Club*, *The Mercury 13* reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America's first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts, but they were summarily dismissed by the boys' club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so

small she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional hearings and

later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.
