Music and Ultra-modernism in France Headline

Music and Ultra-Modernism in France examines the priorities of three generational groupings: the pre-war Soci t Musicale Indpendente of Ravel and his circle, Les Six in the 1920s and Jeune France in 1936, and questions some of the stereotypes that characterise that period. It shows how Stravinsky worked closely with Ravel, Satie and Poulenc, inviting audiences and critics to

rethink what it meant to be modern, and how Emile Vuillermoz, L on Vallas and Henry Pruni res competed to shape Debussy's legacy. The book argues for the vitality of French music in the period 1913-39 and challenges the received view that the period and its musical culture lacked dynamism, innovation or serious musical debate.

Following career advice from James Bond author Ian Fleming, Harry Buckle became a journalist, and the '60's most read pop guru in the UK's Jackie Magazine, assigned the pen name Pete Lennon by the editor. This very funny but true story then follows him starting a music company, and somewhat to his surprise, bringing hit records to much of the wor

Musical Opinion and Music Trade Review Penguin UK
 First as a journalist and then a publicist at Warner Brothers Records for nearly twenty years, Barbara Charone has experienced, first-hand, the changes in the cultural landscape. *Access All Areas* is a personal, insightful and humorous memoir packed with stories of being on the cultural frontline, from first writing press releases on a typewriter driven by Tip Ex, then as a press officer for heavy metal bands taking the bus up to Donnington Festival with coffee, croissants and the much more popular sulfate. To taking on Madonna, an unknown girl from Detroit, and telling Smash Hits 'you don't have to run the piece if the single doesn't chart', and becoming a true pioneer in music, Charone continues to work with the biggest names in music, including Depeche Mode, Robert Plant, Foo Fighters and Mark Ronson at her agency MBCPR. The story of how a music-loving, budding journalist from a Chicago suburb became the defining music publicist of her generation, *Access All Areas* is a time capsule of the last fifty years, told through the lens of music.

It should have been a straightforward plan. When Seb Hunter turned his back on his cherished record collection in search of more nourishing sounds, rock'n'roll cold turkey was going to be the least of his problems. His simple aim was to try and feel passionate about classical music, and that meant starting at the very beginning- with a hallucinating German nun. What followed was a hilarious Euro-odyssey that included twenty different varieties of Austrian sausage, minstrels, eunuchs, several tellings-off and a night on the sauce with an off-duty conductor. Success in his quest, Seb thought, might confer a degree of

grown-up respectability, or even an unlikely air of sophistication. But he didn't realise that a passion for Black Sabbath didn't mean he couldn't also rock out to Bach . . .

He also swallows a harp, a saxophone, and a fiddle while trying to satisfy his voracious appetite for musical instruments. But when he swallows a teensy, tiny, little bitty bell, you won't believe what happens! This volume presents recent developments in the linguistics of humour. It depicts new theoretical proposals for capturing different humorous forms and phenomena central to humour research, thereby extending its scope. The 15 contributions critically survey and develop the existing interpretative models, or they postulate novel theoretical approaches to humour in order to better elucidate its workings. The collection of articles offers cutting-edge interdisciplinary explorations, encompassing various realms of linguistics (semantics, pragmatics, stylistics, cognitive linguistics, and language philosophy), as well as drawing on findings from other fields, primarily: sociology, psychology and anthropology. Thanks to careful overviews of the relevant background literature, the papers will be of use to not only researchers and academics but also students. Albeit focused on theoretical developments, rather than case studies, the volume is illustrated with interesting research data, such as the discourse of television programmes and series, films and stand-up comedy, as well as jokes.

In his eagerly awaited debut novel, critically acclaimed author Mark Kurlansky entertains readers with a brilliant story bursting with the vivid events and culinary delights—even recipes—that made bestsellers out of his nonfiction works *Cod*, *Salt*, and *1968*. Nathan woke up on a Friday morning with the unshakable sense that during this day he would commit a catastrophic error in judgment. Something had been written by the gods, and Nathan Seltzer knew this was one Friday that he would regret. . . . It's the

boom years of the 1980s, and life is closing in on Nathan Seltzer, who rarely travels beyond his suddenly gentrifying Lower East Side neighborhood. Between paralyzing bouts of claustrophobia, Nathan wonders whether he should cheat on his wife with Karoline, a German pastry maker whose parents may or may not have been Nazis. His father, Harry, is plotting with the 1960s boogaloo star Chow Mein Vega for the comeback of this dance craze. Meanwhile, a homicidal drug addict is terrorizing the neighborhood. With its cast of unforgettable characters, *Boogaloo on 2nd Avenue* is a comedy of cultures, of the old and the new, of Latinos, Jews, Sicilians, and Germans. It's about struggling to hold on to life in a rapidly changing world, about food and sex, and about how our lives are shaped by love and guilt.

This handbook tackles the understudied relationship between music and comedy cinema by analysing the nature, perception, and function of music from fresh perspectives. Its approach is not only multidisciplinary, but also interdisciplinary in its close examination of how music and other cinematic devices interact in the creation of comedy. The volume addresses gender representation, national identities, stylistic strategies, and employs inputs from cultural studies, musicology, music theory,

psychology, cognitivism, semiotics, formal and stylistic film analysis, and psychoanalysis. It is organised in four sections: general introductions, theoretical investigations, music and comedy within national cinemas, and exemplary case studies of films or authors.

The music of Shostakovich has been at the centre of interest of both the general public and dedicated scholars throughout the last twenty years. Most of the relevant literature, however, is of a biographical nature. The focus of this book is musical irony. It offers new methodologies for the semiotic analysis of music, and inspects the ironical messages in Shostakovich's music independently of political and biographical bias. Its approach to music is interdisciplinary, comparing musical devices with the artistic principles and literary analyses of satire, irony, parody and the grotesque. Each one of these is firstly inspected and

defined as a separate subject, independent of music. The results of these inspections are subsequently applied to music, firstly music in general and then more specifically to the music of Shostakovich. The composer's cultural and historical milieux are taken into account and, where relevant, inspected and analysed separately before their application to the music.

Shostakovich " Little Books of Music

Music gives specific meanings to our lives, but also to how we experience death; it forms a central part of death rituals, consoles survivors, and celebrates the deceased. *Music & Death* investigates different musical engagements with death. Its eleven essays examine a broad range of genres, styles and periods of Western music from the Middle Ages until the present day. This volume brings a variety of methodological approaches to bear on a broad, but non-exhaustive, range of music. These include musical rituals and intercessions on behalf of the departed. Chapters also focus on musicians' reactions to death, their ways of engaging with grief, anger and acceptance, and the public's reaction to the death of musicians. The genres covered include requiem settings, operas and ballets, arts songs, songs by Leonard Cohen and the B-52s, and instrumental music. There are also broader reflections regarding the psychological links between creative musical practice and the overcoming of grief, music's central role in shaping a specific lifestyle (of psychobillies) and the supposed universalism of Western art music (as exemplified by Brahms). The volume adds many new facets to the area of death studies, highlighting different aspects of "musical thanatology". It will appeal to those interested in the intersections between western music and theology, as well as scholars of anthropology and cultural studies.
