Come with us now to the first day of class to teach English in China. Both students and teacher's hearts pound with anticipation as students file into the room, chatting and pretending not to notice the foreign teacher standing behind his desk. But they can't help glancing at him anyway for a first look. Laughter mingles with the sound of books and chairs clanking together. A buzzer sounds in the hall, and Bill Burkett, affectionately known in China by his students as "Mr. Bill," begins. A Manual for

Teaching English in China takes us from the first day's buzzer through the first weeks, months, and semesters of teaching English in China, sharing numerous stories, laughs, interesting facts, and many effective ways of teaching ESL. A Manual for Teaching English in China is packed with Bill Burkett's practical ideas, methods, and teaching techniques that can actually be used to teach ESL anywhere. Bill Burkett recently returned from a seven year stint of teaching English in the universities and training schools of Henan, China. An internationally renowned public speaker, Burkett has lived in 46 nations in the last 43 years. He developed a strong interest in linguistics which was fueled by his close association with interpreters. In Chinese classrooms where he taught English, he conducted active research, experimenting and taking student polls. He concentrated on eliminating speech impediments and strong accents. His education, experiences, and research shaped his philosophy of teaching English as a Second Language and formed the basis of his first ESL book, A Manual for Teaching English in China. Following the manual is Secrets to Better English which reveals a proven method of teaching ESL without accent. Although Burkett's doctorate is in philosophy, his love is making a difference in his students' lives by teaching diction and the skills of speech.

English for Business Communication Teacher's Book John Benjamins Publishing

This book presents a critique of current English as a Business Lingua Franca (BELF) practices using research conducted in Bosnia and Herzegovina. The authors identify English communication behaviors that hinder or promote success in the workplace, and trace these back to curricula and teaching practices. The authors suggest which skills employers need and expect from employees, and question whether English courses concerned with general academic English skills and business vocabulary are sufficient training for linguistically-complex workplaces. The book also examines whether the focus on achieving native-like proficiency with high grammatical standards and a strong emphasis on form are adequately preparing students who aspire to use English in professional contexts as a means to 'get their job done'.

In today's competitive world, Spoken English is considered as a passport for success in life. The craze for learning spoken English has led to the growth of coaching institutes all over the country. This volume addresses two current gaps in pragmatics research in English as a lingua franca (ELF): Firstly, the contexts, approaches and theories of pragmatics generally that remain under-explored in studies of ELF speakers; secondly, the paucity of ELF pragmatics studies investigating Asia, despite its economic and geo-political importance and the role of English as a region-wide lingua franca. The volume draws together a range of pragmatics-related chapters contributed by leading experts in pragmatics, both in English as a lingua franca and more broadly. These either present new research that extends the current state of the field, or introduce approaches and theories from other areas of pragmatics that translate readily to analysis of ELF interaction. Five of the chapters are Asia-focused, examining pragmatic aspects of communication among Asian ELF users. The volume therefore offers scope for ELF pragmatics researchers to further broaden the field's theoretical and analytical horizons, and adds to the quantity of knowledge about pragmatics in ELF communication in Asia. Its publication raises the visibility of this research area within the broader field of pragmatics.
