For courses in nursing
ethics and law in
nursing programs at all
levels. Fully updated,
revised, and expanded,

the new edition of Legal and Ethical Issues in Nursing reflects current and emerging influences of the law, legal issues, and ethical issues on nursing practice. It addresses the expanding autonomous roles of nurses at all levels of education and licensure, and in all settings. It also reflects innovative health care delivery models, as well as new federal and state laws, including the ACA. This edition's new ethical scenarios more realistically integrate ethics with personal legal accountability, and encourage deeper reflection on connections between law and ethics. Popular features from previous editions are retained, including chapter previews, objectives,

key terms, application exercises, guidelines, chapter summaries, and "You Be the Judge" features at the end of each chapter.

The Necropsy Book

Mosby Incorporated
'Regulating Aged Care is a significant achievement and addresses areas of personal caring which do not usually receive attention. [It] is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people. . . [it] should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology.'

Alison M. Ball,

Sociology 'This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field.' International Social Security Review 'They have given us a fascinating case study here, rich in detail, and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion, and humor.' Malcolm Sparrow, Harvard University, US 'This book offers an intelligent and insightful account of the development of nursing home regulation in three countries England, the USA and Australia. But,

more than that, it intertwines theory and more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry, and what can be done to create systems of regulation which really work to produce improvement.' Kieran Walshe, University of Manchester, UK This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of

nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism, rather than defiance of regulators, are the greatest challenges for improving safety and quality of life for the elderly in care homes. *Regulating Aged Care* shows how good regulation and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious, sustained qualitative and quantitative data collections in both the regulatory literature and the aged care

literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book. *EPPP Secrets Study Guide* Nursesbooks.org "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need

know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nurseshdbk/>
