Psychiatry Review and Canadian
Certification Exam Preparation Guide is
the first exam preparation text intended
specifically for candidates taking the
Royal College of Physicians and
Surgeons of Canada (RCPSC) psychiatry
examination. This concise, single volume
review contains "Canadian-specific"

content so that readers need not modify
other sources, but may rely on it as their
primary source of preparation. The
volume is based on The American
Psychiatric Publishing Board Review
Guide for Psychiatry and cites only
validated sources used in other APP
books, so candidates can be assured of
its content integrity. It has been fully
updated, and it includes a multitude of
features that will appeal to harried
candidates: The information presented is
consistent with Canadian psychiatry
practice. References have been drawn

from the Canadian psychiatric literature, and laboratory units; medication names and doses, and the language employed are consistent with Canadian medicine and psychiatry; The volume is organized according to familiar DSM-IV classifications, allowing readers to quickly locate the most appropriate chapter. It does not neglect foundational knowledge, however, offering complete coverage of basic neuroanatomy as well as more advanced topics such as neuroimaging, psychopharmacology, and the cultural and legal aspects of psychiatric illness; Quick-reference tables summarizing diagnostic criteria for specific psychiatric disorders and other critical information are especially useful and abundant; and A rigorous 200-question practice exam and answer

guide provide a reality check for prospective exam takers. The exam's structure reflects the actual board examination, with question topics commingled, and candidates seeking additional questions and annotated answers to enhance their preparation are referred to additional online self-assessments. The Psychiatry Review and Canadian Certification Exam Preparation Guide represents the best of psychiatric scholarship, combined with insight into the RCPSC psychiatry exam, and a keen eye for presenting the necessary information in a logical, easy-to-remember manner. This one-stop resource is destined to become candidates' constant companion in the months leading up to the exam, and after.

MRCPsych Paper I One-Best-Item MCQs

Churchill Livingstone

This is a fully-updated, comprehensive guide for trainees preparing for the MRCPsych CASC exam (Clinical Assessment of Skills and Competencies). Success in the CASC is the final step in being awarded the MRCPsych qualification, which signifies the physician has fulfilled the necessary training requirements and has passed the membership exams conducted by the Royal College of Psychiatrists. The book is presented in a clear layout and covers the full range of psychiatry subspecialties likely to be encountered on exam day.

Psychiatry Review and Canadian Certification Exam Preparation Guide CRC Press

Comprising of 400 MCQs, this book provides essential revision content to help you pass the recently introduced MRCPsych Paper A. The most recent guidelines for the new curriculum have been followed in compiling the content. MCQs for the New MRCPsych Paper A with Answers Explained is an invaluable aid for all candidates for the examination of the Royal College of Psychiatrists. Other clinicians and undergraduate students in medicine and health sciences will also find it useful.

Extended Matching Items for the MRCPsych CRC Press

Based on the popular examination techniques course, the authors have produced a concise, practical and comprehensive book covering all aspects of the examinations. It encompasses

recent changes in the structure and curricula of the Part I and II examinations. This book aims to provide candidates with the techniques needed to present their knowledge in a structured and professional way, in both the clinical and written examinations of the MRCPsych. Tells the candidate how to organise him/herself and how to present knowledge effectively, both in the written and oral exams - other books concentrate on factual knowledge rather than technique Covers learning styles and revision strategies Gives advice on all parts of the examination - ISQ/EMI, critical review paper, essay technique, clinical assessment, patient management problems Takes account of changes in the exam, notably changes away from a traditional MCQ exam to a

format using Individual Statements and Extended Matched Items (ISQ's and EMI's). The dropping of the Part 1 clinical is another very significant change to the examination, and the replacement of this by the OSCE (Objective structured clinical examination) exam means that two entirely new chapters have been provided. In addition, some changes have occurred to the Patient Management Problems - which are now more structured and have been reamed the structured objective examination. Although the techniques required are similar, the existing chapter addressing these has been updated.

Revision Guide for MRCPsych Paper

A Saunders Limited

Over 90% of contact between patients and doctors takes place in general

practice making it a valuable research arena but many members of the primary care team are unaware of the opportunities for them to do research. This book provides information on the research options for individuals and practices and describes research work undertaken recently by GPs and their teams in a variety of practice settings. It is easy to read and assumes no previous knowledge of the subject. It is ideal for GPs and all members of the primary healthcare team especially practice and community nurses GP registrars and pharmacists. *Research Opportunities in Primary Care* covers everything from being part of a research network to undertaking a higher degree and describes the impact of research involvement on the professional and the

practice. Sections of each chapter are written by people actually doing research in this setting to give a "hands on" feel of what it means in practical terms. This new text creates a set of practical notes enhanced by specific examples of service-based activity. It complements *Research Methods in Primary Care* which introduces the range of relevant skills to provide a solid basis for starting research.

MRCPsych Paper 2: 600 MCQs Cambridge University Press

A comprehensive and accessible guide to passing the CASC, the MRCPsych practical examination.

The Maudsley Trainee Guide to the CASC Taylor & Francis

This text covers the key information necessary to pass Paper B of the postgraduate examination and become a member of the Royal College of Psychiatrists (MRCPsych). It provides candidates with comprehensive coverage of the Paper B syllabus,

including information from a wide variety of sources to save candidates crucial time during exam revision. The content is accessible and presented in manageable sections, highlighting key information using tables, lists and graphics. This text is essential for psychiatry trainees revising for their written examinations and is also suitable for individuals/healthcare professionals with an interest in psychiatry and a desire to learn more.

How to Pass the MRCPsych CASC CRC Press

The new MRCPsych examination has changed significantly. Instead of two distinct parts, there are now three written papers and one clinical exam. This book is completely up-to-date and takes into account the new format. It

provides 250 practice best-of-five multiple choice questions (MCQs) and 100 extended matching items questions (EMIs) for Paper I. It contains clear, concise solutions to each question as an aid to revision. It is comprehensive and authoritative, with both authors being members of the Psychiatric Trainee's Committee of the Royal College of Psychiatrists. As well as being an essential revision aid for candidates sitting Paper I, it is also useful when preparing for Papers II and III because of the many similarly themed questions.

The Doctor's Guide to Critical Appraisal American Psychiatric Pub

A newly-prepared revision guide tailored to the brand new Clinical Assessment of Skills and Competencies (CASC) portion of the MRCPsych exam, containing over

100 clinical scenarios and accompanied by the ideal 'answers' examiners will be looking for.

Get Through MRCPsych Part 2: Clinical Exam: Long Case Presentations CRC Press
