The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those

instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

From Conduct to Character, 4th Edition  
Oxford University Press, USA

The decisions today's students make ripple outward to their immediate family and school community. How can we help students make the right decisions and do the right things? Test preparation and academic rigor alone cannot help our students learn well. Metal detectors and surveillance equipment alone cannot keep schools safe. Learning and safety are inextricably connected to the fundamentals of character and conduct. When we help students make the connection between character and conduct, we begin to offer them a safe environment conducive to learning. In Connecting Character to Conduct, the authors show how to connect

character, conduct, and your school's curriculum. By adopting the principles of respect, impulse control, compassion, and equity, the school community—including bus drivers, cafeteria workers, students, parents, teachers, and principals—can promote safety and learning inside and beyond the school walls. These guiding principles are not an add-on to an already full curriculum. Through their connection to moral development, language arts, systems, citizenship, and discipline, they are part of a standards-driven curriculum and instructional program. The authors, with expertise as classroom teachers, administrators, counselors, and psychologists, show you how students at all grade levels can succeed and learn to do the right things. Our students depend on us to help them learn and stay safe. Their future, and ours, depends on how well we succeed. Note: This product listing is for the

Taken from published reviews: " Dr Blackburn has written a remarkably good book; indeed, the best book on the topic from either side of the Atlantic I have read. the breadth of the author s knowledge is nothing short of encyclopaedic. Not only psychology developmental and social, as well as clinical but also psychiatry, biology, philosophy, and law are addressed in this volume. Finally, the book is written with clarity, economy, and a lucid style. It is as inviting and user-friendly as any work of such complexity can be. I hope that it will find its way into psychiatry residency training programmes as well. It could do wonders for replacing turf-battles with common ground." Criminal Behaviour & Mental Health " The scholarly breadth and accuracy of this work are remarkable. There seems to be no important contribution to our psychological understanding of crime which Blackburn has omitted to discuss, including those

approaches from sociological and social psychology which are frequently neglected in straightforward psychological treatments. Moreover, all approaches are intelligently and sympathetically discussed." Expert Evidence " The volume is infused with the author s enthusiasm for a social cognitive perspective on offending behaviour, but he also robustly defends the utility of the notion of personality traits. Overall, this book brings together a vast array of research and theory examined from the perspective of the clinician involved with the individual. It will almost certainly become the key background text for post-graduate courses teaching forensic psychology and would be a valuable addition to the bookshelf of any clinician with forensic concerns." Clinical Psychology Forum " This is undoubtedly an important book. The end result is a book of excellent quality, which I recommend most warmly to clinical psychologists, and indeed, to anybody who is interested in criminological psychology ." Behaviour Research and Therapy " This author is to be congratulated for having produced this

impressive volume. It provides a comprehensive review which is critical yet well-balanced. It assumes no prior familiarity with the field, and specialists from many different disciplines will learn a great deal from it." Excerpt from *Morals Manners: Or Elements of Character and Conduct*  
Moral acts are not only the most frequent and most important, but they are also most difficult to instill. It is comparatively easy to teach most children the fundamental facts of any subject. It is a far more difficult undertaking to teach them what is right and train them to do right because it is right, and to avoid the wrong because it is wrong. If moral actions are most frequent, most important, and most difficult, surely there is good reason for urging that the elements of morals be taught systematically to every child, both in school and at home.  Muslims all over the world see Muhammad as God's last messenger to mankind. Through his actions, he showed the way to live a life that provides for all the needs of body, mind, and soul, and elevates man's aspirations towards a sublime ideal in a very simple, direct, and truthful manner. He built a state that was dedicated to truth and justice and to the liberation of man throughout the world. He wrote to emperors, kings, and rulers, calling on them to believe in God and to follow His message, yet, at the same time, he lived a life of poverty, leaving aside the riches that were offered to him. At a time when the Prophet is much maligned by writers, cartoonists, and various other detractors, this book aims to show Muhammad's true character in detail, both in its most everyday and most extraordinary moments. Adil Salahi's writings include the acclaimed Muhammad: Man and Prophet and Pioneers of Islamic Scholarship, and the English translation of the eighteen-volume In the Shade of the Qur'an. His

main career has been in radio and print journalism, and for over thirty years he was editor of "Islam in Perspective," a twice-weekly full-page column in the Arab News, a Saudi daily newspaper.
