A Car Restoration Guide for Young Adults! For many, classic car restoration is more than just a hobby; it is a way of life. It is more than something people do in their garage in their spare time. There are thousands of classic car clubs all over the world devoted to people who restore cars as a hobby or a business. If you love automobiles, especially old classic cars, and you have never restored a vintage car, this book may be a life changer for you. You may find that there is nothing finer than turning a neglected piece of automotive history into a drivable and admirable work of art. Career Craft or Happy Hobby? Don't let this book drive away without getting in and taking a ride. Turn your love for custom classic cars into a great lifetime hobby... or even a lucrative and fulfilling career!

*Modifying the Electronics of Modern Classic Cars* Motorbooks

Modifying the Electronics of Modern Classic Cars is the complete guide to modifying the electronics of your modern classic car. Cars of the 1990s and 2000s have sufficient electronic systems to achieve great outcomes, but they're not so complex that they're impossible to modify. The missing link, until now, has been a hands-on manual on how to achieve those results. Well, here it is! This book covers everything from cheap modifications that

allow you to adjust engine fueling and ignition timing, to modifying car systems like power steering and even stability control. Easy upgrades to lighting, sound systems and the dashboard - right through to fitting and tuning programmable engine management. Photos and circuit diagrams guide you each step of the way. All the car modifications are practical, and have been tried and tested by the author. From a 660cc turbo front-wheel drive screaming to 8500rpm on standard engine management but with big injectors... to a DOHC V8 rear-wheel drive with modified traction control... to a twin-turbo all-wheel drive with a custom torque split controller. Even modifying the re-gen braking on a hybrid! Modifying the Electronics of Modern Classic Cars is essential reading for anyone who wants to exploit the true electronic potential of their 1990s-2000s cars.

Any custom automotive project begins with making choices. There are choices under the hood, such as which engine will match well with a certain chassis and transmission. There are aesthetic choices, like whether to use custom or stock wheels, what paint scheme will look best, and what type of interior will be comfortable as well as eye catching. Each decision involves an investment of money and time. Often what seems plausible in the imagination fails in execution. And only after spending hours of time and thousands of dollars does it become clear that something's not right. Street

Machines: Classic, Muscle, Modern is the ideal resource for anyone looking to build a powerful and stylish modified street machine.

Reproduction of famous classic collector car book on the early years of the classic Lincoln and Continental motorcars in 8.5x11 softback cover and in a black and white facsimile of author Marvin Arnold's widely acclaimed 1989 hardback cover coffee table edition. Of all the classic American motorcar manque stories, the story of the Lincoln personifies the American dream better than any other. The evolution of the Lincoln and Continental parallels the American automobile industry. Everyone who owns or appreciates fine motorcars like the Lincoln will enjoy reading this book. The book combines the story of the manque with the technical and developmental aspects of the automobile itself. The text is both interesting and factually informative. The appendixes to this book provide production figures and detailed information on the various models. Beginning with the coming of the automobile to the Americas in the late 1800s and concluding with the beginning of postwar automotive era, this book is an inside look at the forces, which began and ended the classic American automobile era. EARLY YEARS-Henry Martin Leland founds Cadillac and Lincoln. Henry Ford builds an automotive empire and his son, Edsel Ford, takes over Lincoln. The Model L Lincolns (1919-1930) are recognized as the finest coachbuilt motorcars in the world and become the aristocrats automobile in a time of opulence. CLASSIC YEARS-An era of Automobile Salons and custom coachbuilts. These are the chauffeur-driven Landaullets and Broughams, the Roadsters and Sedans of the rich and famous. The period of the Model K Lincoln (1931-1940) ushers in the V-12 engine and classic craftsmanship. The world is changing and soon these massive motorcars would give way to that progress and become the last of the big iron. STREAMLINE YEARS-These are the designs influenced by the age of Art Deco and aerodynamic appearances. The Zephyr automobile arrives (1935-1948), in an era of reconstruction and colossal World's Fairs. New manufacturing techniques, like unit body construction, create an all new model of automobile. From these designs evolve the famous Lincoln Continental, perceived today as the only modern classic. MODERN YEARS - America survives a world war and gets on with the business of building a better nation. These new designs are influenced by the tanks and bombers that preceded them. They are modern designs manufactured with an outdated technology. The bulbous era Lincolns and Cosmopolitans (1948-1951) are not yet the modern cars of today, but a major leap in the evolution to that end result.

Pontiac's GTO is often credited as being the first muscle car. As model year 1966 ended, an astounding 96,946 GTOs traversed Pontiac assembly lines, which set a high-water mark that would cement the GOAT as the most salable muscle car that was produced during the golden age of performance. Author David Bonaskiewich examines this model year in precise detail, taking into account every cosmetic change and optional hardware that warranted this sales boom. The Coke-bottle styling for the remodeled GTO certainly tipped the scales for some consumers. However, as they say, "The devil is in the details." This book delves into those details, showcasing the vast array of optional equipment across its three bodystyles (hardtop, sports coupe, and convertible). Thorough examinations of the drivetrain, interior, suspension, brakes, and wheels and tires are exhaustive, which unveils exactly why the 1966 GTO was the most successful muscle car ever assembled. Tune up those Tri-Power carburetors, turn on your favorite tune, and twist the key with 1966 Pontiac GTO: In Detail!

Whatever the vehicle--from classic hot rod to pick-up to chopper--a custom paint job sets it apart. But not all paint jobs are created equal, so how can you tell which style, technique, or scheme will suit the unique demands of your vehicle and budget? Before making a big investment--whether you're hiring a painter or doing the job yourself--turn to this book for a clear idea of what works and what doesn't. Drawing on years of experience running her own custom painting shop, JoAnn Bortles reviews the full array of options for paints, graphics, and effects. In an easygoing and engaging manner, and with photographs to illustrate her points, she explains the tools and techniques that apply in various paint schemes and shows what might work especially well in certain situations and for particular vehicles. Whether you're looking for inspiration, considering color combinations or graphics, or simply wondering what to look for in a local paint shop, this book will answer your questions--and help you get the custom paint job that's perfect for you.

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} There was a time when the Chevrolet Nova was considered a budget option, a model engineered primarily for the price-conscious customer. Certainly performance models were already in Chevrolet's fold. With the Camaro, the Corvette, and the Chevelle leading the way, why would Chevy need another performance model? Well, savvy Chevy customers knew that you could get a really tricked-out Nova right from the factory with SS packages and big-block 396 engines along with performance transmissions and gearing for a fair amount less than an equally equipped Camaro. As a bonus, Novas were lighter weight too. It was the performance bargain of the Chevy lineup. Fast forward to today. The first-generation Camaros cost a small fortune, and while Novas have held their value quite well, they are still a performance bargain compared to the other Chevy performance models of the era. Not only are they more affordable than Camaros, but you can do a whole lot to make them really fast. In Chevy Nova 1968-1974: How to Build and Modify, veteran author and Chevy expert Wayne Scraba shows you all you need to know to build a killer street or strip Nova. Included is detailed information on driveline upgrades, rear-suspension options for the ultimate hook, front-end suspension and chassis components for good handling and weight transfer, excellent brake upgrades, engine swap options, cooling system upgrades, and more. Focusing on quarter-mile performance, Scraba expertly covers all of your options for a strong-running street Nova, a street-strip combo package, or all-out drag racing options. If you want to build your Nova into a quarter-mile warrior, this book is an essential tool for success.
