Early childhood, from birth through school entry, was largely invisible worldwide as a policy concern for much of the twentieth century. Children, in the eyes of most countries, were 'appendages' of their parents or simply embedded in the larger family structure. The child did not emerge as a separate social entity until school age (typically six or seven). 'Africa's Future, Africa's Challenge: Early Childhood Care and Development in Sub-Saharan Africa' focuses on the 130 million children south of the Sahel in this 0-6 age group. This book, the first of its kind, presents a balanced collection of articles written by African and non-African authors ranging from field practitioners to academicians and from members of government organizations to those of nongovernmental and local organizations. 'Africa's Future, Africa's Challenge' compiles the latest data and viewpoints

on the state of Sub-Saharan Africa's children. Topics covered include the rationale for investing in young children, policy trends in early childhood development (ECD), historical perspectives of ECD in Sub-Saharan Africa including indigenous approaches, new threats from HIV/AIDS, and the importance of fathers in children's lives. The book also addresses policy development and ECD implementation issues; presents the ECD programming experience in several countries, highlighting best practices and challenges; and evaluates the impact of ECD programs in a number of countries.

Updated and enlarged, this groundbreaking collection surveys the major critical currents and approaches in drama, theater, and performance *The Death of Christian Culture* Macmillan
This book explores the issues involved in the sustainable financing of secondary education in developing countries, including a number of case studies from Asia, Latin America and Africa. It investigates current cost structures and carries out an analysis for different groups of countries, using data derived from the UNESCO database. It concludes with a discussion of the policy options available to promote improved access at sustainable levels of cost whilst maintaining levels of educational quality.

Bringing together an international group of researchers involved in military, business, and health modeling and simulation, Conceptual Modeling for Discrete-Event Simulation presents a comprehensive view of

the current state of the art in the field. The book addresses a host of issues, including: What is a conceptual model? How is conceptual model in *Commercial Directory* AuthorHouse

A “memorable series of portraits of the working class people who defended Tiananmen Square” (The New York Review of Books) during the protests from the award-winning poet, dissident, and “one of the most original and remarkable Chinese writers of our time” (Philip Gourevitch). Much has been written about the Tiananmen Square protests, but very little exists in the words of those who were actually there. For over seven years, Liao Yiwu—a master of contemporary Chinese literature, imprisoned and persecuted as a counter-revolutionary until he fled the country in 2011—secretly interviewed survivors of the devastating 1989 Tiananmen Square massacre. Tortured, imprisoned, and forced into silence and the margins of Chinese society for thirty years, their harrowing and unforgettable stories are now finally revealed in

this “indispensable historical document” (Kirkus Reviews, starred review).

This case study investigated the perceptions of the third year student teachers of the first year pre-service Mathematics programme at Seke Teachers' College in Zimbabwe. Student background characteristics of gender, age, teaching experience and Mathematics specialisation were the independent variables also investigated. Data was collected from 278 third year students enrolled for the general Diploma in Education course using questionnaires with a five point Likert type 33 item rating scale and open ended items. The data so collected were analysed both quantitatively and qualitatively. The findings indicated that although the programme was able to provide students with a foundation in subject knowledge more could be done to improve on

training in teaching methods and provision of resources. From the variables investigated gender was found to have an effect on students' perceptions of the programme but teaching experience was found to have no effect. The possible relationship between the independent variables of age and Mathematics specialisation and the dependent variable of students' perception of the programme was indicated in too few items to warrant a definite conclusion. Implications for the improvement of the programme are that there is need for the college to revisit some aspects of the structure and organisation of the programme. There is also need for further research involving all primary teachers' colleges.

This textbook gives you a broad overview of everything you will need to know to prepare for your initial teacher training and future career in the classroom. Covering practical issues including planning and assessment, and thought-provoking topics such as reflecting on your practice and developing critical

thinking skills, this textbook provides you with an insightful exploration of the realities of teaching in primary schools. This fourth edition has been comprehensively revised and includes five new chapters on: · Teacher wellbeing · The Early Career Framework (ECF) · Digital literacy and primary schools after the pandemic · Growth mindset, dialogue and P4C · Learning outside the classroom This is essential reading for all students on primary initial teacher education courses including university-based (PGCE, BEd, BA with QTS), and schools-based (School Direct, SCITT, Teach First) routes into teaching. Hilary Cooper is Professor Emeritus of History and Pedagogy at the University of Cumbria. Sally Elton-Chalcraft is Professor of Social Justice in Education and also the Director of the Learning Education and Development Research centre in the Institute of Education at the University of Cumbria. [Zaire](#) University of Michigan Press Set during the French Revolution, this "riveting historical novel" ("The New Yorker") is the story of three young provincials

who together helped destroy a way of life and, in the process, destroyed themselves. *Dissertation Abstracts International* HSRC Press Currently we are at the beginnings of widespread wireless connectivity and ubiquitous computing. The Web is merging with a variety of technologies: cell phones, laptop computers, hand held organisers, information appliances, and GPS and other sensors. The capability for access anytime and anywhere is here. The increasing frequency of cell phone calls at inappropriate times testifies that people no longer can easily control access. Devices can determine where they are located and can make a range of information available to users as well as make users available to others or their devices. We have proposed a general technique that promises to assist in mediating access. It capitalises on advantages afforded by computation (Hollan & Stometta, 1992). We first described the negotiation technique in the context of problems involved in scheduling meetings and then showed that similar issues, which at first may seem unrelated but in fact

have much in common, arise in other contexts. One such activity, gaining immediate access, is currently of growing importance because of expanding connectivity via wireless technology. Cell phones and related technologies make it possible to be constantly available for synchronous interaction. At times, this can be advantageous but the associated costs and benefits result in a complex tradeoff space for designers as well as users.

Professional Studies in Primary Education Unesco After decades of civil war and instability, the African country of Angola is experiencing a spectacular economic boom thanks to its most valuable natural resource: oil. Focusing on the everyday realities of people living in the extraction zones, Reed explores the exclusion, degradation, and violence that are the fruits of petrocapi-talism in Angola.
