Jet Random House Trade Paperbacks

Indianapolis Monthly is the Circle City's essential chronicle and guide, an indispensable authority on what's new and what's news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy's cultural landscape.

Report of the Director of the Bureau of Safety to the Interstate Commerce Commission Kalmbach Publishing Co

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global

circulation of any African American-focused magazine.

Meyer Distributing 2008 Dundurn

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-

saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

Ebony Let's Move

Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. 101 Performance Projects for Your Pickup and SUV

In *The Progress Paradox*, Gregg Easterbrook draws upon three decades of wide-ranging research and thinking to make the persuasive assertion that almost all aspects of Western life have vastly improved in the past century—and yet today, most men and women feel less happy than in previous generations. Detailing the emerging science of “positive psychology,” which seeks to understand what causes a person's sense of well-being,

Easterbrook offers an alternative to our culture of crisis and complaint. He makes a compelling case that optimism, gratitude, and acts of forgiveness not only make modern life more fulfilling but are actually in our self-interest. An affirming and constructive way of seeing life anew, *The Progress Paradox* will change the way you think about your place in the world—and about our collective ability to make it better.

Atlanta Magazine

The concept and prototype cars that are shown at major industry events feature cutting-edge technologies that the automotive industry wishes to preview. Often these technologies make an appearance in future production models. *Concept Car Year in Review: 2013* provides insight to the key engineering ideas that were introduced in concept and prototype cars during that year. This full-color book includes articles that were previously published and written by the award-winning editors of *Automotive Engineering International* about these concept cars. This book provides a preview of the technologies we could experience in our vehicles in the future. It gives the reader an inside glimpse of how new ideas for vehicles are formed and how they are implemented into the cars we drive. Published for enthusiasts who are interested in future car models and their technologies, as well as practicing automotive engineers who are interested in new engineering trends such as hybrid systems, powertrain designs, automotive design, lightweighting, and materials, and new engineers who want an overview of future trends, *Concept Car in Review: 2013* also:

- Provides one place where readers can find information on key engineering trends over one year.
- Allows readers to easily find specific car models

or read about all of them. • Includes interviews with engineering innovators who pioneer technologies in concept cars. • Features many large, full-color images and an attractive magazine format.

The Progress Paradox

"Kids know exercise is good for them. But they might not know there are different kinds of exercise ... This book presents easy to follow endurance and muscle strengthening exercises for kids plus informational notes for adults who dare to join in on fitness for a lifetime."--

Popular Mechanics

"Pickup" and "sports utility vehicle" seem like quaint names for these workhorses. More and more, they're what people tune up, trick out, and take on the road (or off). This book aims to help drivers make the most of their machines. With 101 projects running the gamut from installing light bars and brush guards to gearing up for hard-core horsepower and high-performance feats, this book will show truck and SUV owners of all stripes how to personalize their rides. 101 Performance Projects for Your Pickup and SUV offers easy-to-follow, clearly illustrated how-to information on everything from appearance modifications to more extensive upgrades, with plenty of instructions for the many bolt-on solutions that are available in the marketplace. Planning, tools, expenses, pros, and cons: it's all here. The author walks owners through the nuts and bolts of lowering and lift kits, running boards and in-car entertainment systems, winches, wheels and tires, and the full range of installations and accessories that will take a truck or an SUV to the next level.

Library of Practical Electricity

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern

Californian.

Ebony

Is power the next great running metric? According to Stryd (who sell a power footpod), the number of runners uploading power data from the World Marathon Majors has doubled every year since 2016. And all of the major running watch manufacturers include wrist-based power in their new models. Is Running with Power a magic bullet? or a passing fad? It's neither. Running with Power gives you the greatest chance of achieving your best performance, while minimising injury risk. What is Running with Power? Running with Power uses power rather than pace or heart rate to gauge your running intensity. It can appear complicated at first - that's because power is based on how your body reacts when you exercise, and those reactions are themselves complex.

But power is also simple. It's the distilled wisdom of decades of research and practice, presented as a set of powerful concepts that can be used to guide your training and your racing more effectively than other measures of intensity. This book explains and explores each concept using straightforward language and an easy-to-follow structure. If you're looking for a practical, experience-based guide to Running with Power, this book can be that guide.
