BRANSON ELLIANA

The History of Serbian Culture Van Nostrand Reinhold Company
A startling expos of Britain's growing addiction to television and why and what should be done to stop it, the author looks at the statistics that show television has become an obsession even more influential than parents inside the household. In this insightful and shockingly perceptive assessment of the relationship with the small screen, the author reveals the alarming reality of what television is actually doing physically, emotionally, intellectually, and socially. He provides evidence as to how television contributes to the rising global obesity rate by actually slowing our metabolic rate, stunts children's brain

development, and is responsible for over half of all rapes and murders in the industrialized world.

Gateway A2 Workbook Cambridge University Press

An innovative, five-level beginner's course for young learners from the age of 10. Tried, tested, trusted ... and now even better!

Gateway. A2 : Teacher's book Cambridge University Press

The book aims at providing an overview of the main economic issues related to tourism activities. While tourism is an important sector, contributing to more than 10% of the European Union's GDP, research and teaching at the university level has only recently grown to a considerable level, and the field still lacks a firm research methodology. This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets, with asymmetric and

incomplete information among agents, bounded rationality, and with a strong presence of externalities and public goods. The economic issues studied in the book are approached both intuitively, largely using examples and case studies, and formally, with mathematical formalizations in text boxes.

Gramatika engleskog jezika Bloomsbury Publishing

This book provides a wide-ranging overview of the current state of tourist destination management and presents important recent research in the field. Contemporary theoretical and methodological approaches to management and marketing are discussed, and innovative practices with respect to both urban and rural destinations are described with the aid of many interesting case studies from across Europe and beyond. In addition, the volume addresses key issues such as governance, cooperation, the use of social media, and sustainability. A variety of influences on tourism development are examined, and efficient strategies for making destinations distinct are explored. The book will be a welcome addition and update to the existing literature and will be of interest to academics and practitioners alike.

This book studies the structure and origins of *De Rerum Natura* (On the nature of things), the great first-century BC poem by Lucretius. By showing how he worked from the literary model set by the Greek poet Empedocles but under the philosophical inspiration of the Greek philosopher Epicurus, the book seeks to characterise Lucretius' unique poetic achievement. It is addressed to those interested both in Latin poetry and in ancient Greek and Roman philosophy.
