In an age where television and computers seem to encroach in every part of our lives, there is something wonderfully simple about paper dolls. With no gimmicks, materials, techniques, or tools required (except for

a pair of scissors), you can create your very own fashion parade with this lavish collection of outfits and accessories. See how clothes have changed over time, from the fashions of Ancient Egypt and Rome, to the flamboyant finery of Elizabethan dress to the more recent fashions of the sixties, seventies, and eighties. Simply cut out the two dolls and their stands and then you are

ready to start cutting out the different outfits. Each costume has tabs to hold in place on the doll. In addition there are two pages of fun accessories stickers so you can complete the outfits with shoes, bags, and headpieces. Now you're ready to go!

No single project or endeavour is immune to the issues that the

climate crisis brings. The climate crisis encompasses a broad register of "symptoms" – increased global temperatures and sea-level rise, droughts and extreme bushfire events, salinification and desertification of fertile land, and the list goes on. It reveals and amplifies complex causal relationships that are inherently present and traverse scales, sectors and communities divulging a range of impacts and inequalities. This publication asks

designers and academic practitioners to describe their own work through an ecological lens, and then to articulate design approaches for developing new practices in landscape architecture teaching. Designing Landscape Architectural Education: Studio Ecologies for Unpredictable Futures, the Landscape Architecture Design Studio Companion, serves as a resource for academic practitioners in the preparation and delivery of "design-

research studios" and students seeking guidance for design methodologies as a part of their landscape architectural education. It draws on the manifold issues of the climate crisis as a set of drivers to examine the utilisation of a range of innovative design approaches to address the current and future priorities of the discipline. The landscape architecture discipline is evolving rapidly to respond to both a broadening and intensification of changes

in the environmental, social and political conditions. These changing conditions require innovation that extend the core competencies of landscape architects. This book addresses two fundamental questions - what are the design competencies required of landscape architects to equip them to deal with the complexities brought forth by contemporary society, and as a result, how could we design the future design studio?

Farah feels alone, even when surrounded by her classmates. She listens and nods but doesn't speak. It's hard being the new kid in school, especially when you're from another country and don't know the language. Then, on a field trip to an apple orchard, Farah discovers there are lots of things that sound the same as they did at home, from dogs crunching their food to the ripple of friendly laughter. As she helps the class make apple cider,

Farah connects with the other students and begins to feel that she belongs. Ted Lewin's gorgeous sun-drenched paintings and Eve Bunting's sensitive text immediately put the reader into another child's shoes in this timely story of a young Muslim immigrant. [Activated Script Analysis](#)

A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now

comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful

and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own backstory. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask.

Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

This book contains refereed and improved papers presented at the 5th International Workshop on Graphics Recognition (GREC 2003). GREC 2003

was held in the Computer Vision Center, in Barcelona (Spain) during July 30–31, 2003.

The GREC workshop is the main activity of the APR-TC10, the Technical 2 Committee on Graphics Recognition. Edited volumes from the previous workshops in the series are available as Lecture Notes in Computer Science: LNCS Volume 1072 (GREC 1995 at Penn State University, USA), LNCS Volume 1389 (GREC 1997 in Nancy, France), LNCS Volume 1941 (GREC 1999 in

Jaipur, India), and LNCS Volume 2390 (GREC 2001 in Kingston, Canada). Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents, either from paper or electronic formats. Topics of interest for the graphics recognition community are: vectorization; symbol recognition; analysis of graphic documents with agrammatic notation like

electrical diagrams, architectural plans, engineering drawings, musical scores, maps, etc. ; graphics-based information retrieval; performance evaluation in graphics recognition; and systems for graphics recognition. In addition to the classic objectives, in recent years graphics recognition has faced up to new and promising perspectives, some of them in conjunction with other, active scientific communities. Examples of that are sketchy interfaces and on-line

graphics recognition in the framework of human computer interaction, or query by graphic content for retrieval and browsing in large-format graphic documents, digital libraries and Web applications. Thus, the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community, with a promising future. Radical Play Seven Seas Netflix's series adaptation of One Hundred Years of Solitude premieres December 11, 2024! One

of the twentieth century's enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendía family. Rich and brilliant, it is a chronicle of life, death, and the tragicomedy of humankind. In the beautiful, ridiculous, and tawdry story of the

Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility, the variety of life, the endlessness of death, the search for peace and truth—these universal themes dominate the novel. Alternately reverential and comical, *One Hundred Years of Solitude* weaves the political, personal, and spiritual to bring a new consciousness to

storytelling. Translated into dozens of languages, this stunning work is no less than an account of the history of the human race.

 Classroom Boredom Busters is a blast of activities and creative ideas that will shatter tedium and inject excitement into ho-hum lessons that often cause students to complain that school is boring. This unique collection of strategies is the wake-up siren that many students need to get excited about

learning and to motivate them to participate in the classroom. Activities in this book are designed to appeal to students while offering teachers a variety of detours to deadly dull test reviews, tricky note-taking sessions, awkward class discussions, and many other common classroom potholes. This book is organized into eight parts, each complete with a menu of original ideas that evolved from the author's experience in the classroom at the elementary, middle, and

high-school levels. Busy teachers will appreciate the convenience of pulling this collection off the shelf and turning to activities that require little or no planning and no elaborate school supplies. All ideas have been teacher-tested with real students from fourth grade through high school and across subject areas. Benefit from the imagination and expertise of author Donna Malone, who has won many awards—including 2011 Georgia Master Teacher, Henry County System-wide Teacher of the Year,

Atlanta Journal-Constitution Honor Teacher—and has been a speaker at numerous educator conferences. Ready to energize your students? Pick up *Classroom Boredom Busters* and reinvent your classroom today! **Cloth Dolls** Outskirts Press
