The front-page news and the trials that followed Operation Varsity Blues were just the tip of the iceberg. *Poison Ivy* tells the bigger, seedier story of how elite colleges create paths to admission available only to the wealthy, despite rhetoric to the contrary. Evan Mandery reveals how tacit agreements between exclusive "Ivy-plus" schools and white affluent suburbs create widespread de facto segregation. And as a college degree continues to be the surest route to upward mobility, the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality everywhere. Mandery—a professor at a

public college that serves low- and middle-income students—contrasts the lip service paid to "opportunity" by so many elite colleges and universities with schools that actually walk the walk. Weaving in shocking data and captivating interviews with students and administrators alike, *Poison Ivy* also synthesizes fascinating insider information on everything from how students are evaluated, unfair tax breaks, and questionable fundraising practices to suburban rituals, testing, tutoring, tuition schemes, and more. This bold, provocative indictment of America's elite colleges shows us what's at stake in a faulty system—and what will be possible if we muster the collective will to transform it.

*Wiley CPAexcel Exam Review 2015 Study Guide (January)* Cambridge University Press

This book offers international readers a comprehensive introduction to higher education in China, and will help readers around the globe make sense of the huge and complex machinery that makes up the university and college sector in China today. It accompanies readers step by step, allowing them to understand the most important aspects of this sector in China – its history and development, its scope and structure, its operational system and management, and its enrollment and employment processes. It also provides an overview of the various levels of higher education in China, namely: specialized higher education, undergraduate education, postgraduate education, research and faculty. In short, the book will tell you what higher education in China is and how it works. While economic globalization and

internationalization of higher education have greatly reduced the differences among educational systems in various countries, it cannot be denied that any given country's higher education system needs to be deeply rooted in its culture and traditions. In this book, we highlight several distinctive characteristics of higher education in China, including: the ancient roots and modern history, massive scale, diversity, and centralized management and pragmatic trends.

*Twenty Years of Education Transformation in Gauteng 1994 to 2014* Trans Tech Publications Ltd

This volume explores the tensions between the student affairs foundation of holistic student development and the changing culture of corporatization. While there is ample evidence of neoliberalism in the academic affairs of higher education there is very little to no research to understand how neoliberalism is driving the corporatization of student affairs. This book argues that understanding neoliberalism in student affairs is crucial to student success and the student experience. The authors provide contextualized examples for understanding our positionality within the neoliberal system, as well as practical recommendations on resisting market values as common sense, thereby helping to preserve the profession and to imagine a new one centered on people, equity, and justice.

*McGraw-Hill's ACT, 2014 Edition* Elsevier Health Sciences

This book constitutes the refereed proceedings of the 9th International Conference on Blended Learning, ICBL 2016, held in Beijing, China, in July 2016. The conference is formerly known as International Conference on Hybrid Learning (ICHL) The 34 papers presented were carefully reviewed and selected from 61 submissions. The selected papers cover various aspects on collaborative and interactive learning, content development, open and flexible learning, assessment and evaluation, pedagogical and psychological issues, experience in blended learning, and strategies and solutions.

**Poison Ivy** Frontiers Media SA

This volume explores new directions of governance and public policy arising both from interpretive political science and those who engage with interpretive ideas. It conceives governance as the various policies and outcomes emerging from the increasing salience of neoclassical and institutional economics or, neoliberalism and new institutionalisms. In doing so, it suggests that that the British state

consists of a vast array of meaningful actions that may coalesce into contingent, shifting, and contestable practices. Based on original fieldwork, it examines the myriad ways in which local actors - civil servants, mid-level public managers, and street level bureaucrats - have interpreted elite policy narratives and thus forged practices of governance on the ground. This book will be of key interest to scholars, students and practitioners of governance and public policy.

**Beyond the Skills Gap** African Minds

The Fourth Industrial Revolution has disrupted businesses worldwide through the introduction of highly automated processes. This disruption has affected the way in which companies conduct business, impacting everything from managerial styles to resource allocations to necessary new skillsets. As the business world continues to change and evolve, it is imperative that business education strategies are continuously revised and updated in order to adequately prepare students who will be entering the workforce as future entrepreneurs, executives, and marketers, among other careers. The Research Anthology on Business and Technical Education in the Information Era is a vital reference source that examines the latest scholarly material on pedagogical approaches in finance, management, marketing, international business, and other fields. It also explores the implementation of curriculum development and instructional design strategies for technical education. Highlighting a range of topics such as business process management, skill development, and educational models, this multi-volume book is ideally designed for business managers, business and technical educators, entrepreneurs, academicians, upper-level students, and researchers.

*The Development of MOOCs in China*

Graphic Communications Group

It is the purpose of this book to examine the ever-changing meaning of the term "liberal arts" and to trace its development from antiquity to the present. In doing so, the text will compare and contrast the values of such an education with the other important objective of schools and colleges, which is to prepare students with appropriate occupational training. The book will highlight the arguments of both points of view. In doing so, attention will be paid to the contributions to society of those who have been exposed to a variety of educational curricula. As part of the study, the impact of the community college will be considered, along with the impact of recent initiatives such as the

Nation at Risk Report, No Child Left Behind, Race to the Top, and the Common Core. Finally, the text will conclude with an attempt to suggest the direction that will determine the fate of liberal arts in schools and colleges.

**Engaging the "Race Question"**

Routledge

This book brings together all the major components of the private health care sector in India, with detailed description of its evolution, the foundational ideas, its development, the positives and ill effects on the population. It suggests intelligible and practical remedies for public good. The book presents a comprehensive review of private health care sector's resistance to Indian Government's reforms like the national medical commission, NEET, clinical establishment act and the new boost to the traditional medicine by the Indian government. The author has discussed contentious areas like Corporate Hospitals, Capitation Fee Colleges, Pharmaceutical Industry, Western Models in Health Care, Integration of Medical Systems, Ayushman Bharat Scheme, Health Insurance and Public Private Partnership on a massive scale.

*Judicial Politics in Polarized Times* Springer Science & Business Media

Volume 6 of the series Creating the 21st-Century Academic Library is focused on academic library technical services operations, and ways that they have been transformed and reimagined for working in today's higher education environment. *College Student Mental Health* Springer Nature

This book presents the state-specific dimensions of the governance of higher education in Bihar, India, based on a real-case perspective. It discusses the policies of the center and state governments, and their implications on the state's higher education system. It addresses the issues and challenges faced by the higher education sector from the point of view of multiple stakeholders at center, state, university and college levels, while examining influential power centers. The volume focuses on select universities in the state and looks at how they manage policies, schemes and regulations. It deals with key themes such as the role of state and regulatory bodies such as the University Grants Commission; the balance of power; resource scarcity; the inadequacy of top-down governance models; governance failure; and the autonomy of universities. It explores the conflict between the politics and economics of governance and efficiency; the promotion and recruitment of senior office-bearers and teachers; the

privatization of colleges; and financing, admission and examination systems. Through an in-depth study using empirical unit-level data from the All-India Survey of Higher Education, examples and theoretical frameworks, the book analyzes the reasons for the underperformance of the governance system of higher education in Bihar. It also offers suggestions and policy recommendations to help improve its planning and management via participative and responsible governance and informed institutional leadership. This book will be of interest to students, teachers and researchers of education, higher education, economics, governance and public administration, and development studies. It will also be useful to educationists and experts, education administrators, policymakers, bureaucrats and the governing bodies of higher education institutions.

*Preparing Students for College and Careers* Springer

This book is for anyone who is challenged or troubled by the substantial disparities in college participation, persistence, and completion among racial and ethnic groups in the United States. As codirectors of the Center for Urban Education (CUE) at the University of Southern California, coauthors Alicia Dowd and Estela Bensimon draw on their experience conducting CUE's Equity Scorecard, a comprehensive action research process that has been implemented at over 40 colleges and universities in the United States. They demonstrate what educators need to know and do to take an active role in racial equity work on their own campuses. Through case studies of college faculty, administrators, and student affairs professionals engaged in inquiry using the Equity Scorecard, the book clarifies the "muddled conversation" that colleges and universities are having about equity. Synthesizing equity standards based on three theories of justice—justice as fairness, justice as care, and justice as transformation—the authors provide strategies for enacting equity in practice on college campuses. Engaging the "Race Question" illustrates how practitioner inquiry can be used to address the "race question" with wisdom and calls on college leaders and educators to change the policies and practices that perpetuate institutional and structural racism—and provides a blueprint for doing so. Book Features: Provides concrete examples of policy and practice for improving equity in postsecondary education. Examines the role of individuals and groups in the change process. Includes examples of

action research tools from the Equity Scorecard. Offers strategies for professional development and organizational change. "Dowd and Bensimon have been at the forefront of racial equity research in higher education for nearly two decades, and their racial equity scorecard has changed the way higher education thinks about the issue." —Patricia Gándara, co-director, The Civil Rights Project "Proven strategies that every educator in America can use to develop context-specific solutions for advancing equity while exploring the legacy of institutionalized racism that typically paralyzes reform and hinders change." —Tia Brown McNair, senior director for student success, Association of American Colleges and Universities "A valuable step-by-step guide to making our colleges more academically inviting and egalitarian." —Mike Rose, author of *Back to School: Why Everyone Deserves a Second Chance at Education*

**Higher Education in China** Rowman & Littlefield

Over the past few decades, US business and industry have been transformed by the advances and redundancies produced by the knowledge economy. The workplace has changed, and much of the work differs from that performed by previous generations. Can human capital accumulation in the United States keep pace with the evolving demands placed on it, and how can the workforce of tomorrow acquire the skills and competencies that are most in demand? *Education, Skills, and Technical Change* explores various facets of these questions and provides an overview of educational attainment in the United States and the channels through which labor force skills and education affect GDP growth. Contributors to this volume focus on a range of educational and training institutions and bring new data to bear on how we understand the role of college and vocational education and the size and nature of the skills gap. This work links a range of research areas—such as growth accounting, skill development, higher education, and immigration—and also examines how well students are being prepared for the current and future world of work.

**Paying the Price** McGraw Hill Professional

Everything today's CPA candidates need to pass the CPA Exam Published annually, this *Business Environment and Concepts* volume of the comprehensive four-volume paperback reviews all current AICPA content requirements in business environment and concepts. Many of the questions are taken directly from previous

CPA exams. With 2,800 multiple-choice questions in all four volumes, these study guides provide all the information candidates need to master in order to pass the computerized Uniform CPA Examination. Its unique modular format helps you zero in on those areas that need more attention and organize your study program. Complete sample exam The most effective system available to prepare for the CPA exam—proven for over thirty years Timely—up-to-the-minute coverage for the computerized exam Contains all current AICPA content requirements in business environment and concepts Unique modular format—helps candidates zero in on areas that need work, organize their study program, and concentrate their efforts Comprehensive questions—over 2,800 multiple-choice questions and their solutions in the four volumes Guidelines, pointers, and tips—show how to build knowledge in a logical and reinforcing way Other titles by Whittington: *Audit Sampling: An Introduction, Fifth Edition* *Wiley CPA Exam Review 2014* arms test-takers with detailed outlines, study guidelines, and skill-building problems to help candidates identify, focus on, and master the specific topics that need the most work.

**India's Private Health Care Delivery**

Harvard Education Press

New mothers face a barrage of confounding decisions during the life-cycle of early motherhood which includes... Should they change their diet or mindset to conceive? Exercise while pregnant? Should they opt for a home birth or head for a hospital? Whatever they "choose," they will be sure to find plenty of medical expertise from health practitioners to social media "influencers" telling them that they're making a series of mistakes. As intersectional feminists with two small children each, Bethany L. Johnson and Margaret M. Quinlan draw from their own experiences as well as stories from a range of caretakers throughout. You're *Doing it Wrong!* investigates the storied history of mothering advice in the media, from the newspapers, magazines, doctors' records and personal papers of the nineteenth-century to today's websites, Facebook groups, and Instagram feeds. Johnson and Quinlan find surprising parallels between today's mothering experts and their Victorian counterparts, but they also explore how social media has placed unprecedented pressures on new mothers, even while it may function as social support for some. They further examine the contentious construction of prenatal and baby care expertise itself, as individuals such as everyone from medical

professionals to experienced moms have competed to have their expertise acknowledged in the public sphere. Exploring potential health crises from infertility treatments to “better babies” milestones, *You’re Doing it Wrong!* provides a provocative look at historical and contemporary medical expertise during conception, pregnancy, childbirth, postpartum, and infant care stages. *The Simulated Administrative Medical Office with SimChart for the Medical Office (EHR Exercises)* University of Chicago Press

The United States is entering a new era of progressive state citizenship, with California leading the way. A growing number of states are providing expanded rights to undocumented immigrants that challenge conventional understandings of citizenship as binary, unidimensional, and exclusively national. In *Citizenship Reimagined*, Allan Colbern and S. Karthick Ramakrishnan develop a precise framework for understanding and measuring citizenship as expansive, multi-dimensional, and federated - broader than legal status and firmly grounded in the provision of rights. Placing today's immigration battles in historical context, they show that today's progressive state citizenship is not unprecedented: US states have been leaders in rights expansion since America's founding, including over the fight for black citizenship and women's suffrage. The book invites readers to rethink how American federalism relates to minority rights and how state laws regulating undocumented residents can coexist with federal exclusivity over immigration law. *Citizenship Reimagined* John Wiley & Sons

“A rich blend of narrative history, personal recollections, and heart-wrenching oral testimonials . . . powerful.” —Imali J. Abala, author of *The Dreamer* With an introduction that provides a historical and theoretical overview of African immigration, the heart of this book is built around oral history interviews with forty-seven of the more than twenty-two thousand Africa-born immigrants in Kentucky. A former ambassador from Gambia, a pharmacist from South Africa, a restaurant owner from Guinea, a certified nursing assistant from the Democratic Republic of Congo—every immigrant has a unique and complex story of their life experiences and the decisions that led them to emigrate to the United States. The compelling narratives in this book reveal why and how these immigrants came to the Bluegrass state—whether it was coming voluntarily as a student or forced because of war—and how they connect

with and contribute to their home countries as well as to the US. The immigrants describe their challenges—language, loneliness, cultural differences, credentials for employment, ignorance toward Africa, and racism—and positive experiences such as education, job opportunities, and helpful people. One chapter focuses on family—including interviews with the second generations—and how the immigrants identify themselves. “Compelling . . . a must read for anyone seeking the substance behind the newspaper headlines and statistics.” —Frank X Walker, author of *Affrilachia*

*Blended Learning: Aligning Theory with Practices* University of Chicago Press

Preparing Students for College and Careers addresses measurement and research issues related to college and career readiness. Educational reform efforts across the United States have increasingly taken aim at measuring and improving postsecondary readiness. These initiatives include developing new content standards, redesigning assessments and performance levels, legislating new developmental education policy for colleges and universities, and highlighting gaps between graduates’ skills and employers’ needs. In this comprehensive book, scholarship from leading experts on each of these topics is collected for assessment professionals and for education researchers interested in this new area of focus. Cross-disciplinary chapters cover the current state of research, best practices, leading interventions, and a variety of measurement concepts, including construct definitions, assessments, performance levels, score interpretations, and test uses.

Collection of selected, peer reviewed papers from the 2014 International Forum on Computers, Electronics and Mechatronics (IFCEM 2014), August 27-28, 2014, Zhuhai, China. Volume is indexed by Thomson Reuters CPCI-S (WoS). The 82 papers are grouped as follows: Chapter 1: Information Technologies and Intelligent Decision Making System in Industry, Management and Education; Chapter 2: Computer Networks, Communications Technology; Chapter 3: Software Development; Chapter 4: Technologies and Methods of Data and Signal Processing; Chapter 5: Sensors, Testing, Detection, Measurement and Monitoring Technologies; Chapter 6: Modern

Technology in Electronics and Circuits; Chapter 7: Mechatronics, Industrial Robots, Automation and Control Technologies

### **Digital Education for the 21st Century**

Walter de Gruyter GmbH & Co KG

One of the most sustained and vigorous public debates today is about the value and, crucially, the price of college. But an unspoken, outdated assumption underlies all sides of this debate: if a young person works hard enough, they'll be able to get a college degree and be on the path to a good life. That's simply not true anymore, says Sara Goldrick-Rab. Quite simply, college is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. Drawing on a study of 3,000 young adults who entered public colleges and universities in Wisconsin in 2008 with the support of federal aid and Pell Grants, Goldrick-Rab reveals the devastating effect of these shortfalls. She believes America can fix this problem. In the final section of the book, Goldrick-Rab offers a range of possible solutions.--Provided by publisher.

### **You're Doing it Wrong!** IGI Global

In this era of polarized politics, three stories about judges have emerged. When describing their own work, judges often say that they are neutral legal umpires. When describing opposing judges, partisan political actors regularly denounce them for undermining democratic values and imposing their own preferences. Scholars have long told a third story, in which judges are political actors who spend more time conforming to rather than challenging the democratic will. Drawing on a sweeping survey of litigation regarding abortion, affirmative action, gay rights, and gun rights during the Clinton, Bush, and Obama eras, Keck argues that each of these stories captures part of the significance of courts in polarized times, but that each, standing alone, is more misleading than helpful. In polarized America, advocates on both the left and the right engage in litigation more-or-less constantly to achieve their ends. But, Keck shows, neither side has consistently won, or consistently lost. Instead, judges have responded to this unending litigation, at different times and in different ways, as umpires, as activist tyrants, and as followers of whoever won the last election. For example, federal courts are indeed polarized on partisan lines, but across all four issues, this polarization is less extreme on the courts than it is in Congress. As for the undemocratic judge

story, here too Keck's findings are hardly black and white. While some decisions can be characterized as thwarting the popular will, there are just as many in which the judges and the public seem to be pushing

in the same direction. Ultimately Keck concludes that the time to fear courts is not when they start protecting rights, but when they start protecting only or mostly those rights favored by Republicans (or by

Democrats). Keck's rigorous analysis of these judicial controversies is sure to engender interest both inside and outside the academy and be hailed as a landmark study of judicial review."
