Inside Out and Outside in John Wiley & Sons

Is there a right way to study how the brain works? Following the empiricist's tradition, the most common approach involves the study of neural reactions to stimuli presented by an experimenter. This 'outside-in' method fueled a generation of brain research and now must confront hidden assumptions about causation and concepts that may not hold neatly for systems that act and react. György Buzsáki's *The Brain from Inside Out* examines why the outside-in framework for understanding brain function has become stagnant and points to new directions for understanding neural function. Building upon the success of 2011's *Rhythms of the Brain*, Professor Buzsáki presents the brain as a foretelling device that interacts with its environment through action and the examination of action's consequence. Consider that our brains are initially filled with nonsense patterns, all of which are gibberish until grounded by action-based interactions. By matching these nonsense "words" to the outcomes of action, they acquire meaning. Once its circuits are "calibrated" by action and experience, the brain can disengage from its sensors and actuators, and examine "what happens if" scenarios by peeking into its own computation, a process that we refer to as cognition. *The Brain from Inside Out* explains why our brain is not an information-absorbing coding device, as it is often portrayed, but a venture-seeking explorer constantly controlling the body to test hypotheses. Our brain does not process information: it creates it.

A single image taken from a high-rise building in inner-city Johannesburg uncovers layers of history—from its premise and promise of gold to its current improvisations. It reveals the city as carcass and as crucible, where informal agents and processes spearhead its rapid reshaping and transformation. In *Wake Up, This Is Joburg*, writer Tanya Zack and photographer Mark Lewis offer a stunning portrait of Johannesburg and personal stories of some of the city's ordinary, odd, and outrageous residents. Their photos and essays take readers into meat markets where butchers chop cow heads; the eclectic home of an outsider artist that features turrets and full of manikins; long-abandoned gold pits beneath the city, where people continue to mine informally; and lively markets, taxi depots, and residential high-rises. Sharing people's private and work lives and the extraordinary spaces of the metropolis, Zack and Lewis show that Johannesburg's urban transformation occurs not in a series of dramatic, wide-scale changes but in the everyday lives, actions, and dreams of individuals.

Moving to America turns H&A's life inside out. For all the 10 years of her life, H&A has only known Saigon: the thrills of its markets, the joy of its traditions, the warmth of her friends close by, and the beauty of her very own papaya tree. But now the Vietnam War has reached her home. H&A and her family are forced to flee as Saigon falls, and they board a ship headed toward hope. In America, H&A discovers the foreign world of Alabama: the coldness of its strangers, the dullness of its food, the strange shape of its landscape, and the strength of her very own family. This is the moving story of one girl's year of change, dreams, grief, and healing as she journeys from one country to another,

one life to the next.

Many would rather change worlds than change the world. The settlement of communities in 'empty lands' somewhere else has often been proposed as a solution to growing contradictions. While the lands were never empty, sometimes these communities failed miserably, and sometimes they prospered and grew until they became entire countries. Building on a growing body of transnational and interdisciplinary research on the political imaginaries of settler colonialism as a specific mode of domination, this book uncovers and critiques an autonomous, influential, and coherent political tradition - a tradition still relevant today. It follows the ideas and the projects (and the failures) of those who left or planned to leave growing and chaotic cities and challenging and confusing new economic circumstances, those who wanted to protect endangered nationalities, and those who intended to pre-empt forthcoming revolutions of all sorts, including civil and social wars. They displaced, and moved to other islands and continents, beyond the settled regions, to rural districts and to secluded suburbs, to communes and intentional communities, and to cyberspace. This book outlines the global history of a resilient political idea: to seek change somewhere else as an alternative to embracing (or resisting) transformation where one is.

You can serve God and his people for a lifetime and do it with passion and joy. You do not have to become another casualty in the growing number of leaders who have compromised their integrity, character, and ministry because they failed to lead an examined and accountable life. The road forward is clearly marked. Leaders must make a decision to humbly and consistently examine their inner lives and identify areas of needed change and growth. Also, wise leaders commit to listen to the voices of those who will love them enough to speak the truth and point out problems and potential pitfalls. Kevin Harney writes, "The vision of this book is to assist leaders as they discover the health, wisdom, and joy of living an examined life. It is also to give practical tools for self-examination." Sharing stories and wisdom from his years in ministry, Harney shows you how to maintain the most powerful tool in your leadership toolbox: YOU. Your heart, so you can love well. Your mind, so you can continue to learn and grow. Your ears, your eyes, your mouth ... consider this your essential guide to conducting your own complete interior health exam, so you can spot and fix any problems, preserve the things that matter most, and grow as a source of vision, strength, and hope to others.

Leadership from the Inside Out W. W. Norton & Company

WINNER OF THE 2016 JEWISH BOOK COUNCIL AWARD FOR CONTEMPORARY JEWISH LIFE AND PRACTICE An inspiring and accessible guide, drawn from Jewish wisdom, for building the inner qualities necessary to work effectively for social justice. The world needs changing—and you're just the person to do it! It's a matter of cultivating the inner resources you already have. If you are serious about working for social justice and change, this book will help you bring your most compassionate, wise, and courageous self to the job. Bringing positive social change to any system takes deep self-awareness, caring, determination, and long-term commitment. But polarization, the slow pace of change, and internal conflicts among activists and organizations often leads to burnout and discouragement among the very people needed to make a difference. Changing the World from the Inside Out distills centuries of Jewish wisdom about cultivating and refining the inner life into an accessible program for building the qualities necessary to accomplish sustainable change. Through explorations of deep motivation, inner-drive, and traits like trust and anger, this book engages the reader in a journey of self-development and transformation, demonstrating that sustainable activism is indeed a spiritual practice. Jaffe offers accessible and meaningful guidance for this journey—with exercises, contemplations, and discussion points that can be used individually or in a group.

Lesbians and gays have gone from "coming out," to "acting up," to "outing," meanwhile radically redefining society's views on sexuality and gender. The essays in *Inside/Out* employ a variety of approaches (psychoanalysis, deconstruction, semiotics, and discourse theory) to investigate representations of sex and sexual difference in literature, film, video, music, and photography. Engaging the figures of divas, dykes, vampires and queens, the contributors address issues such as AIDS, pornography, pedagogy, authorship, and activism. *Inside/Out* shifts the focus from sex to sexual orientation, provoking a reconsideration of the concepts of the sexual and the political.

Armenia receives one of the highest levels of international aid per capita in the Western world, and among the highest of the post-Soviet states. This ethnographic study, based on new primary research, looks at aid in the South Caucasus, and its role in Armenia's relationship with Europe. In particular, Skedsmo argues that the Aarhus Convention, which entitles citizens of Europe to access information and participation in decision-making in environmental matters has allowed Armenian citizens to adapt and control the direction of their country's political future in various ways - whether through protest activism or legal challenges. A new examination of aid and development, and the structures these create, Europe and Armenia will be an essential case study for scholars of development, for regional specialists in the post-soviet area (especially South Caucasus), social anthropologists, students of post socialism and development (postcolonialism). In addition, the book will be of interest for practitioners and European policy-makers, transnational organizations and others involved in development policies and projects in the region.

8:46 AM "... there is something not right, out of order, about the view, Tad Hanc noticed from his 86th-floor windows looking north. Studying the magnificent Manhattan skyline, Tad began to take it in. And then it registered in all its horrifying aspects. Lowering his eyes slightly, Tad saw a large passenger airliner heading due south over Fifth Avenue just missing the top of the Empire State Building, flying very, very fast-heading straight toward Tower One-directly to his office-aimed right at him!" This is but one of fifteen heart-stopping stories the author has included in *From The Inside Out Harrowing Escapes from the Twin Towers of the World Trade Center*. From the oral accounts of people who began that morning living their normal, everyday lives, this book is a valuable collection of the human experience-documenting that intangible essence of bravery, selflessness, and generosity of spirit that exists, often dormant inside us all, rising to the forefront in times of crisis.
