This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning

through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign

participation, decorations, and emblem. *Book of the Dead* University of Michigan Library The long-awaited final volume of William Manchester's legendary biography of Winston Churchill. Spanning the years of 1940-1965, *The Last Lion* picks up shortly after Winston Churchill became Prime Minister-when his tiny island nation stood alone against the overwhelming

might of Nazi Germany. The Churchill conjured up by William Manchester and Paul Reid is a man of indomitable courage, lightning-fast intellect, and an irresistible will to action. *The Last Lion* brilliantly recounts how Churchill organized his nation's military response and defense, compelled FDR into supporting America's beleaguered cousins, and personified the "never surrender"

ethos that helped the Allies win the war, while at the same time adapting himself and his country to the inevitable shift of world power from the British Empire to the United States. More than twenty years in the making, The Last Lion presents a revelatory and unparalleled portrait of this brilliant, flawed, and dynamic leader. This is popular history at its most stirring.

Journals and Debating Speeches Columbia University Press A biography of Gouverneur Morris (1752-1816) by his granddaughter, making extensive use of his letters and diary. **Selections from the Correspondence of the First Lord Acton** Amsterdam University Press By the early ninth century, the responsibility

for a series of social, religious and political reforms had become an integral part of running the Carolingian empire. This became especially clear when, in 813/4, Louis the Pious and his court seized the momentum generated by their predecessors and broadened the scope of this *correctio* ever further. These reformers knew they constituted a movement greater than the sum of its

parts; the interdependence of imperial authority and ecclesiastical reformers was driven by comprehensive, yet surprisingly diverse expectations. Taking this diversity as a starting point, this book takes a fresh look at these optimistic decades. Extrapolating from a series of detailed case studies rather than presenting a grand narrative, it offers new interpretations of contemporary

theories of *correctio*, and shows the self-awareness of its main instigators as they pondered what it meant to be a good Christian in a good Christian empire. [Annual Report of the Directors of the Free Public Library, Worcester, Mass](#) Createspace Independent Publishing Platform A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. "At irregular

times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them.' So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have

developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence. The heart of Human Accomplishment

is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography.

Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment not been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human

spirit has expressed itself most gloriously. Eye-opening and humbling, Human Accomplishment is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create beauty, and apprehend the good. *Stowe's Clerical*

Milo and Fireman Daniel have been dating off and on for six years, but it always seems more off than on. Just when their relationship reaches breaking point, someone enters their lives, unknowingly helping the confused couple work through their differences. Falling in love with the man Daniel rescued and who Milo is investigating as a potential arson suspect

isn't a conventional start to any relationship, especially one which includes a mysterious blond who's afraid to stop running. But they both see what didn't work out as a couple, could work out as a menage. Daniel and Milo unite to help save Samuel, but quickly realise he's not the only one being saved. With so many obstacles in their way threatening to destroy the future they desire, all three have to

fight to create a bond too strong for anyone or anything to break."

position within medicine and society, as an operation which symbolised surgical progress, while also remaining at the boundaries of ethical acceptability. This book traces the operation's innovation, from its roots in eighteenth-century pathology, through the denouncement of those who performed it as 'belly-rippers', to its rapid uptake in the 1880s, when ovariotomists

were accused of over-operating. Throughout the century, the operation was never a hair's breadth from controversy.
