The Story of Us Humans explains human nature and human history, including the origins of our species, emotions, behavior, morals, and society. It explains what we are, how we got here, and where we are today by describing the origin, history, and current ways of our neighborhoods, religion, government, science, technology, and business. Written in plain language, it explains what astronomy, physics, geology, biology, chemistry, anthropology, history, religion, social science, and political science tell us about ourselves. Most everyone feels that human success is measured in terms of healthy and happy children and communities. Human thoughts and actions involve little besides love and children, spouse and family, community and justice because we are parenting mammals and social primates. Each of us simply wants to laugh and joke with our family and friends, pursue life, raise children and strive to be a valued and contributing member of our community. We have made incredible progress building civilization in just a few hundred generations using nothing except our animal minds. Have you wondered: * What are the laws of nature and how many laws are there? * How did molecular life begin and then evolve into worms fish, amphibians, reptiles, mammals, primates, and humans? * What are the differences between these animals? * How did we get from the Big Bang to bacteria and on to Christianity, democracy, and globalization? * What is life like for gatherer-hunters? * When did we first become farmers and first build cities, and what was life like at those times? * What was life like in Ancient Mesopotamia, Ancient Athens, 13th-century Cahokia, Medieval China and Europe, 19th-Century New England, Yoruban villages, and in the U.S. during the 1920s? * What was the Industrial Revolution and how has it changed our lives? * What are the Hindu, Muslim, Confucian, Jewish, Christian, Buddhist, and Humanist religions and world views? * How have our wages, infant mortality rates, lifespans, crime rates, and poverty and inequality rates varied through the ages? * What are the biggest economic and social secrets in the U.S. today? * What are some meaningful goals and priorities for our civilization and how can we measure the success of our attempts to reach those goals? Includes questions, index, bibliography, and 1,200 internet links taking you to images, videos, and discussed documents.

 In 1924, Professor Ueno Eizaburo of Tokyo Imperial University adopted an Akita puppy he named Hachiko. Each evening Hachiko greeted Ueno on his return to Shibuya Station. In May 1925 Ueno died while giving a lecture. Every day for over nine years the Akita waited at Shibuya Station, eventually becoming nationally and even internationally famous for his purported loyalty. A year before his death in 1935, the city of Tokyo erected a statue of Hachiko outside the station. The story of Hachiko reveals much about the place of dogs in Japan's cultural imagination. In the groundbreaking *Empire of Dogs*, Aaron Herald Skabelund examines the history and cultural significance of dogs in nineteenth- and twentieth-century Japan, beginning with the arrival of Western dog breeds and new modes of dog keeping, which spread throughout the world with Western imperialism. He highlights how dogs joined with humans to create the modern imperial world and how, in turn, imperialism shaped dogs' bodies and their relationship with humans through its impact on dog-breeding and dog-keeping practices that pervade much of the world today. In a book that is both enlightening and entertaining, Skabelund focuses on actual and metaphorical dogs in a variety of contexts: the rhetorical pairing of the Western "colonial dog" with native canines; subsequent campaigns against indigenous canines in the imperial realm; the creation, maintenance, and in some cases restoration of Japanese dog breeds, including the Shiba Inu; the mobilization of military dogs, both real and fictional; and the emergence of Japan as a "pet superpower" in the second half of the twentieth century. Through this provocative account, Skabelund demonstrates how animals generally and canines specifically have contributed to the creation of our shared history, and how certain dogs have subtly influenced how that history is told. Generously illustrated with both color and black-and-white images, *Empire of Dogs* shows that human-canine relations often expose how people—especially those with power and wealth—use animals to define, regulate, and enforce political and social boundaries between themselves and other humans, especially in imperial contexts.

book details Jewish cultural and intellectual resources throughout this era, particularly in political thought, literature, the visual and performing arts, and religion. This volume explores worldwide Jewish perceptions of momentous events that transpired in the mid-twentieth century and how Jews redefined themselves across regions throughout an era rife with tragedy, displacement, and dispersion. Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book

that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

From Alexandra Horowitz, #1 New York Times bestselling author of *Inside of a Dog*, an eye-opening, informative, and wholly entertaining examination and celebration of the human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex interspecies pairing. As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and opens our eyes to the companions at our sides as never before.
