CONQUER CREATIVE WRITING BOOK 2 aims to provide young children with a systematic and progressive approach to composition writing. There are various types of exercises in this book: Cloze passage, with pictures but without helping words The pictures serve as clues to the answers. The students fill in each blank with an appropriate word by looking at each picture. This will train them to extend their vocabulary, and at the same time, to be more aware of grammatical rules. Cloze passage, without pictures and helping words The students have to read through a passage once to get the general idea of the story. This will help them to think of the most appropriate word to fill in each blank to complete a story. Picture comprehension, guided by questions The exercises aim to teach students to think about a topic, theme or subject before writing. Picture comprehension, without questions but with helping words The exercises encourage free response and writing. Given a theme, the students can write about their own experiences or make up an interesting story. Helping words are given to help them express themselves better. Composition writing, with pictures and helping words The students have to study the pictures carefully to get the general idea of the story. Helping words are given to guide them along in their writing. Composition writing, with a single picture and helping words The picture plays an important role here as it shows

the main theme of the composition. Helping words are given to guide them along in their writing. The various themes used in these exercises present a list of vocabulary that students will find useful when writing compositions on similar themes in school. The reading required to do the exercises in this book will lead to better comprehension and writing skills.

CONQUER CREATIVE WRITING BOOK 4 consists of units covering four areas, all of which aim to strengthen students' writing ability. In this book, students will learn to: write descriptive, narrative, expository and imaginative compositions; differentiate and organize ideas using the methods of classification, comparison and contrast, sequencing and cause and effect; relate to a given situation and its possible outcomes; and think and write creatively. Students will find the exercises interesting and the open-ended questions challenging. It is our desire that students who have completed this series will find themselves equipped to discuss issues beyond their years.

Over the past six decades, the field of teaching modern foreign languages to young learners has come a long way, from the early surmises about the

advantages of a young start to today's widespread integration of foreign languages into curricula in public and private schools. The chapters in this book bring together internationally renowned researchers who have been vocal in establishing early language teaching and learning as an independent area of research and novice voices who represent a new generation of devoted researchers to present a state-of-the-art volume on the topic. The authors address key questions about young learner second/foreign language (L2/FL) development, methodological issues when conducting research with young learners, L2/FL teaching pedagogy, language education policy, technology enhanced learning and assessment. Together, the chapters capture the reality of early FL development in the context of a globalized world and will be of great interest to researchers and postgraduate students of SLA and Applied Linguistics, specifically in the field of early language development and teaching languages to young learners.
