In Sociology of Culture
and of Cultural

Practices, Laurent
Fleury presents a
synthesis of research
and debate from
France and the United
States. He traces the
development of the
sociology of culture
from its origins (Weber

and Simmel) and examines the major trends that have emerged in this branch of sociology. Fleury also raises issues of cultural hierarchy, distinction, and legitimate culture and mass culture and focuses on new areas of research, including the role of institutions, the reception of works of art, aesthetic experience, and emancipation through art.

This volume focuses on how English, through false Anglicisms, influences several European languages, including Italian, Spanish, French, German, Danish and Norwegian. Studies on false Gallicisms are also included, thus showing how English

may be affected by false borrowings.

Drawing on treaties, international law, the work of other Indigenous scholars, and especially personal experiences, Marie Battiste documents the nature of Eurocentric models of education, and their devastating impacts on Indigenous knowledge. Chronicling the negative consequences of forced assimilation, racism inherent to colonial systems of education, and the failure of current educational policies for Aboriginal populations, Battiste proposes a new model of education, arguing the preservation of Aboriginal knowledge is an Aboriginal right. Central to this process

is the repositioning of Indigenous humanities, sciences, and languages as vital fields of knowledge, revitalizing a knowledge system which incorporates both Indigenous and Eurocentric thinking.

Fiona Sweeney wants to do something that matters, and she chooses to make her mark in the arid bush of northeastern Kenya. By helping to start a traveling library, she hopes to bring the words of Homer, Hemingway, and Dr.

Seuss to far-flung tiny communities where people live daily with drought, hunger, and disease. Her intentions are honorable, and her rules are firm: due to the limited number of donated books, if any one of them is not returned, the bookmobile will not return. But, encumbered by her Western values, Fi does not understand the people she seeks to help. And in the impoverished small community of Mididima, she finds herself caught in the middle of a volatile local struggle when the bookmobile's presence sparks a dangerous feud between the proponents of modernization and those who fear the loss of traditional ways.

Sacred Poetry Penguin
This book marks the starting point of a profound shift in assessment priorities, detailing the results of a decade-long program of research on classroom assessment environments. It demonstrates how important sound classroom assessments are to student well-being, and provides insights into the complex demands of

day-to-day classroom assessment on teachers who have been taught little about assessment in their training programs. As a nation, we spend billions of dollars on educational assessment, including hundreds of millions for international and national assessments, and additional hundreds of millions for statewide testing programs. On top of these, the standardized tests that form the basis of district-wide testing programs represent a billion dollar industry. If we total all of these expensive highly-visible, politically-important assessments, we still account for less than one percent of all the assessments conducted in America's

schools. The other 99 percent are conducted by teachers in their classrooms on a moment-to-moment, day-to-day, and week-to-week basis.

Paradoxically, virtually all of our national, state, and local assessment resources are being devoted to research and development for large-scale assessments.

This book provides specific action programs for improving the quality of the other 99 percent--the assessments that really drive what students learn and how they feel about it.

Access to the Internet is an increasing problem in many areas of the world. As the popularity and

usefulness of the Internet increases on a daily basis, lack of access to the technology is putting many groups at a disadvantage in terms of better education, better jobs and even in terms of higher levels of civic participation. However, creating a network infrastructure to serve outlying communities and sectors of the population is not straight-forward. This book brings together all the aspects of the problem - technical, regulatory and economic - into one volume to provide a comprehensive resource. It describes the latest technological advances that allow cost-effective network infrastructures to be built, and places them in the context of the

applications and services that the infrastructure will deliver. A section on business models and case studies from North American and Europe demonstrate that the solutions are economically and practically viable. This book is essential for anyone looking to gain an understanding of the issues and technology surrounding the access debate. It will be of particular relevance to network engineers/designers/planners at the incumbent operator companies charged with delivering broadband access to as yet unconnected regions. Governments and regulatory bodies will also find this a useful guide to the problems that they

may face.

Indigenous and

perspectives on

education have long

persisted alongside

colonial models of

education, yet too

often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, *Indigenous and Decolonizing Studies in Education* features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles -

such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices, refusals of state policies, and land-based and water-based pedagogies.

In the 1930s, Américo

Paredes, the renowned folklorist, wrote a novel set to the background of the struggles of Texas Mexicans to preserve their property, culture and identity in the face of Anglo-American migration to and growing dominance over the Rio Grande Valley. Episodes of guerilla warfare, land grabs, racism, jingoism, and abuses by the Texas Rangers make this an adventure novel as well as one of reflection on the making of modern day Texas. George Washington Gñmez is a true precursor of the modern Chicano novel. Film Analysis in English Cambridge, Mass : Harvard University Press

Easy French Step-by-Step Hachette Education Cet ouvrage apporte aux lecteurs les outils leur permettant de mener à bien l'exercice d'analyse de séquences en anglais. Il offre à la fois une méthodologie, le vocabulaire approprié, un bagage culturel ainsi qu'une série d'exemples concrets en anglais. Il se propose d'être un outil sur lequel peut s'appuyer l'enseignant, mais il se veut également assez complet pour pouvoir être utilisé en autonomie. Il s'appuie sur les recherches récentes en études cinématographiques, qu'elles soient en langue anglaise ou française, et permet ainsi de faire le pont entre les différentes

approches, sans pour autant multiplier les références aux débats trop précis qui obscurciraient le propos. Néanmoins, des références parcourent le texte afin de donner au lecteur la possibilité d'approfondir son travail sur tel ou tel aspect du cinéma. Les exemples d'analyses portent sur des extraits de films classiques et offrent un panorama le plus juste possible du cinéma anglo-saxon. L'ensemble des exemples étant divisé

en plusieurs parties historiques, elles-mêmes introduites par une présentation de la période couverte, l'ouvrage donne au lecteur un bagage culturel suffisant pour réussir cette épreuve. Il permet aux étudiants préparant le CAPES ou l'Agrégation d'anglais de se mettre à niveau pour l'analyse de films dans le cadre des concours. Il offre aux enseignants et aux candidats des pistes pédagogiques et des activités de classe pour exploiter les extraits de films.
