"This 45-day program will provide your child with a review of core math and reading

topics learned in Grade 1 and prepare him or her for new topics in Grade 2. Your child will work independently on fun, engaging activities designed to boost knowledge and confidence."--Cover *Grade 4 Division Kumon Workbooks*

Recent research and clinical work have demonstrated that the rapid urologic innovation in minimally invasive treatment is creating exciting new horizons in endourology. This sixth volume in the series *Recent Advances in Endourology* brings that knowledge to a wider audience, focusing on the new concept of endourooncology, which is the merging of endourology and oncology. In the surgical treatment of

urologic malignancies, bipolarization - that is, radical extended resection or organ-sparing surgery - is making remarkable advances. Further developments in sophisticated reconstructive surgery using robotic systems and image-guided ablation technology will allow surgeons to formulate minimally invasive, tailor-made procedures for each patient with urologic cancer. In this book, the current status and future prospects of these new technologies are reviewed, illuminating their roles in the future of endourooncology.

Math Workbooks

"Skills for success in the classroom and beyond!" This series is designed to offer your child a workbook with a wide range of subjects and topics they will learn at each grade level. Full of curriculum-based activities to help your child practice and improve their skills in the main four subject areas: math, ELA, science, and social studies. Additional activities give your child practice with essential skills that are not always taught in the classroom such as coding, personal finance, mindfulness, and other life skills. Together the exercises

in this book will help your child prepare for success in the classroom and beyond! Each workbook is divided into Units that include the six main subjects your child learns in school: language arts, writing, math, science, social studies, and a section of extra subjects like Personal Finance or Technology. By completing each Unit, your child will understand a little more about each subject and approach learning new topics in a format that is similar to how they learn during the school year. This approach offers your child more varied practice and learning. Instead of being faced with a seemingly endless amount of math or verbal activities, your child

can work through short more manageable sections that cover a larger variety of topics. This ensures that your child is not bored or frustrated by a subject they might find challenging and encourages them to work through the entire book without feeling overwhelmed. Our workbook is designed with the Kumon Method in mind and helps to create a learning experience for your child that is less frustrating and more enjoyable than other workbooks. "
