Certified Nurse Educator (CNE) Review Manual Springer Publishing Company

The Nurse Educator's Guide to Assessing Learning Outcomes, Third Edition is a widely-used resource for both faculty and nursing education students that covers the assessment of critical thinking, the development of learning objectives, and the creation of tests, including detailed tips for writing many kinds of individual test items. The book also covers the analysis of test reliability. Examples of effective and ineffective test items are included throughout to help faculty and nurse educators deepen their understanding of how to create effective tests and assess student learning. This new edition addresses the increased pressure that NCLEX and other certification exams are placing on nursing students and faculty, and reflects the most recent updates to the NCLEX Detailed Test Plan. Each chapter has been updated with timely information and examples.

Evaluation Beyond Exams in Nursing Education Elsevier Health Sciences

"Nurse Educators can no longer be just experts in their specific fields; they need to be able to teach a variety of students in a variety of settings. This book encompasses all topics necessary to assist nurses to become educators. I am not aware any other books that address this area so thoroughly."

Score: 98, 5 stars --Doody's I truly believe that your book made it possible for me to successfully complete the CNE exam! It truly is the only book you need to pass the CNE exam - I'm living proof! Thanks so much! I learned a lot from your book and intend to keep it on my desk for future reference!
 óSue Carroll, MSN, RN Sentara College of Health Sciences
 This is the only Certified Nurse Educator (CNE) examination prep book that addresses each of the key topics outlined in the actual NLN test blueprint. The review manual serves as an indispensable resource for novice and expert nurse educators seeking to master the content needed for CNE Certification. Each chapter contains only the most important information needed for the test, breaking each topic down into its parts to facilitate quick access to core content. No other review manual offers comprehensive coverage of everything nurse educators need to know for the CNE exam, including guidelines for classroom management, practical teaching strategies, and much more. Why you need this book: Chapter content presents nurse educator core competencies as outlined in the NLN test blueprint Features practice questions in each chapter and an answer key in the back of the book with full explanations of correct answers Includes comprehensive practice test at the end of the book, also with explanations of correct answers Contains essential information on practical teaching strategies, developing lesson plans, culturally diverse students, student evaluation, and much more This guide contains the essential knowledge that all nurse educators need to pass the test and excel in teaching, thus serving as an invaluable resource for systematic review of content before taking the NLN CNE examination.

Succeeding in Essays, Exams and OSCEs for Nursing Students Springer Publishing Company

"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables impacting curricular decisions...This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes...92 - 4 Stars" --Doody's Book Reviews
 Reorganized and updated to deliver practical guidelines for evidence-based curricular change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators. New chapters address the role of faculty regarding curriculum development and approval processes in changing educational

environments; course development strategies for applying learning theories, educational taxonomies, and team-building; needs assessment and the frame factors model; ADN and BSN and pathways to higher degrees; and planning for doctoral education. The fourth edition continues to provide the detailed knowledge and practical applications necessary for new and experienced faculty to participate in essential components of the academic role—instruction, curriculum, and evaluation. At its core, the text discusses the importance of needs assessment and evidence as a basis for revising or developing new programs and highlights requisite resources and political support. With a focus on interdisciplinary collaboration, the book addresses the growth of simulation, how to help new faculty transition into the academic role, and use of curriculum in both practice and academic settings. Additionally, the book describes the history and evolution of current nursing curricula and presents the theories, concepts, and tools necessary for curriculum development. Chapters include objectives, discussion points, learning activities, references, and a glossary. New to the Fourth Edition: Reorganized and updated to reflect recent evidence-based curricular changes and developments Highlights current research New chapter: Implementation of Curriculum - Course Development Strategies for the Application of Learning Theories, Educational Taxonomies, and Instruction Team-Building New chapter on Planning for Undergraduate Programs New content on Needs Assessment and the Frame Factors Model New content on Planning for Doctoral Education in Nursing New content on curriculum evaluation, financial support, budget management, and use of evidence Key Features: Supports new faculty as they transition to academe Addresses the need for preparing more faculty educators as defined by IOM report, the ACA, and the Consensus Model Describes the scope of academic curriculum models at every practice and academic level Threads the concept of interdisciplinary collaboration in education throughout Serves as a CNE Certification Review

Teaching in Nursing Springer Publishing Company

Previous edition AJN 2020 Book of the Year! With expert, comprehensive guidance on the assessment and evaluation of student learning in multiple settings, this award-winning text remains the gold standard in this sphere of nursing education. The seventh edition incorporates the latest changes in the field and presents a new chapter on developing test components that prepare students for the Next Generation NCLEX, including descriptions and illustrations of the novel item types. The resource presents an expanded discussion on assessment of higher-level learning and clinical judgment, new content on assessment of competencies, examples of new item types in all chapters, updated information on online testing, more in-depth explanations of how to analyze and score NGN items with examples, and new content on evaluating students in online nursing programs. Also unique to this edition is practical advice on developing test blueprints and creating all types of test components including NCLEX-type items and the Next Generation NCLEX. The text continues to present fundamental measurement and evaluation concepts to aid current and future nurse educators in designing, critiquing, and employing pertinent test and evaluation tools along with guidance for evaluating instructor and program effectiveness. It also examines key social, ethical, and legal issues associated with testing and evaluation, including prevention of cheating and designing academic policies for testing, grading, and progression. New to the Seventh Edition: Discussion of competencies for assessment New chapter on developing test questions and other components preparing students for the Next Generation NCLEX In-depth explanations of how to analyze and score NGN items with examples and exhibits Examples of test items in each chapter Strategies for assessing higher-level learning and clinical judgment Updated content for online testing New content on evaluating students in online nursing programs Key Features: Discusses assessment of competencies Presents strategies for evaluating higher-level cognitive skills and clinical judgment Describes how to develop test blueprints and assemble, administer, write, and analyze tests Provides guidelines for writing all types of test items including Next Generation NCLEX (NGN) Includes explanations of how to analyze and score NGN items with examples and exhibits

Details how to evaluate written assignments with sample scoring rubrics Includes extensive instructor resources including sample syllabus, course modules, learning activities, discussion questions, online resources, PowerPoints, and more

Evaluation and Testing in Nursing Education, Sixth Edition Jones & Bartlett Learning

This series presents innovations in nursing education, written in an easy-to-read manner with a focus on practical information for teachers. Presented by the nurse educators pioneering these advances and focused on the practice of teaching across settings, this review is written for nurse educators in associate, baccalaureate, and graduate nursing programs, staff development, and continuing education. Volume 3 presents a rich array of strategies and experiences that can enrich your teaching.

Advanced Health Assessment & Clinical Diagnosis in Primary Care - E-Book Springer Publishing Company

It is essential to recognize academic nursing education as a specialty area of practice and academic nurse educators as an advanced practice role within professional nursing. The Scope of Practice for Academic Nurse Educators and Academic Clinical Nurse Educators, Third Edition outlines core competencies with task statements for both academic nurse educators practicing in the full scope of the faculty role and academic clinical nurse educators who work with learners in clinical settings. This updated resource presents the historical perspective, values and beliefs, theoretical framework, research in the academic nurse educator roles, and future for those roles. The discussion of each role details relevant definitions, scope of practice, standards of practice, and specific competencies.

Evaluation and Testing in Nursing Education Springer Publishing Company

This book helps nursing students better understand the processes of assessment so that every student can achieve their potential in their studies. It looks at each of the major forms of assessment including essays, exams, portfolios, OSCEs, presentations and practice assessments. It specifically addresses the needs of nursing students on new degree courses and therefore gives a clear insight on how to succeed as a student nurse.

Certified Nurse Educator Review Book Springer Publishing Company

Assessment and Diagnosis Review for Advanced Practice Nursing Certification Exams is designed to help nurse practitioner students strengthen their assessment and clinical-reasoning skills in preparation for certification exams, clinical rotations, and clinical practice. This must-have resource is relevant for the AANPCB and ANCC Family Nurse Practitioner and Adult-Gerontology Primary Care Nurse Practitioner exams, ANCC Psychiatric-Mental Health Nurse Practitioner exam, and PNCB Pediatric Nurse Practitioner Primary Care exam. It includes both review content and practice Q&A—everything you need to pass the exam. It includes comprehensive coverage of pediatric, pregnant, and older adult populations, as well as social determinants of health and wellness and mental health and substance abuse. The review manual begins with evidence-based strategies for successful exam performance and tips for self-care. Each systems-based chapter includes an overview of anatomy and physiology; physical examination; differentials for episodic, acute, and chronic conditions; and wellness and preventive care considerations. Knowledge and application of key concepts are reinforced with numerous illustrations, tables, red flag boxes, evidence-based practice considerations, and end-of-chapter assessment questions. The review concludes with a 150-question practice test that addresses all patient populations and a 50-question practice for the pediatric population. With a total of 350 practice questions and detailed review content and answer rationales, Assessment and Diagnosis Review for Advanced Practice Nursing Certification Exams gives you the tools to study your way and the confidence to pass the first time, guaranteed. Key Features: Prepares APRN students for the assessment and diagnosis portions of their AANPCB, ANCC, and PNCB certification exams Provides a comprehensive yet concise review of the assessment of all body systems, as well as social determinants of health and mental health and substance abuse Includes coverage of pediatric, pregnant, and older adult populations Features abundant illustrations, tables, and boxes to facilitate information retention Includes a total of 350 exam-style questions with robust rationales, including two practice tests The American Academy of Nurse Practitioners Certification Board (AANPCB), American Nurses Credentialing Center (ANCC), and Pediatric Nursing Certification Board (PNCB) are the sole owners of their certification programs. AANPCB, ANCC, and PNCB do not endorse this exam preparation resource, nor do they have a proprietary relationship with Springer Publishing Company.

Evaluation Beyond Exams in Nursing Education Springer Publishing Company

Assessment and Diagnosis Review for Advanced Practice Nursing Certification Exams Springer Publishing Company

The only text to comprehensively address the assessment of student learning in a wide variety of settings. Long considered the gold standard for evaluation and testing in nursing education, the sixth edition of this classic text provides expert, comprehensive guidance in the assessment of student learning in a wide variety of settings, as well as the evaluation of instructor and program effectiveness. It presents fundamental measurement and evaluation concepts that will aid nurse educators in the design, critique, and use of appropriate tests and evaluation tools. Important social, ethical, and legal issues associated with testing and evaluation also are explored, including the prevention of cheating and academic policies for testing, grading, and progression. Written by experts in the field of nursing education, *Evaluation and Testing in Nursing Education* features practical advice on the development of test blueprints; creation of all types of test items, including next-generation NCLEX-style items; the assembly, administration, and scoring of tests; test/item analyses and interpretation; evaluation of higher levels of learning; assessment of written assignments; and suggestions for creating tests in online courses and programs. An entire section is devoted to clinical evaluation processes and methods, including the use of simulation for assessment and high-stakes evaluation, clinical evaluation in distance settings, and the use of technology for remote evaluation of clinical performance. The text meets the National League for Nursing Certified Nurse Educator Competency #3: Use Assessment and Evaluation Strategies. NEW TO THE SIXTH EDITION: Expanded coverage of test item analysis and interpretation Expanded coverage of clinical evaluation processes and methods Guidance on how to work with part-time clinical educators and preceptors to ensure that evaluation processes are followed consistently Expanded content on the construction and administration of online tests Tips for adapting test bank items and other item-writing resources Guidelines for the design of academic policies for academic integrity, testing, grading, and progression KEY FEATURES: Describes how to develop test blueprints and assemble, administer, write, and analyze tests Provides guidelines for the selection of standardized tests for a nursing curriculum Details how to evaluate written assignments with sample scoring rubrics Includes a robust ancillary package: Instructor's Manual (with sample syllabus, course modules, learning activities, discussion questions, assessment strategies, and online resources) and chapter PowerPoint slides Purchase includes digital access for use on most mobile devices or computers

Keating's Curriculum Development and Evaluation in Nursing Education Elsevier Health Sciences

Based on the CNE® examination blueprint, *Certified Nurse Educator Review Book: The Official NLN Guide to the CNE® Exam, Second Edition* delivers a comprehensive review to prepare you to take the Certified Nurse Educator examination. Each chapter provides an overview of the content included on the exam blueprint and practice test items, complete with rationales for correct and incorrect answers, reflecting the types of items you will encounter on the exam. This revised edition streamlines and enhances your exam preparation with updated content, additional bulleted lists and tables, additional practice questions, and example scenarios that demonstrate the practical application of chapter concepts.

Annual Review of Nursing Education Volume 3, 2005 Elsevier Health Sciences

Designated a Doody's Core Title and Essential Purchase! "Without question, this book should be on every nurse educator's bookshelf, or at least available through the library or nursing program office. Certainly, all graduate students studying to be nurse educators should have a copy." --Nursing Education Perspectives "This [third edition] is an invaluable resource for theoretical and practical application of evaluation and testing of clinical nursing students. Graduate students and veteran nurses preparing for their roles as nurse educators will want to add this book to their library." Score: 93, 4 stars --Doody's "This 3rd edition. . . has again given us philosophical, theoretical and social/ethical frameworks for understanding assessment and measurement, as well as fundamental knowledge to develop evaluation tools for individual students and academic programs." -Nancy F. Langston, PhD, RN, FAAN Dean and Professor Virginia Commonwealth University School of Nursing All teachers need to assess learning. But often, teachers are not well prepared to carry out the tasks related to evaluation and testing. This third edition of *Evaluation and Testing in Nursing Education* serves as an authoritative resource for teachers in nursing education programs and health care agencies. Graduate students preparing for their roles as nurse educators will also want to add this book to their collection. As an inspiring, award-winning title, this book presents a comprehensive list of all the tools required to measure students' classroom and clinical performance. The newly revised edition sets forth expanded coverage on essential concepts of evaluation, measurement, and testing in nursing education; quality standards of effective measurement instruments; how to write all types of test items and establish clinical performance parameters and benchmarks; and how to evaluate critical thinking in written assignments and clinical performance. Special features: The steps involved in test construction, with guidelines on how to develop test length, test difficulty, item formats, and scoring procedures Guidelines for assembling and administering a test, including design rules and suggestions for reproducing the test Strategies for writing multiple-choice and multiple-response items How to develop test items that prepare students for licensure and certification examinations Like its popular predecessors, this text offers a seamless blending of theoretical and practical insight on evaluation and testing in nursing education, thus serving as an invaluable resource for both educators and students.

Certified Academic Clinical Nurse Educator (CNE®/cl) Review Manual Springer Publishing Company

The Scope of Practice for Academic Nurse Educators and Academic Clinical Nurse Educators Springer Publishing Company

Take the 'next step' in health assessment! Advanced Health Assessment and Clinical Diagnosis in Primary Care, 5th Edition goes beyond basic history and physical examination to help you master the diagnostic reasoning process. You'll develop this key skill by following assessment guidelines that focus on a specific complaint rather than beginning with a previously established diagnosis or disease entity. Written by advanced practice nursing experts Joyce Dains, Linda Baumann, and Pamela Scheibel, this edition includes new chapters on evidence-based preventive health screening and on heartburn and indigestion, along with a new full-color design. Master the differential diagnosis process outlined in this book, and you'll be able to accurately diagnose the majority of patients seen in today's primary care settings. A clear, consistent diagnostic reasoning process takes you to the next step of health assessment — beyond basic history and physical examination to diagnostic reasoning. Diagnostic Reasoning: Focused History sections use 'self-questions' to walk you through the thinking process involved in obtaining a pertinent, relevant, problem-specific history that will assist in differential diagnosis. Diagnostic Reasoning: Focused Physical Examination sections explain how to perform more advanced diagnostic techniques and interpret the findings. Key Questions guide you through assessment and toward an accurate diagnosis by listing questions to ask the patient, followed by explanations of what the patient's responses might signify. Laboratory and Diagnostic Studies sections outline the types of studies that might be appropriate based on the focused history and focused physical examination. Differential Diagnosis sections offer the most common diagnoses for each patient problem and summarize the history and physical examination findings, along with recommended laboratory and diagnostic studies. Differential Diagnosis tables provide a quick-reference summary of possible diagnoses for each patient problem. Evidence-Based Practice boxes — more than 30 are NEW — summarize the scientific evidence related to the diagnosis of patient problems. Alphabetical Table of Contents provides a convenient listing of common health problems.

Certified Nurse Educator (Cne) Review Manual, Third Edition W App Springer Publishing Company

Based on a philosophy of active learning, this innovative text uses unfolding case studies as a compelling vehicle for learning fundamental nursing content. Unlike traditional vignettes, these case studies evolve over time as real-life situations, better enabling students to develop the skills they

need to problem solve, actively engage, and use critical thinking techniques in new situations. The unfolding case study method also assists in the development of skills that are important for nursing students about to embark on the NCLEX-RN. The text incorporates all types of NCLEX-style questions into the unfolding case studies to facilitate exam preparation. This method offers a unique study opportunity that integrates all fundamental concepts and skills application with practice and professional role responsibilities. The patient care content areas that are needed for NCLEX-RN success—safe and effective care, health promotion, physiological and psychological integrity—are interwoven into an engaging format. References at the end of each chapter provide guidance for additional study as needed. Electronic and web resources provide quick access to valuable web-delivered information that will be useful in a clinical setting. eBook versions of this text will take the reader directly to the web resource. Key Features: Integrates core nursing concepts and content into unfolding case studies Provides engaging test review preparation for course success and NCLEX-RN test success Offers students a refreshing new study option and relief from endless Q&A format offered by other content review books Develops critical thinking skills to help students "think like a nurse" Incorporates all types of NCLEX-style questions into unfolding case studies

Systematic Assessment of Learning Outcomes Springer Publishing Company

The second edition of the current leading nursing text in curriculum development and evaluation continues to serve nurse educators in academic settings as well as in the practice arena. It is a practical guide for developing, revising, and evaluating nursing curricula and educational programs, complete with case studies and details on conducting a needs assessment to determine the extent of revision necessary within current curricula. This text focuses on evidence-based practice, safety and quality assurance concepts, and the role of creative and critical-thinking aspects. It highlights NLN and AACN core competencies in developing and evaluating curricula in all levels of nursing programs. Additionally, it includes a comprehensive list of critical evaluation and accreditation tips, directions on how to prepare for an accreditation visit, and two proposed curricula for nurse educators to consider adapting into educational materials. Key features: Discusses the continuing growth of technology and its application in nursing programs Examines health care reform legislation that is expected to change the way care is delivered Contains updates on the continuing career-ladder and entry-level issues related to nursing Provides details on pedagogical methods, objectives, discussion points, learning activities, and references Includes a glossary of commonly used terms in curriculum development and evaluation This revised edition further examines several major objectives of the text, including major milestones for the past 100 years in the American nursing education system, program review and accreditation processes, and evaluating current trends in nursing education and their role in curriculum development.
