ROLLINS PHELPS

Néo Newnes
 This volume, written by leading authorities from Eastern Europe, outlines the history of the health and environmental consequences of the Chernobyl disaster. Although there has been much discussion concerning the impacts of nuclear accidents, and Chernobyl in particular, never before has there been a comprehensive presentation of all the available information concerning the health and environmental effects of the low dose radioactive contaminants that were emitted from the Chernobyl Nuclear Power Plant. The official discussions emanating from the IAEA and associated UN agencies (e.g. the Chernobyl Forum

reports) have largely downplayed or ignored many of the findings reported in the Eastern European scientific literature and as a consequence these reports have erred on the side of negative findings simply because much of what was known was not included in their assessments. This new book provides a complete and extensive summary of all known research, including that published in Russian and Ukrainian, and provides new insights to the likely long term health and environmental consequences of nuclear accidents. NOTE: Annals volumes are available for sale as individual books or as a journal. For information on institutional journal subscriptions, please visit www.blackwellpublishing.com/nyas. ACADEMY MEMBERS: Please contact the New York Academy of Sciences directly to place your order (www.nyas.org).

Feeding You Lies Academic Press
 Ancestral DNA, Human Origins, and Migrations describes the genesis of humans in Africa and the subsequent story of how our species migrated to every corner of the globe. Different phases of this journey are presented in an integrative format with information from a number of disciplines, including population genetics, evolution, anthropology, archaeology, climatology, linguistics, art, music, folklore and history. This unique approach weaves a story that has synergistic impact in the clarity and level

of understanding that will appeal to those researching, studying, and interested in population genetics, evolutionary biology, human migrations, and the beginnings of our species. - Integrates research and information from the fields of genetics, evolution, anthropology, archaeology, climatology, linguistics, art, music, folklore and history, among others - Presents the content in an entertaining and synergistic style to facilitate a deep understanding of human population genetics - Informs on the origins and recent evolution of our species in an approachable manner

Bestselling author Mhairi McFarlane returns with another heartfelt romantic comedy perfect for fans of Josie Silver, Sophie Kinsella, or Sally Thorne. One of Shondaland's 5 Must-Read Books for March and a Best Romance of 2020 by Amazon, OprahMag, Insider, BuzzFeed, Bustle, Cosmo, PopSugar, and BookPage. If faking love is this easy... how do you know when it's real? When her partner of over a decade suddenly ends things, Laurie is left reeling—not only because they work at the same law firm and she has to see him every day. Her once perfect life is in shambles and the thought of dating again in the age of Tinder is nothing short of horrifying. When news of her ex's pregnant girlfriend hits the office grapevine, taking the humiliation lying down is not an option. Then a chance encounter in a broken-down elevator with the office playboy opens up a new possibility. Jamie Carter doesn't believe in love, but he needs a respectable, steady girlfriend to impress their bosses. Laurie wants a hot new man to give the rumor mill something else to talk about. It's the perfect proposition: a fauxmance played out on social media, with strategically staged photographs and a specific end date in mind. With the plan hatched, Laurie and Jamie begin to flaunt their new couple status, to the astonishment—and jealousy—of their friends and colleagues. But there's a fine line between pretending to be in love and actually falling for your charming, handsome fake boyfriend...

New Look to Phytomedicine: Advancements in Herbal Products as Novel Drug Leads is a compilation of in-depth information on the phytopharmaceuticals used in modern medicine for the cure and management of difficult-to-treat and challenging diseases. Readers will find cutting-edge knowledge on the use of plant products with scientific validation, along with updates on advanced herbal

medicine in pharmacokinetics and drug delivery. This authoritative book is a comprehensive collection of research based, scientific validations of bioactivities of plant products, such as anti-infective, anti-diabetic, anti-cancer, immune-modulatory and metabolic disorders presented by experts from across the globe. Step-by-step information is presented on chemistry, bioactivity and the functional aspects of biologically active compounds. In addition, the pharmacognosy of plant products with mechanistic descriptions of their actions, including pathogenicity is updated with information on the use of nanotechnology and molecular tools in relation to herbal drug research. - Compiles up-to-date information on the chemotherapeutics used in the treatment of infective and metabolic disorders - Presents advancements in the discovery of new drugs from plants using molecular and nanotechnology tools - Examines detailed information on the use of herbals agents in cancer, HIV and other ailments, including diabetes, malaria and neurological disorders

Odile Jacob Simon and Schuster
 The beloved, #1 global bestseller by John Green, author of *The Anthropocene Reviewed* and *Turtles All the Way Down* "John Green is one of the best writers alive." -E. Lockhart, #1 bestselling author of *We Were Liars* "The greatest romance story of this decade." -Entertainment Weekly #1 New York Times Bestseller • #1 Wall Street Journal Bestseller • #1 USA Today Bestseller • #1 International Bestseller Despite the tumor-shrinking medical miracle that has bought her a few years, Hazel has never been anything but terminal, her final chapter inscribed upon diagnosis. But when a gorgeous plot twist named Augustus Waters suddenly appears at Cancer Kid Support Group, Hazel's story is about to be completely rewritten. From John Green, #1 bestselling author of *The Anthropocene Reviewed* and *Turtles All the Way Down*, *The Fault in Our Stars* is insightful, bold, irreverent, and raw. It brilliantly explores the funny, thrilling, and tragic business of being alive and in love.
Sleepless in Manhattan HQN Books
 A NYC events planner gets her big break—with the only guy to break her heart—in the USA Today–bestselling author's "satisfying, sizzling romance" (All About Romance). Cool, calm, and competent, events planner Paige Walker loves a challenge. After a childhood spent in and out of hospitals, she's now determined to prove herself—and where better to take the world by storm than Manhattan? But when Paige loses the job

she loves, she must face her biggest challenge of all—striking out on her own. Except launching her own events company is nothing compared to hiding her outrageous crush on Jake Romano—her brother's best friend, New York's most in-demand date, and the only man to break her heart. When Jake offers Paige's fledgling company a big opportunity, their still-sizzling chemistry starts giving her sleepless nights. But can she convince the man who trusts no one to take a chance on forever? *Sleepless in Manhattan* is the first novel in Sarah Morgan's *From Manhattan with Love* trilogy.

Nouveau Petit Larousse Illustré Odile Jacob

For fans of Sarah Dessen and John Green, this is a breathtaking debut about a couple who fall in love...twice. Before: Reena Montero has loved Sawyer LeGrande for as long as she can remember. But he's never noticed that Reena even exists...until one day, impossibly, he does. Reena and Sawyer fall in messy, complicated love. Then Sawyer disappears without a word, leaving a devastated—and pregnant—Reena behind. After: Almost three years have passed, and there's a new love in Reena's life: her daughter. Reena's gotten used to life without Sawyer, but just as suddenly as he disappeared, he turns up again. Reena wants nothing to do with him, though she'd be lying if she said his being back wasn't stirring something in her. After everything that's happened, can Reena really let herself love Sawyer LeGrande again?

Soon to be a Passionflix original film!
 “An instant classic...highly recommended!” —New York Times and USA TODAY bestselling author Jennifer Probst USA TODAY bestselling indie author Alice Clayton delights readers with the sexy, laugh-out-loud romance of Caroline and Simon in Wallbanger, the first book in the Cocktail series! The first night after Caroline moves into her fantastic new San Francisco apartment, she realizes she’s gaining an—um—intimate knowledge of her new neighbor’s nocturnal adventures. Thanks to paper-thin walls and the guy’s athletic prowess, she can hear not just his bed banging against the wall but the ecstatic response of what seems (as loud night after loud night goes by) like an endless parade of women. And since Caroline is currently on a self-imposed “dating hiatus,” and her neighbor is clearly lethally attractive to women, she finds her fantasies keep her awake even longer than the noise. So when the wallbanging threatens to literally bounce her out of bed, Caroline, clad in sexual frustration and a pink baby-doll nightie, confronts Simon Parker, her heard-but-never-seen neighbor. The tension between them is as thick as the walls are thin, and the results just as mixed. Suddenly, Caroline is finding she may have discovered a whole new definition of neighborly... In a delicious mix of silly and steamy, Alice Clayton dishes out a hot and hilarious tale of exasperation at first sight.

Viticulture-arboriculture

Toxicological Survey of African Medicinal Plants provides a detailed overview of toxicological studies relating to traditionally used medicinal plants in Africa, with special emphasis on the methodologies and tools used for data collection and interpretation. The book considers the physical parameters of these plants and their effect upon various areas of the body and human health, including chapters dedicated to genotoxicity, hepatotoxicity, nephrotoxicity, cardiotoxicity, neurotoxicity, and specific organs and systems. Following this discussion of the effects of medicinal plants is a critical review of the guidelines and methods in use for toxicological research as well as the state of toxicology studies in Africa. With up-to-date research provided by a team of experts, Toxicological Survey of African Medicinal Plants is an invaluable resource for researchers and students involved in pharmacology, toxicology, phytochemistry, medicine, pharmacognosy, and pharmaceutical biology. - Offers a critical review of the methods used in toxicological survey of

medicinal plants - Provides up-to-date toxicological data on African medicinal plants and families - Serves as a resource tool for students and scientists in the various areas of toxicology

Imported and American Varieties of Dates (Phoenix Dactylifera) in the United States Academic Press

This follow-up to New York Times bestseller *The Food Babe Way* exposes the lies we've been told about our food--and takes readers on a journey to find healthy options. There's so much confusion about what to eat. Are you jumping from diet to diet and nothing seems to work? Are you sick of seeing contradictory health advice from experts? Just like the tobacco industry lied to us about the dangers of cigarettes, the same untruths, cover-ups, and deceptive practices are occurring in the food industry. Vani Hari, aka *The Food Babe*, blows the lid off the lies we've been fed about the food we eat--lies about its nutrient value, effects on our health, label information, and even the very science we base our food choices on. You'll discover: • How nutrition research is manipulated by food company funded experts • How to spot fake news generated by Big Food • The tricks food companies use to make their food addictive • Why labels like "all natural" and "non-GMO" aren't what they seem and how to identify the healthiest food • Food marketing hoaxes that persuade us into buying junk food disguised as health food Vani guides you through a 48-hour Toxin Takedown to rid your pantry, and your body, of harmful

chemicals--a quick and easy plan that anyone can do. A blueprint for living your life without preservatives, artificial sweeteners, additives, food dyes, or fillers, eating foods that truly nourish you and support your health, *Feeding You Lies* is the first step on a new path of truth in eating--and a journey to your best health ever.

If I Never Met You Academic Press

Dr. Timothy Schowalter has succeeded in creating a unique, updated treatment of insect ecology. This revised and expanded text looks at how insects adapt to environmental conditions while maintaining the ability to substantially alter their environment. It covers a range of topics- from individual insects that respond to local changes in the environment and affect resource distribution, to entire insect communities that have the capacity to modify ecosystem conditions. *Insect Ecology, Second Edition*, synthesizes the latest research in the field and has been produced in full color throughout. It is ideal for students in both entomology and ecology-focused programs. **NEW TO THIS EDITION:** • New topics such as elemental defense by plants, chaotic models, molecular methods to measure dispersion, food web relationships, and more* • Expanded sections on plant defenses, insect learning, evolutionary tradeoffs, conservation biology and more* • Includes more than 350 new references* • More than 40 new full-color figures

Revue générale des matières colorantes et des industries qui s'y rattachent Simon and Schuster

"Bouvard and Pécuchet" is one of Gustave Flaubert's most well-known works. With its meticulously crafted sentences and precise words, the novel has endured the test of time without losing its impact and expressive power. The narrative focuses on two credulous characters, the copyists, and friends, Bouvard and Pécuchet, who, upon receiving an inheritance, decide to swap Paris for life in the countryside. The result is a series of mishaps, narrated with refined humor and laden with criticism. The structure of the narrative depicts the very obsession with the pursuit of truth as a wheel spinning in vain, amusingly and pathetically involving its two protagonists and all the encyclopedic knowledge of the 19th century. The work "Bouvard and Pécuchet" is part of the famous collection: "1001 Books You Must Read Before You Die."

The Fault in Our Stars John Wiley & Sons
Comment bien s'alimenter en respectant ses besoins au fil de la grossesse ? Quelles familles d'aliments et vitamines privilégier ? Comment se prémunir du diabète gestationnel ?
