Anti-bias education begins with you!

Become a skilled anti-bias teacher with this practical guidance to confronting and eliminating barriers.

*Phonics for Kindergarten, Grade K Little, Brown Books for Young Readers*

During her 18 years as a kindergarten teacher she developed a method of

teaching that provides an excellent classroom atmosphere in which young children can excel in learning. She believes the first two weeks of school are very important because that is when the teacher sets the stage for an exciting, adventurous and memorable academic school year. During that time her students learned what acceptable behavior was in the classroom and while moving across campus as a group. Once they learned what was acceptable, the rest of the school year fell into place and the children were excited to learn. This drastically

reduces discipline problems for the rest of the school year. She has mentored two teachers, at the request of her principal, using these methods and both continue to use them. These methods are simple, effective and straight forward. This book is the second of a four book series that describes her methods of instruction and classroom management. The book is full of cute illustrations provided by her sister-in-law, Carolyn Smith. There are also numerous photographs from her Patriotic Programs, sample projects for the kids to do that can be both instructional and fun,

as well as organizing procedures and techniques. Patty has reviewed the book with principals, school superintendants and an instructor at Northern Arizona University. All believed that it is an excellent and practical book for beginning teachers.

Each chapter contains planning sheets to help teachers analyze assessments in order to group students and select a teaching focus Includes detailed, ready-to-go lesson plans for all stages of reading: emergent, early, transitional, and fluent

Lapping at the sandy shores, stretching from the North Pole to the South Pole and from North America to Africa, the Atlantic Ocean is constantly changing shape and size and is always traveling. It has fascinated people for ages and still does today. Scientists study the Atlantic, fishermen search for its schools of fish, artists paint it, and poets write about it. Here, the power and grace of the Atlantic Ocean are beautifully captured in Brian Karas's sparkling text and paintings.

Pop's Bridge Penguin

Simon and Molly were the best of friends, just the two of them. Until Hester moved

in. Hester doesn't want to ride the two-wheeler, like they always do; she wants to make paper airplanes instead. And the toast Simon makes for her is too boring; she wants to add cinnamon sugar. Molly happily goes along with all of her changes, but Simon liked things the way they were before Hester moved in. With Hester around, will Molly still want to be his

friend? Lisa Jahn-Clough once again captures the complexities of friendship. She deftly explores the children's feelings of insecurity and exclusion, revealing both the hidden motives behind their actions and the keys to their reconciliation. Readers will discover that with a little understanding and compromise, while two is definitely better than one, three can be even more fun!
