Capstone  
A precocious young girl is determined to prove herself as an explorer in the first novel in the whimsical Polar Bear

Explorers' Club series. Stella Starflake Pearl knows, without a doubt, that she was born to be an adventurer. It's too bad girls are forbidden from becoming explorers. But Stella's father has never been one to play by the rules. Leaving behind her pet polar bear, Gruff, and beloved unicorn, Magic, Stella and Felix set off on an expedition to the

snowy Icelands. There, Stella plans to prove herself as a junior explorer, worthy of membership in the Polar Bear Explorers' Club. So when Stella and three other junior explorers are separated from the rest of their expedition, she has the perfect opportunity. Can they explore the frozen wilderness and live to tell the tale? The first in

Alex Bell's imaginative new series, *The Polar Bear Explorers' Club* is a fun and daring adventure filled with magic, outlaws, and fantastic faraway lands.

From the World's No. 1 Storyteller, *The Witches* is a children's classic that has captured young reader's imaginations for generations. This is not a fairy tale. This is about real witches.

Grandmamma loves to tell about witches. Real

witches are the most dangerous of all living creatures on earth. There's nothing they hate so much as children, and they work all kinds of terrifying spells to get rid of them. Her grandson listens closely to Grandmamma's stories—but nothing can prepare him for the day he comes face-to-face with The Grand High Witch herself! Now a major motion picture! Cover may vary.

PREPARADOS? Una calurosa noche de verano, dormíamos plácidamente en la casa de campo de una amiga de la señora Silver cuando, de repente, una lluvia de piedras nos despertó (salvo a Leo, que siguió roncando...). Sobresaltados, encendimos la luz y nos dimos cuenta de que no eran piedras lo que caían... ¡sino bellotas! ¿Os imagináis quién las lanzaba con tan mala intención?

Which Witch? is a brilliantly witty tale of magic and marriage by Eva Ibbotson, shortlisted for the Carnegie Medal. 'Find me a witch!' cried Arriman the Awful, feared Wizard of the North. Arriman has decided to marry. His wife must be a witch of the darkest powers - but which witch will she be? To find the most fiendish, he holds a spell-casting competition. Glamorous Madame Olympia performs the terrifying Symphony of Death and conjures up a

thousand plague-bearing rats. The magic of gentle Belladonna, the white witch, goes hopelessly wrong. She produces perfumed flowers instead of snakes. And bats roost in her golden hair instead of becoming blood-sucking vampires. Poor Belladonna longs to be an evil enchantress - but how? 'This kind of fun will never fail to delight' - Philip Pullman.

## MONTENA

A dark, engrossing, blood-drenched tale of the familiar threats to female power—and one girl's journey to regain it. Five starred reviews greeted this powerful story from Elana K. Arnold, author of the Printz Honor winner *Damsel*. You are alone in the woods, seen only by the unblinking yellow moon. Your hands are empty. You are nearly naked. And the wolf is angry. Since her grandmother became her caretaker when she was four years old, Bisou

Martel has lived a quiet life in a little house in Seattle. She's kept mostly to herself. She's been good. But then comes the night of homecoming, when she finds herself running for her life over roots and between trees, a fury of claws and teeth behind her. A wolf attacks. Bisou fights back. A new moon rises. And with it, questions. About the blood in Bisou's past, and on her hands as she stumbles home. About broken boys and vicious wolves. About girls lost in the woods—frightened,

but not alone.

A fascinating exploration of the nature of consciousness This engaging and readable book provides an introduction to consciousness that does

justice both to the science and to the philosophy of consciousness, that is, the mechanics of the mind and the experience of awareness. The book opens with a general discussion of the brain and of consciousness itself. Then, exploring the areas of brain science most likely to illuminate the basis of awareness, Zeman focuses on the science of sleep and waking and on the science of vision. He describes healthy states and disorders--epilepsy, narcolepsy, blindsight and

hallucinations after stroke--that provide insights into the capacity for consciousness and into its contents. And he tracks the evolution of the brain, the human species, and human culture and surveys the main current scientific theories of awareness, pioneering attempts to explain how the brain gives rise to experience. Zeman concludes by examining philosophical arguments about the nature of consciousness. A practicing neurologist, he animates his text with

examples from the behavioral and neurological disorders of his patients and from the expanding mental worlds of young children, including his own. His book is an accessible and

enlightening explanation of why we are conscious.
