The book aims to describe the history of Chan (Japanese Zen) School thought from the standpoint of social history. Chan, a school of East Asian Buddhism, was influential on all levels of societies in the region because of its intellectual and aesthetic appeal. In China, Chan infiltrated all levels of society, mainly because it engaged with society and formed the mainstream of Buddhism from the tenth or eleventh centuries through to the twentieth century. This book, taking a critical stance, examines the entire history of Chan thought and practice from the viewpoint of a modern Chinese scholar, not a practitioner, but an intellectual historian who places ideological developments in social contexts. The author suggests that core elements of Chan have their origins in Daoist philosophers, especially Zhuangzi, and not in Indian Buddhist concepts. Covering the period from

the sixth century into the twentieth century, it deals with Chan interactions with neo-Confucianism, Quanzhen Daoism, and Gongyang new text philology, as well as with literature and scholarship, its fusion with Pure Land Buddhism, and its syncretic tendencies. Chan's exchanges with emperors from the Song, Yuan, Ming, and Qing Dynasty, as well as the motives of some loyalists of the Ming Dynasty for joining Chan after the fall of the Ming, are described. The book concludes with an examination of the views of Chan of Hu Shi, D.T. Suzuki, and the scholar-monk Yinshun.

 The Regulus missile was a direct outgrowth of World War II. The success of Germany's V-1 "buzz bombs" and the awesome power of the a-bomb suggested that developing a submarine-launched, nuclear-armed guided missile was an imperative. The Chance-Vought Aircraft Company won the contract for Regulus with a bold proposal. Their missile resembled a pilotless jet aircraft, and during the test phase was equipped with landing gear, allowing the missile to be recovered rather than expended during the

tests. Regulus would be radio controlled, either by a chase aircraft or by a nearby ship or submarine, and it could carry a nuclear payload. JATO boosters enabled submarine launch of the Regulus. It would be deployed aboard five submarines. They conducted the nation's first nuclear deterrent patrols off the coast of the Soviet Union in 1959-1964. Originally printed by the U.S. Navy and Chance-Vought, this handbook was restricted. It was declassified and is here reprinted in book form.

New Series Manuals Combined: UH-1 HUEY Army Helicopter Maintenance, Parts & Repair Manuals This new FAA AMT Handbook--Powerplant (Volume 1 and 2) replaces and supersedes Advisory Circular (AC) 65-12A. Completely revised and updated, this handbook reflects current operating procedures, regulations, and equipment. This book was developed as part of a series of handbooks for persons preparing for mechanic certification with airframe or powerplant ratings, or both -- those seeking an Aviation Maintenance Technician (AMT) Certificate, also called an A&P license. An effective text for both students and instructors, this handbook will also serve as an invaluable reference guide for current technicians who wish to improve their knowledge.
