**Tiger Paw** Wildlife Worlds-Adventures in Nature  
 It's December 1997 and a man-eating tiger is on the prowl

outside a remote village in Russia's Far East. The tiger isn't just killing people, it's annihilating them, and a team of men and their dogs must hunt it on foot through the forest in the brutal cold. To their horrified astonishment it emerges that the attacks are not random: the tiger is engaged in a vendetta. Injured and starving, it must be found before it strikes again, and the story becomes a battle for survival between the two main characters: Yuri Trush, the lead tracker, and the tiger itself. As John Vaillant vividly recreates the extraordinary events of that winter, he also gives us an unforgettable portrait of a spectacularly beautiful region where plants and animals exist that are found nowhere else on earth, and where the once great Siberian Tiger - the largest of its species, which can weigh over 600 lbs at more than 10 feet long - ranges daily over vast territories of forest and mountain, its numbers diminished to a fraction of what they once were. We meet the native tribes who for centuries have worshipped and lived alongside tigers - even sharing their kills with them - in a natural balance. We witness the first arrival of settlers, soldiers and hunters in the tiger's territory in the 19th century and 20th century, many fleeing Stalinism. And we come to know the Russians of today - such as the poacher Vladimir Markov - who, crushed by poverty, have turned to poaching for the corrupt,

high-paying Chinese markets. Throughout we encounter surprising theories of how humans and tigers may have evolved to coexist, how we may have developed as scavengers rather than hunters and how early Homo sapiens may have once fit seamlessly into the tiger's ecosystem. Above all, we come to understand the endangered Siberian tiger, a highly intelligent super-predator, and the grave threat it faces as logging and poaching reduce its habitat and numbers - and force it to turn at bay. Beautifully written and deeply informative, *The Tiger* is a gripping tale of man and nature in collision, that leads inexorably to a final showdown in a clearing deep in the Siberian forest.

*The Time of My Life* Knopf Canada

Two children accompany their parents as they travel the world helping animals on the verge of extinction. As their parents work alongside international agencies, the children have their own thrilling adventures. *Paw Prints in the Snow* is written with the assistance and guidance of London Zoo's conservation team. All information is accurate and the stories are full of excitement and tension. Sally Grindley is the author of bestselling and award-winning fiction for young readers. Here she brings to life a story of hope set in Russia. When Joe and Aesha's mother is given an assignment to train young vets, the Brook family visits an important nature reserve near Lazovsky in eastern Russia. In this spectacular snow-bound landscape, Joe is thrilled by the prospect of glimpsing a rare Amur tiger in the wild. Alongside the fieldworkers, the Brooks get involved in tracking local species, such as the Asiatic black bear and the raccoon dog. However, the tigers prove elusive - until Joe's interest in wildlife photography leads him to make an unexpected discovery that puts his very life in danger.

In *The Great Soul of Siberia*, renowned tiger researcher Sooyong Park tracks three generations of Siberian tigers living in remote southeastern Russia. Reminiscent of the way Timothy Treadwell (the so-called Grizzly Man) immersed himself in the lives of bears, Park sets up underground bunkers to observe the tigers, living thrillingly close to these beautiful but dangerous apex predators. At the same time, he draws from twenty years of experience and research to focus on the Siberian tigers' losing battle against poaching and diminishing habitat. Over the two years of his harrowing stakeout, Park's poignant and poetic observations of the tigers draw a fiercely compassionate portrait of these elusive, endangered creatures.

From animals long believed extinct to monsters we thought never existed—a cryptozoologist's true accounts of his worldwide hunt for legendary creatures. Cryptozoologist Richard Freeman has spent years researching and tracking down mythical monsters. In this book, he recounts more riveting monster hunt stories from his globetrotting adventures: through the dense forests of Sumatra on the trail of a mystery ape known as the orang-

pendek, to Tasmania in search of the thylacine or Tasmanian wolf. Every corner of Earth has its own monster—even in the traceless Gobi Desert, where he searches for the Mongolian death worm, a creature so feared by the nomads that it can send a whole community into a panic. Freeman also provides excellent advice on how to carry out your own cryptozoological expeditions from scratch—with information on: what equipment to take inoculations how to choose which mythical animals to hunt planning ahead the importance of getting good local guides, and more

Proceedings from the ninth International Conference on Artificial Life; papers by scientists of many disciplines focusing on the principles of organization and applications of complex, life-like systems. Artificial Life is an interdisciplinary effort to investigate the fundamental properties of living systems through the simulation and synthesis of life-like processes. The young field brings a powerful set of tools to the study of how high-level behavior can arise in systems governed by simple rules of interaction. Some of the fundamental questions include: What are the principles of evolution, learning, and growth that can be understood well enough to simulate as an information process? Can robots be built faster and more cheaply by mimicking biology than by the product design process used for automobiles and airplanes? How can we unify theories from dynamical systems, game theory, evolution, computing, geophysics, and cognition? The field has contributed fundamentally to our understanding of life itself through computer models, and has led to novel solutions to complex real-world problems across high technology and human society. This elite biennial meeting has grown from a small workshop in Santa Fe to a major international conference. This ninth volume of the proceedings of the international A-life conference reflects the growing quality and impact of this interdisciplinary scientific community.

As a serial killer wreaks havoc on Wall Street, dismantling a corrupt financier's financial empire one body at a time, FBI profiler Scott Forrester uncovers the deadly secret of a demon-worshipping Hindu cult that is determined to change the very fabric of society. Firmly in their assassin's crosshairs, Scott Forrester is forced underground to stop the killing spree. But will he survive the deal he must make with the Devil to thwart their satanic plan? Best Indie Thriller Nominee - Kindle Book Reviews Best Thriller Nominee - Florida Writers Association, Royal Palm Literary Awards "A great variation to the thriller genre...the author blended a detective storyline with a thread of the esoteric which makes it stand out from other thrillers. The ending leaves you guessing... a well thought out story, with lots of action. Recommended for all lovers of thrillers and action books." - Midwest Book Review "5 Stars! - This book had my juices flowing-my heart pounding, blood boiling, anger, rage, PISSED OFF. It had me thinking of all kinds of things. So applicable to what is going on today. Believable. For a debut novel, I was really impressed." - Sherry Fundin, Fundinmental Book Reviews "This book goes far beyond a 5 STAR rating! Charles A. Cornell is a magnificent storyteller and his debut novel is brilliant. Tiger Paw was a very tumultuous read for me. It touches on everything that's wrong in government and Wall Street. I can imagine the challenge he faces when writing the next novels. It will be hard to top this." - Laura Thomas, FU Only Knew Book Reviews More on Tiger Paw... In Charles A Cornell's critically acclaimed mystery thriller, Tiger Paw, FBI Special Agent Scott Forrester investigates a series of bizarre murders at the center of a Wall Street stock scam. The killer's most recent victim - billionaire Wall Street mogul Matthew Carleton - was drowned in a bath tub of red wine. The FBI believes the murders are the work of a professional hit man. But the killer leaves behind an indecipherable message that defies explanation. Scott Forrester teams up with criminal psychologist, Dr. Rajeev Chandra. They decode the killer's cryptic warning. It points to an East Indian cult whose religious icon - an altarpiece lost for centuries and now on display in the US - is haunted by a disturbing past. As the billionaire financier's Wall Street empire is dismantled one body at a time, they encounter sinister forces deep inside the corridors of power in Washington that are determined to silence anyone who uncovers their connection with the cult. The conspiracy is spreading like a cancer and is on a mission to change the very fabric of society. Dogged by his own demons - his troubled brother, a disabled Afghan war veteran; an adversarial boss hell bent to destroy his career; and a failed love life - Scott Forrester follows the trail of the elusive killer as he wreaks havoc from Wyoming to the Bahamas. Forrester falls into the cult's carefully laid trap. Exposed to the assassin's crosshairs and forced to take his fight underground, Scott Forrester must confront the cult's menace in all its physical and spiritual forms. And the ultimate price to end this nightmare? Cross the no man's land that divides good from evil... to bargain his soul with the Devil himself. Tiger Paw is a thriller cloaked in mystery, psychological suspense and international intrigue. A story of people who have sold their souls in exchange for wealth and power. A story of greed, deception, and revenge. And a story of one man's struggle to triumph against the greatest evil he has ever faced.

Extending the discussion of critical content analysis to the visual realm of picturebooks and graphic novels, this book provides a clear research methodology for understanding and analyzing visual imagery. Offering strategies for "reading" illustrations in global and multicultural literature, chapter authors explore and bring together critical theory and social semiotics while demonstrating how visual analysis can be used to uncover and analyze power, ideologies, inequity, and resistance in picturebooks and graphic novels. This volume covers a diverse range of texts and types of books and offers tools and procedures for interpreting visual images to enhance the understandings of researchers, teachers, and students as they engage with the visual culture that fills our world. These methods are significant not only to becoming a critical reader of literature but to also becoming a critical reader of visual images in everyday life.
