Shamos argues that a meaningful scientific literacy cannot be achieved in the first place, and the attempt is a misuse of human resources on a grand scale. He is skeptical about forecasts of

"critical shortfalls in scientific manpower" and about the motives behind crash programs to get more young people into the science pipeline.

Emphasizes a molecular approach to physical chemistry, discussing principles of quantum mechanics first and then using those ideas in development of thermodynamics and kinetics. Chapters on quantum subjects are interspersed with ten math chapters reviewing mathematical topics used in subsequent chapters. Includes material on current physical chemical research, with chapters on computational quantum chemistry, group theory, NMR spectroscopy, and lasers. Units and symbols used in the text follow IUPAC recommendations. Includes exercises. Annotation copyrighted by Book News, Inc., Portland, OR

Micelles, Monolayers, and Biomembranes Pearson

This fifth edition gives students an in-depth fundamental treatment of physical chemistry which is made easy to follow by providing full step-by-step derivations, clear explanations and by avoiding advanced mathematics unfamiliar to students. Necessary maths and physics have thorough review sections, and all worked examples are now followed by a practice exercise. The material on quantum mechanics has been substantially revised. The book is organized so that students can see the broad structure and logic of physical chemistry rather than a mixture of formulas and ideas presented randomly, and a fair number of biological applications are included.

G.HAINNAUX Departement Milieu et Activites Agricoles, Centre ORSTOM, 911 Avenue d' Agropolis, B.P. 5045, 34032 Montpellier Cedex , France. Solid state fermentation, popularly abbreviated as SSF, is currently investigated by many groups throughout the world. The study of this technique was largely neglected in the past in European and Western countries and there is now a high demand for SSF, meaning in food, environment, agricultural, phannaceutical and many other biotechnological applications. It gives me satisfaction to note that the importance of this technique was realised at my department way back in 1975 since then, our team has put concentrated efforts on developing this technique. xvii Foreword Advances in Solid State Fermentation Foreword M. PUYGRENIER Agropolis Valorisation, Avenue d' Agropolis, 34394 Montpellier Cedex 5, France. On the name of the Scientific Community, I would like to express the wish that this International Symposium on SSF should be successful. Solid State Fermentation is part of biotechnology research. It consists on seeding solid culture medium with bacteria or fungi (filamentous or higher) and on producing, in this medium (solid components and exudates) metabolites and high value products. In fact, this process is very old. In older industries such the food and agricultural, this technique has been extensively used. An

example of this is the production of pork sausages and Roquefort cheese. Pharmaceutical industry could make extensive use of SSF in the production of secondary metabolites of many kinds and development in this direction is soon expected.

Physical Chemistry for the Life Sciences John Wiley & Sons

Provides a fundamental understanding of the biophysical chemical properties of membrane structure and membranes' role and function in biological systems. Covers the characteristics of molecules, monolayers, more complex micelles and liposomes. Describes the significance of membrane structure, how receptors and other cell surface molecules are anchored within it, signal transduction plus the motion of proteins within and through it. Emphasizes the physical properties of biological processes.

Principles of Human Physiology, Global Edition Prentice Hall is This edition features the exact same content as the traditional text in a convenient, three-hole- punched, loose-leaf version.

Books a la Carte also offer a great value--this format costs significantly less than a new textbook. Engel and Reid's Quantum Chemistry and Spectroscopy gives students a contemporary and accurate overview of physical chemistry while focusing on basic principles that unite the sub-disciplines of the field. The Third Edition continues to emphasize fundamental concepts and presents cutting-edge research developments that demonstrate the vibrancy of physical chemistry today.

Religious Individualisation ADDISON WESLEY

This book contains a compilation of papers based on presentations made at the International Symposium on Penile Disorders held in Hamburg, Germany, 26-27 January 1996, under the Chairmanship of Hartmut Porst. This was a unique conference in that it comprehensively addressed various disorders that affect the organ situated at the "center of the male", the penis. As an important beginning, the sociocultural aspects of the erect phallus were presented by G. Wagner from Copen hagen. The anatomy of the penis and the physiological con ditions of erection were then discussed by K. -P. J Unemann from Mannheim, Germany. Previous conferences on the penis had concentrated only on specific areas of disease such as impotence. However, it became readily apparent that at this conference something new for almost

every aspect of disease would be discussed, including congenital disorders such as hypospadias and epispadias, sexually transmitted and noninfectious dermatological diseases, and congenital and acquired penile curvatures and penile fractures. An excellent presentation of managing penile cancer by stage related therapeutic decision was presented by S. C. MULLER from Bonn, Germany. There is no better person to present a discussion of Peyronie' s disease in 1996 from a historical and management perspective than J. Pryor from London, UK. This same degree of expertise was also demonstrated by I. Saenz de Tejada from Madrid, Spain, regarding priapism.

confusion. First her father had found a floozy who had already buried three husbands. Then her late mother's jewelry started showing up around the gold digger's neck. Now Hannah, who has just put her life together after a bout with cancer, is desperately searching for her missing father. Because this poor man has either made a terrible mistake, committed a terrible crime, or fallen victim to a killer who seized the moment for murder....
